KONGUNADU ARTS AND SCIENCE COLLEGE (AUTONOMOUS)

COIMBATORE - 641 029

DEPARTMENT OF WILDLIFE BIOLOGY (PG)

CURRICULUM AND SCHEME OF EXAMINATIONS (CBCS) (2025 – 2026 and onwards)

KONGUNADU ARTS AND SCIENCE COLLEGE (AUTONOMOUS) COIMBATORE - 641 029

DEPARTMENT OF WILDLIFE BIOLOGY

Vision

To increase the knowledge in the area of wildlife both flora and fauna, to understand the value of Wildlife Biology and conservation of the ecosystem, and to promote societal-oriented applied research using ecosystem management by students through high-quality education and research.

Mission

- To create awareness on the importance of animal diversity and conservation of biodiversity
- To mold the students in the field of Wildlife Biology both in theory and practical to equip themselves in the area of Wildlife Biology and its related field for their employment opportunities.
- To involve the students in activities of conservation of wildlife and its related research activities.

Program Outcome (PO)

- **PO1** Gain in-depth understanding of the status, distribution, and classification of fishes, amphibians, reptiles, birds, and mammals.
- **PO2** Develop skills for identifying species through direct and indirect evidence
- **PO3** Enhancing knowledge in forest ecosystems, silviculture, biodiversity conservation, and environmental impact assessment.
- **PO4** Expand expertise in environmental legislation, including the Indian Forest Act, Forest Conservation Act, Biodiversity Act, Wildlife (Protection) Act, and wildlife crime investigation.
- **PO5** Apply learned skills in research focused on wildlife population estimation, ethology, habitat quality, and carrying capacity assessments for flora and fauna.
- **PO6** Provide skills on to assess human-wildlife conflicts and mitigation strategies.
- **PO7** Acquired knowledge on Biosphere Reserves, National Parks, Wildlife Sanctuaries, Zoological Parks, Tiger Reserves and Elephant Reserves.
- **PO8** Promoting the ability to recognize the physiology, behaviour, and evolutionary adaptations of wild animals.

Program Specific Outcomes (PSO)

After the successful completion of Wildlife Biology program, the students are expected to

- **PSO1** Elucidate animal-animal, animal-plant, animal-microbe interactions and their consequences to animals, humans and the environment.
- **PSO2** Develop deeper understanding of key concepts of biology at molecular and cellular level, physiology and reproduction at organism level, and ecological impact on animal behaviour.
- **PSO3** Learn about managing wildlife, the identification of deceased animal and their organs, cause of death and human-wildlife conflicts.
- **PSO4** Develop an understanding of classification and taxonomy of wildlife, as well as about their habits, habitats and conservation.
- **PSO5** Focus to prepare the students with research-oriented approach in frontier area of Wildlife Biology to carrying out advanced research.

KONGUNADU ARTS AND SCIENCE COLLEGE (AUTONOMOUS) COIMBATORE – 641 029

Course Name: M.Sc. Wildlife Biology

Curriculum and Scheme of Examination under CBCS

(Applicable to the students admitted during the Academic Year 2025-2026 and onwards)

						Exam. Marks		
Semester	Subject Title of the Paper Code		Instruction hours/ cycle	CIA	ESE	Total	Duration of Ex (Hours)	Credits
	25PWB101	Core Paper - 1 Ichthyology and Herpetology	7	25	75	100	3	5
	25PWB102	Core Paper - 2 Ornithology	7	25	75	100	3	5
Ι	25PWB103	Core Paper - 3 Mammalogy	7	25	75	100	3	5
	25PWB1CL	Core Practical -1 Ichthyology & Herpetology, Ornithology and Mammalogy	4	40	60	100	3	2

	25PWB205	Core Paper - 5 Ethology of Wildlife	5	25	75	100	3	5
	25PWB206	Core Paper - 6 Forest Entomology	5	25	75	100	3	5
п	25PWB207	Core Paper - 7 Conservation of Biodiversity	5	25	75	100	3	5
11	25PWB2CM	Core Practical - 2 Ecology & Evolution and Ethology of Wildlife240		40	60	100	3	2
	25PWB2CN	Core Practical - 3 Forest Entomology and Conservation of Biodiversity	2	40	60	100	3	2
	25PWB2E2	Major Elective - 2	5	25	75	100	3	5
			30			700		29
	25PWB308	Core Paper - 8 Physiology of Wildlife	8	25	75	100	3	5
	25PWB309	Core Paper - 9 Management of Zoos, Sanctuaries and National Parks	8	25	75	100	3	5
ш	25PWB3CO	Core Practical - 4 Physiology of Wildlife	4	40	60	100	3	2
	25PWB3CP	Core Practical - 5 Management of Zoos, Sanctuaries and National Parks	4	40	60	100	3	2
	25PWB3N1	Non-Major Elective - 1	4	25	75	100	3	4
	-	Extra Departmental Course	2	100	-	100	3	2
	25PWB3IT	Internship Training ****				Grade		
			30			600		20
	25PWB410	Core Paper - 10 Wildlife Management Techniques	8	25	75	100	3	5
IV	25PWB4CQ	Core Practical – 6 Wildlife Management Techniques	4	40	60	100	3	2
	25PWB4Z1	Project & Viva - Voce	14*	20	80	100	-	8
	25PGI4N2	Non-Major Elective - 2	4	100		100	3	4
		Total	30			400		19
		Grand Total				2200		90

* 14 hours are allotted for project work, which will not be accounted for staff workload

Note:

- CBCS Choice Based Credit System
- CIA Continuous Internal Assessment
- ESE End of Semester Examinations

******** - The students shall undergo internship training / field work for a minimum period of 14 working days at the end of the <u>Second</u> semester during summer vacation and submit the report in the <u>Third</u> semester which will be evaluated for 100 marks by the concerned guide and followed by an internal *viva-voce* by the respective faculty or HoD as decided by the department. According to their marks the grades will be awarded as given below.

Marks %	Grade
85-100	0
70-84	D
60-69	А
50-59	В
<40	U (Reappear)

Major Elective Papers (2 papers are to be chosen from the following 4 papers)

- 1. Forestry and Silviculture
- 2. Ethnobiology
- 3. Biotechnology and Genetic Engineering
- 4. Wildlife Crime

Non-Major Elective Papers (2 papers are to be chosen from the following 4 papers)

- 1. Research Methodology
- 2. Biostatistics, Application of Computing & Artificial Intelligence 4.0
- 3. Environmental Science
- 4. Information Security #

#: To be offered by the respective department

Sub. Code and Title of the Extra Departmental Course (EDC):

Sub. Code: 25PWB3X1 EDC Paper 1: Wildlife Conservation

Tally Table:

Subject	No. of Subjects	Total Marks	Credits
Core - Theory / Practical / Project	17	1700	70
Major Elective Papers	2	200	10
Non - Major Elective Paper	2	200	8
EDC Paper	1	100	2
Grand Total	22	2200	90

- > 25 % CIA is applicable to all subjects except JOC, ALC and COP which are considered as extra credit courses.
- > 100 % CIA for Information Security and EDC.
- The students should complete any MOOC course available for Online learning platforms like SWAYAM, NPTEL, IIT Bombay Spoken Tutorial, e-Pathshala etc., with a minimum of 4 weeks in duration before the completion of the 3rd semester and the course completion certificate should be submitted through the HOD to the Controller of Examinations. Extra credits will be given to the candidates who have successfully completed.
- Onsite Training preferably relevant to the course may be undertaken as per the discretion of the faculty or HOD.

Components		Marks	Total			
•	Т	heory				
CIA I	75	(75+75 = 150/10)				
CIA II 75		15				
Assignment	/Seminar	5	25			
Attendance		5				
Practical						
CIA Pra	ctical	25

Attendance		5				
	P	roject				
Review		15	20			
Regularity		5	20			

Components of Continuous Internal Assessment

BLOOM'S TAXONOMY BASED ASSESSMENT PATTERN

K1-Remembering; K2-Understanding; K3-Applying; K4-Analyzing; K5-Evaluating

1. Theory Examination

CIA I & II and ESE: 75 Marks

Knowledge Level	Section	Marks	Description	Total
K1 Q1 to 10	A (Answer all)	10 x 1 = 10	MCQ	
K1 – K5 Q11 to 15	B (Either or pattern)	5 x 5 = 25	Short Answers	75
K2 – K5 Q16 to 20	C (Either or pattern)	5 x 8 = 40	Descriptive / Detailed	

2. Practical Examination:

Knowledge Level	Section	Marks	Total
K3	Experiments	50	
K4	Decend Weyl-	10	60
K5	Record Work	10	

3. Project Viva Voce:

Knowledge Level	Section	Marks	Total
K3	Project Report	60	
K4	F	20	80
K5	Viva voce	20	

Programme	Code: 27	M.So	:. WILDLIFE	BIOLOGY
Title of t	the paper: Core	Paper 1 –ICHTH	YOLOGY AN	D HERPETOLOGY
Batch	Hours / Week	Total Hours	Credits	Skill Development
2025-2027	7	105	5	

COURSE OBJECTIVES

- 1. To understand about the concepts of taxonomy and classification of Pisces, Amphibians and Reptiles.
- 2. To acquire knowledge on the economic importance of fishes, amphibians and reptiles
- 3. To understand important physiological functions in various vertebrate forms.
- 4. To know about the distribution of tortoises, terrapins, marine turtles and its migration
- 5. To know about the distinctive features, distribution of crocodiles and breeding biology of Indian crocodiles

COURSE OUTCOMES

On successful completion of the course, the students will be able

	CO1	To understand concepts of taxonomy and its classification of pisces and their
K.	COI	economic importance
	CO2	To understand concepts of taxonomy, its procedures, classification of
	02	amphibians and their economic importance
	CO3	To understand concepts of taxonomy and classification of reptiles and their
to	COS	economic importance
	CO4	To attain knowledge about locomotory organs, methods of locomotion, feeding
	C04	and Digestion in select vertebrates.
-	COS	To gain knowledge on distinctive features and distribution of turtles, terrapins,
K	COS	tortoise, migration of marine turtles, breeding biology of Indian crocodiles

UNIT I

SYLLABUS

(21 HOURS)

PRINCIPLES & TAXONOMY OF PISCES: 1) Characteristics and Classification of Pisces up to Order with suitable examples. 2) Biological and Economic importance of fishes: Marine, Estuarine, Lentic, Game and Aquarium fishes 3) Fish migration.

UNIT II

(21 HOURS)

PRINCIPLES & TAXONOMY OF AMPHIBIANS: 1) Characteristics and Classification of Amphibia up to order with suitable examples, 2) Salient features and distribution of *Duttaphrynus melanostictus*, *Euphlyctis hexadactylaus*, *Rhacophorus pseudomalabaricus*, *Tylotriton verrucusosus*, *Ichthyophis beddomii*, 3) Biological and Economic importance of Amphibians.

UNIT III

PRINCIPLES & TAXONOMY OF REPTILES: 1) Classification and Characteristics features of Reptilia up to Order with suitable examples. 2) Distinctive features and distribution of Common Venomous snakes (Spectacled cobra, Krait, Saw scaled-viper, Russell's Viper) 3) Mildly venomous snakes (Long-nosed whip snake, Cat snake), 4) Non-venomous snakes (checkered keelback, Indian rat snake, Red sand boa, Indian rock python). 5) Biological and economic importance of Reptiles.

(21 HOURS)

UNIT IV

PHYSIOLOGY: Comparative account of 1) Digestive 2) Respiratory, 3) Circulatory and 4) Urinogenital system of fishes (shark), amphibians (frog) and reptiles (lizard).

UNIT V

(21 HOURS)

INDIAN TURTLES, TERRAPINS, TORTOISES AND CROCODILES: 1) Distinctive features and distribution of Indian turtles, Indian tortoise and Indian terrapins, 2) Various aspects of migration in sea turtles* 3) Breeding biology of Marine Turtles 4) Distinctive feature, distribution, breeding biology, status and conservation threats of Indian Crocodiles.

Teaching Methods

25PWB101 (21 HOURS)

Programme	Code: 27	M.Sc. WILDLIFE BIOLOGY			
Title of the paper: Core Paper 2 – ORNITHOLOGY				OGY	
Batch	Hours / W	/eek	Total Hours	Credits	Chill Dovial an mant
2025-2027	7		105	5	Skin Development

COURSE OBJECTIVES

- 1. To understand the Avian classification, structure, morphology, external modification, economic value and threats.
- 2. To study about the feeding habits and habitat ecology of birds.
- 3. To study about the skeletal, nervous, respiratory, digestive and urinogenital system of birds.
- 4. To know about the migration, mechanism of migration.
- 5. To understand the egg laying, brooding, parental care and nesting of birds.

COURSE OUTCOMES

On successful completion of the course, the students will be able

ζ2	CO1	To understand the classification of birds, structure and morphology of birds,
		evolutionary adaptations, threats and their economic importance.
Ι	CO^{2}	To analyze the digestive system of birds, various feeding habits and habitat
	02	ecology of birds.
to	CO3	To understand the skeletal and respiratory system, migration and nesting of
		birds
	004	To understand the urinogenital system, reproduction, breeding season and
	C04	breeding behavior of birds
K1	COS	To gain knowledge about nervous system and sense organs, egg laying,
	COS	clutch size and parental care of birds

SYLLABUS

UNIT 1

TAXONOMY OF BIRDS: 1) Taxonomy and Anatomy Birds: Classification upto order with examples. 2) Structure and external Morphology of Birds. 3) Connecting link – Archaeopteryx. 4) Adaptations of flightless birds.

UNIT II

PHYSIOLOGY: 1) Digestive system, 2) Circulatory system, 3) Respiratory system, 4) Nervous system, 5) Urinogenital system.

UNIT III

ADAPTATION OF BEAK AND FEET BIRDS: 1) Nectarivores, 2) Frugivores, 3) Graminivores, 4) Insectivores, 5) Carnivores, 6) Omnivores, 7) Scavengers. 8) Distribution of birds based on habitats- Terrestrial (Forests, grassland, desert, arid zone, urban and human altered landscapes) and Aquatic birds (coastal and inland water birds).

(21 HOURS)

(21 HOURS)

(21 HOURS)

UNIT IV

BREEDING BIOLOGY: 1) Breeding seasons, factors influencing breeding seasons, 2) Sexual selection, courtship display, pair bond, sexual dimorphism, polymorphism, polyandry, polygamy, promiscuity. 2) Co-operative breeding, brood parasites. 3) Nests: Choices of roost site, choices of nesting site, selection of nesting materials, colonial nesting. 4) Types of nests, and multiple nests structures. 5) Egg laying: Clutch size, incubation patterns in different species, hatching and parental care, Nest sanitation, brooding and defense of young ones.

UNIT V

BIRD MIGRATION: 1) Migration in birds: Kinds, Mechanics, timing, physiology, orientation and navigation, and ringing, 2) Flight adaptation in birds, 4) Bird hazards in airports*, 5) Threats to birds: Habitat loss, hunting and anthropogenic pressure 6) Bird watching, 7) Ecological and economic values of birds.

Teaching Methods

Programme Co	de: 27	M.Sc.	WILDLIFE BIG	DLOGY
	Title of the pa	per: Core Paper	3-MAMMALO	GY
Batch	Hours / Week	Total Hours	Credits	Shill Development
2025-2027	7	105	5	Skin Development

COURSE OBJECTIVES

- 1. Understand the classification of mammals.
- 2. Acquire the knowledge of mammalian physiology.
- 3. Knowledge about different mammalian species.
- 4. Levels of organization in mammals.
- 5. Analyze the ecological and evolutionary affinities of mammals.

COURSE OUTCOMES

On successful completion of the course, the students will be able

K5	CO1	To understand the mammalian classification, physiology of different systems, evolutionary adaptation and their economic importance.		
[CO2	To know about the various carnivorous mammals, their distinctive features, distribution, habit and various strategies to protect them.		
to	CO3 To know about the various herbivorous mammals, their distinctive distribution, habit and various strategies to protect them.			
	CO4	To acquire a knowledge on life history parameters, population dynamics and various population estimation methods		
K1	CO5	To study the history, adaptations, behavior, social organization, mating systems, communication.		

SYLLABUS

(21 HOURS)

TAXONOMY AND CLASSIFICATION OF MAMMALS: 1) Classification of mammals upto order with suitable examples: Physiology of mammals: 2) Digestion, 3) reproduction, 4) endocrine, 5) excretory and 6) dental formulae.

UNIT II

UNIT I

(21 HOURS)

CARNIVORES: 1) Big Cats: Tiger, Lion, Leopard, and Snow Leopard. 2) Lesser Cats: Golden cat, Leopard cat, Fishing cat, Jungle cat. 3) Civet: Tiger civet, Large Indian civet, Small Indian civet, Palm civet, Binturong or Bear cat, 4) Hyena: Stripped hyena, 5) Mongoose: Common Mongoose, Small Indian, Stripped necked mongoose, Crab-eating mongoose. 6) Dogs: Wolf, Jackal, Red Fox, Indian Fox, Dhole, 7) Bears: Sloth Bear, Himalayan Black Bear, Brown Bear, 8) Weasels: Common and Smooth Indian Otter. 9) Pholidota- Pangolin.

UNIT III

HERBIVORES: 1) Order Artiodactyls: Deer- Kashmir stag, brown- antlered deer, swamp deer, hog deer, spotted deer, barking deer, musk deer, mouse deer, sambar deer, antelope –black buck, four horned antelope. Goat- Himalayan tahr, Nilgiri tahr, Oxen, Guar, Pig- Wild Boar. 2) Order Perissodactyls: Horses- wild Ass, Rhinoceros- one horned Rhinoceros. 3) Order Proboscidea: Elephants.

(21 HOURS)

UNIT IV

25PWB103 (21 HOURS)

POPULATION DYNAMICS: 1) Demographic and life history parameters, evolution of life history parameters: r & K selection, allometry, aging and sexing, life tables, age and stage structures models, methods of estimation of life history parameters, 2) Population dynamics: exponential, logistic and other forms of growth of population, density dependent and independent growth, population simulation, 3) Predator-prey systems, and carrying capacity.

UNIT V

(21 HOURS)

ADAPTATION, BEHAVIOUR AND IMPORTANCE OF MAMMALS: 1) History of mammalogy: Adaptations in mammals, hibernation, torpor, aestivation, locomotion and water regulation. 2) Metabolism and thermoregulation: Ectothermy, homeothermy and cold stress, body size versus homeothermy. 3) Body size variation in mammals and its influence on life history: Metabolic rate, weight constraints, feeding behaviour, niche width and reproduction. 4) Mammalian skin and its derivatives. 5) Evolutionary adaptations in mammals. 6) Biological and economic importance of Mammals*.

Programme Code: 27 M.Sc. WILDLIFE BIOLOGY						
Title of the Practical: Core Practical 1 –						
ICHTHYO	ICHTHYOLOGY & HERPETOLOGY, ORNITHOLOGY AND MAMMALOGY					
Batch	Hours / Week	Total Hours	Credits	Skill Development		
2025-2027	4	60	2	Skin Development		

Pre-requisite: Fundamental knowledge on animal anatomy and biodiversity

COURSE OBJECTIVES

- 1. To identify the amphibians based on morphological features
- 2. To identify venomous and non-venomous snakes
- 3. To identify the birds and mammals
- 4. To understand important physiological functions in various vertebrate forms.
- 5. To understand the functions of nervous system and sense organs.

COURSE OUTCOMES

On successful completion of the course, the students will be able to

5	CO1	Know morphometric character of fishes and reptiles
\mathbf{X}	CO2	Attain knowledge about locomotory organs, locomotion, feeding and
	02	digestion of some vertebrates
_	CO3	Gain knowledge about vertebrate classification, as well as structure and
to		function of some vertebrates
	CO4	Know about mist net techniques and methods of bird ringing
$\tilde{\omega}$	COS	Understand the evolutionary modifications of fore limb from fishes to
\mathbf{X}	COS	mammals

SYLLABUS

MAJOR

- 1. Identification of Amphibians
- 2. Identification of venomous and non-venomous snakes
- 3. Identification of Bird in the field
- 4. Demographical structure of Asian elephants
- 5. Study of epidermal derivatives: Skins, Nails, Scales, Claws, Feathers

MINOR

- 1. Identification of scales in the Fishes (ctenoid, placoid, cycloid)
- 2. Types of feathers in the birds (Quill feather, Down Feathers, Filo plume Feathers)
- 3. Types of beak in the birds (flower probing-sunbird, tearing- kite, cracking-hornbill)
- 4. Types of feet in the birds (parrot, patridge, kite)
- 5. Dentition in mammals (deer, wild boar, leopard)

SPOTTERS

- 1. Skull of frog (Amphibians),
- 2. Skull of birds (Aves),
- 3. Skull of rabbit (Mammals)
- 4. Different types of horns in mammals
- 5. Digit structure of mammals
- 6. Identification of Asian elephants and African elephants

25PWB1CL

- 7. Tongue of different vertebrates
- 8. Identification of tiger and leopard skin

SUBMISSIONS

- 1. Submit an album of amphibians, reptiles, birds and mammals of classification and ecological importance / field trip.
- 2. Bonafide Record

TEXT BOOKS

- 1. Khanna, S.S, and Singh H.R. (2014). Textbook of Fish Biology and Fisheries 3rd Edition

KONGUNADU ARTS AND SCIENCE COLLEGE (Autonomous) Coimbatore – 641029 Model Question Paper (Practical)

End of Semester Examination Question paper pattern

(For the candidates admitted from the academic year 2025-2026 onwards)

Duration: 3 Hours

Max. Marks: 60 Marks

BREAK UP OF MARKS

<u>Core Practical 1:</u> Ichthyology & Herpetology, Ornithology and Mammalogy

S.	No Distribution Component	Marks
1.	Major Experiments	20
2.	Minor Experiments	10
3.	Spotters	15
4.	Submission	05
5.	Record Work	10
	TOTAL	60 Marks

Programme Co	de: 27	M.Sc	. WILDLIFE BI	OLOGY
Title	e of the paper: Co	re Paper 4 – ECC	DLOGY AND EV	OLUTION
Batch	Hours / Week	Total Hours	Credits	Cleill Development
2025-2027	6	90	5	Skill Development

COURSE OBJECTIVES

- 1. To understand basics of ecology.
- 2. To elucidate the interaction of animals with ecosystem.
- 3. To know about the various pollution
- 4. To understand the evolution, fossils and fossilization
- 5. To understand the basic phylogeny of animals.

COURSE OUTCOMES

On successful completion of the course, the students will be able

ζ5	CO1	To learn various limiting factors in ecology, population ecology and community ecology
¥	CO2	To understand about the structure and functions of various ecosystems and biogeochemical cycles
<u>c</u> CO3 To learn about sensing and G		To learn about various pollutions, Environmental Impact Assessment, remote sensing and Geographical Information System
	CO4	To understand the origin of life on earth, evolutionary time scale, concepts of evolution, fossil and fossilization
K1	CO5	To know about the concepts of phylogenetics, DNA hybridization, molecular clocks and DNA barcoding

UNIT I

SYLLABUS

(18 HOURS)

LIMITING FACTORS IN ECOLOGY: 1) Light, Temperature, Soil, Law of minimum, Law of tolerance. 2) Population ecology: Density, Natality, Mortality, Growth curves, Equilibrium fluctuation, Biotic potential, Regulation. 3) Community ecology: Structure, Stratification, Ecotone and Edge effect, Ecological niche, Ecological succession.

UNIT II

(18 HOURS)

ECOLOGICAL FACTORS: 1) Ecosystem structure, dynamics, energy flow, Primary production and decomposition. 2) Structure and function of ecosystems: Terrestrial (forest, grassland) and aquatic (freshwater, estuarine, marine), 3) Biogeochemical cycles: gaseous (Carbon, Nitrogen, Oxygen), Sedimentary (Sulphur, Phosphorus).

UNIT III

(18 HOURS)

POLLUTION IN THE ECOSYSTEM: 1) Air, Water, Land, Noise, Thermal, Radioactive, 3) Environmental Impact Assessment (EIA). 4) Space Ecology 5) Global warming and climate change

24PWB204 (18 HOURS)

UNIT IV

THEORIES OF ORGANIC EVOLUTION: 1) Origin of life on earth, Abiotic synthesis of organic monomers and polymers, concept of Oparin and Haldane 2) Lamarckism 3) Neo-lamarckism 4) Darwinism 5) Neodarwinism 6) Mutation

UNIT V

(18 HOURS)

POPULATION GENETICS AND EVOLUTION: 1) Geological time scale 2) Variations and its concept 3) Founder principle 4) Genetic drift 5) Hardy Weinberg Law 6) Speciation- Isolation, 7) Fossils and Fossilization: Ariyalur and Siwalik*.

Teaching Methods

Smart Class Room/PowerPoint presentation/Seminar/Quiz/Discussion *: Self study

Programme Co	de: 27	A.Sc. WILDLIFE	BIOLOGY	
Title of the pap		Core Paper 5 –E	THOLOGY OF	WILDLIFE
Batch	Hours / Wee	K Total Hours	Credits	Sleill Davidanment
2025-2027 5		75	5	Skiii Development

COURSE OBJECTIVES

- 1. To provide overview of introduction to behaviour in wild animals.
- 2. To make aware of pheromones and hormonal actions in animal behaviour.
- 3. To understand the biological rhythms and communication systems.
- 4. To narrate the breeding and parental care of wildlife.
- 5. To understand the social behaviour of mammals.

COURSE OUTCOMES

On successful completion of the course, the students will be able to

	CO1	To understand the concepts, types and analysis of animal behaviour
S	CO2	To know about the physiological mechanism of animal behavior, role of
		hormones and pheromones, and various methods of studying behaviour
	CO2	To analyze the biological rhythms, various communication system of animals,
0	COS	foraging behavior of mammals and birds
t	CO4	To gain knowledge about the breeding behavior of animals and parental care in
	C04	amphibians, reptiles and mammals
Ξ	CO5	To understand the social commensalism and social behaviour of selected
Х	COS	mammals.

SYLLABUS

(15 HOURS)

BEHAVIOURS IN ANIMALS: 1) Types of Behaviours: classical and modern concepts, 2) Fixed action pattern and ritualization, 3) Learning, Imprinting, habituation, 4) Analysis of behaviour pattern: taxis, kinesis and reflexes, 5) Methods of studying behavior and 6) Ethogram.

UNIT II

UNIT I

(15 HOURS) HORMONES AND PHEROMONES: 1) Physiological mechanism of behaviour 2) Neural behaviour 3) Perceptual mechanism, 4) Role of hormones and pheromones in behaviour of Animals, Predator detection, predator tactics, altruism and evolution

UNIT III

BEHAVIOURAL PATTERN: 1) Biological rhythms: Circadian, Lunar, Tidal and animal rhythms. 2) Animal communication: Visual, Auditory, Chemical and Vocalization in Mammals, Birds and Insects. 3) Foraging Behaviour in Mammals and Birds*, 4) Origin and significance of play.

UNIT IV

(15 HOURS) BREEDING BEHAVIOUR OF ANIMALS: 1) Courtship display, 2) Sexual selection, pair bond, 3) Sexual dimorphism, polymorphism, 4) Polyandry, polygamy, promiscuity, 5) Cooperative breeding, brood parasites, 6) Parental care in Amphibians, Reptiles and Mammals.

25PWB205 (15 HOURS)

UNIT V (15 HOURS) SOCIAL BEHAVIOURS IN ANIMALS: 1) Aggression, Competition, Social spacing, 2) Territory, Dominance. 3) Animal association: Mutualism, parasitism, commensalism, symbiosis, predation and amensalism. 4) Social behavior of Primates, Elephants and Lion.

Teaching Methods

Smart Class Room/PowerPoint Presentation/Seminar/Quiz/Discussion

*: Self study

Programme	Code: 27	M.Sc.	. WILDLIFE B	IOLOGY
Title of the paper: Core Paper 6 – FOREST ENTOMOLOGY				OMOLOGY
Batch	Hours / Week	Total Hours	Credits	Skill Development
2025-2027	5	75	5	Skiii Development

COURSE OBJECTIVES

- 1. To learn the classification and taxonomy of insects.
- 2. To study the digestive, reproductive, excretory system of insects.
- 3. To study about biology and economic importance of insects.
- 4. To study the pest of teak, sandalwood and bamboo.
- 5. To learn the insect infestation, survey and control measures.

COURSE OUTCOMES

On successful completion of the course, the students will be able to

5	CO1	Gain knowledge on classification, taxonomy, morphology, anatomy,
K	COI	structure and various mouthparts of insects
	CO2	Elucidate physiology, digestion, muscular system, excretory system and
	02	reproductive system of insects
C	CO^{2}	Gain knowledge on biology of honey bee, silk moth, lac insect, culture
t	COS	methods of selected insects and various beneficial insects
	COA	Understand the destructive insects, biology, pests of teak, sandalwood and
	C04	bamboo, damage caused and control measures
1	COF	Understand the detection and estimation of insect infestation and their
Κ	COS	control methods

UNIT I

SYLLABUS

(15 HOURS)

TAXONOMY AND ANATOMY: Classification and taxonomy- Classification of insects up to order with examples. Morphology and anatomy of insects-segmentation and divisions of the body. Head-Mouth parts and its types. Thorax-legs-Modifications of the basic leg structure. Exoskeleton-integument-Basic structure of cuticle-wings and flight.

UNIT II

(15 HOURS)

PHYSIOLOGY OF INSECTS: Physiology of Insects: Digestive system -Digestion - transport; 2) Respiratory – physiology of gas exchange*; 3) Execratory system – osmoregulation 4) Integument system – structure, formation and function, 5) Growth and moulting, 6) Reproductive system.

UNIT III

BENEFICIAL INSECTS: 1) Biology of Honey bee 2) Biology of Bombyx mori 3) Biology of Lac insect 4) Culture methods for honey bee and silk worm-Appliances used and problems related to these cultures 5) Beneficial insects-Pollinators, predators, parasitoids -scavengers -weed killers.

25PWB 206 (15 HOURS)

DESTRUCTIVE INSECTS: 1) Biology – control measures – damages caused – Insect Pest of Teak, 2) Biology – control measures – damages caused – Insect Pest of Sandalwood, 3) Biology – control measures – damages caused – Insect Pest of Bamboo, 4) Mode of Insect attack on trees: Leaf eaters, sapsuckers – Meristematic Tissue feeders, Wood destroyers, 5) Insect collection, preservation.

UNIT V

UNIT IV

(15 HOURS)

DETECTION AND EVALUATION OF INSECT PEST: Detection and evaluation methods of insect infestation: Survey – estimation of insect abundance – devices for evaluation method for determining degree of hazards – Biological evaluation – control of forest insects, direct and indirect methods.

Teaching Methods

Smart Class Room/PowerPoint presentation/Seminar/Quiz/Discussion

Programme	Code: 27	M. S	Sc. WILDLIFE	BIOLOGY
Title of the paper: Core Paper 7 – CONSERVATION			OF BIODIVERSITY	
Batch	Hours / We	ek Total Hours	Credits	Skill Development/
2025-2027 5		75	5	Employable

COURSE OBJECTIVES

- 1. To understand the significance of biodiversity.
- 2. To understand the conservation of natural resources.
- 3. To make understand the wildlife organizations.
- 4. To gain knowledge about protected areas and its conservation.
- 5. To understand the wildlife laws and legislation.

COURSE OUTCOMES

On successful completion of the course, the students will be able to

	CO1	Learn the significance of biodiversity, biogeographical classification of
K'	COI	India, loss of biodiversity, hotspots, <i>in-situ</i> and <i>ex-situ</i> conservation.
	cor	Understand the natural resources, distribution and conservation of
	02	forests, types of wetlands and their importance.
CO 2	To make understand the state, national and international organizations,	
to	003	wildlife policies and biodiversity acts.
604		Understand the concept of protected area, wildlife wealth and their
	CO4	depletion, wildlife conservation approaches and limitations.
1	COF	Understand the wildlife trade, wildlife laws and legislation, human-
K	005	wildlife conflict and mitigation measures, project tiger and elephant.
	•	

UNIT I

SYLLABUS

(15 HOURS)

BIODIVERSITY CONSERVATION: 1) Definition, Types, Genetic, Species and Ecosystem diversity. 2) Values of biodiversity. 4) Biodiversity measurements, mega diversity centers, Loss of biodiversity, Hotspots, Biosphere Reserves 5) Conservation strategies: *In-situ* - National Parks, Wildlife Sanctuaries, Community Reserve and conservation Reserves. 6) *Ex-situ* – Zoological Park, aquarium, Botanical garden, Arboretum 7) *Ex-situ* techniques - Seedbank, Cryopreservation, Gene banks, Sperm banks, DNA banks and Tissue culture.

UNIT II

CONSERVATION OF NATURAL RESOURCES: 1) Resources types: Food, water, energy and minerals. 2) Human impact on Terrestrial and Aquatic resources, 3) Distribution and conservation of Forests, Grasslands and semi-arid habitats of India. 4) Wetland Habitats of India: Definition and types of wetlands, importance of wetlands and their conservation issues. 5) Convention on wetlands of International Importance (Ramsar convention).

UNIT III

ORGANIZATIONS IN WILDLIFE CONSERVATION: 1) Organization at State level: State Biodiversity Board, 2) National level: WCCB, NBA, ZSI, BSI, FRI, FSI, 3) International level: CITES, IUCN, CBD, WWF, 4) NGOs: BNHS, WTI, Zoo Outreach Organization, WCT and WPSI.

(15 HOURS)

UNIT IV

(15 HOURS)

WILDLIFE IN INDIA: 1) Biogeographical classification of India. 2) Flora and Fauna of India 3) Threats, Endangered and Endemic species. 4) IUCN redlist categories 5) Reasons for wildlife depletion in India. 6) Wildlife Habitat: Characteristics, Fauna and Adaptations with special reference to Tropical 7) Wildlife conservation approaches and limitations

UNIT V

(15 HOURS)

MANAGEMENT OF WILDLIFE: 1) Wildlife Trade and legislation: Assessment, documentation, Prevention of trade. 2) Wildlife laws and ethics: Wildlife (Protection) Act, 1972 and its Amendments. 3) National Forest Policy –1988*, 4) Biodiversity Act - 2002. 5) Human–wildlife interactions management: Human and animal injury and causalities, livestock lifting, crop and property damage, mitigation measures and role of corridor, Case study on innovative technology to mitigate human-wildlife interactions 6) Important projects for the conservation of wildlife: Project Tiger and Project Elephant.

Teaching Methods

Programme	Code: 27	M.	Sc. WILDLIFE B	IOLOGY	
Title of the paper: Core Practical 2					
I	ECOLOGY & EVOLUTION AND ETHOLOGY OF WILDLIFE				
Batch Hours / Week Total Hours Credits					
2025-2027	2	30	2	Skill Development	

COURSE OBJECTIVES

- 1. Explain core concepts in ecology and summarize our ecological understanding of environmental problems
- 2. To train how the biological data are processed and interpretations are made.
- 3. To teach the prey and predator relationships of animals.
- 4. To teach various behaviors of wild animals

COURSE OUTCOMES

On successful completion of the course, the students will be able to

ζ5	CO1	Understand the classification of the ecosystem
Н	CO2	Calculate various species diversity measures
to	CO3	Understand the physical and chemical concepts in biology.
3	CO4	Understand how to study the behaviour
K	CO5	Understand communal ecology in mammals.

SYLLABUS

MAJOR

- 1. Estimation of dissolved Carban dioxide (CO₂)
- 2. Estimation of dissolved Oxygen (O₂)
- 3. Prey-predator relationship (scat analysis)
- 4. Population Viability Analysis (PVA)
- 5. Focal animal sampling (Video clipping model can be used)
- 6. Scan sampling (Video clipping model can be used)

MINOR

- 1. Determination of: pH and Temperature
- 2. Food web and Nutrient Cycling (Demonstration only).
- 3. Paleo-evolution of mammoths (Demonstration only).
- 4. Animal Communication
- 5. Parental care

SPOTTERS

- 1. Terrestrial Ecosystems
- 2. Aquatic Ecosystem
- 3. Fossil and its types
- 4. Identification of planktons
- 5. Animal communication
- 6. Fixed Action Pattern
- 7. Pheromones trails
- 8. Parental care in Mammals

25PWB2CM

Submission at the time of Practical Examination

Programme Code: 27 M.Sc. WILDLIFE BIOLOGY					
Title of the paper: Core Practical 3 FOREST ENTOMOLOGY AND CONSERVATION OF BIODIVERSITY					
Batch 2025-2027	Hours / Wee 2	k Total Hours 30	Credits 2	Skill Development	

COURSE OBJECTIVES

- 1. To know the insects and its role
- 2. To study the life cycle of select insect species
- 3. To know the In-situ and Ex-situ conservation of wildlife
- 4. To address and evaluate the human wildlife conflict
- 5. Assessment of illegal wildlife trade

COURSE OUTCOMES

On successful completion of the course, the students will be able to

K5	CO1	Understand about the role of insects
	CO2	Gain knowledge on damages caused by the destructive insects.
to	CO3	Know about the beneficial insects.
3	CO4	Gain knowledge on <i>in-situ</i> and <i>ex-situ</i> conservation of wild animals
K	CO5	Understand about wildlife and its management

MAJOR

SYLLABUS

- 1. Study the life cycle of Bee
- 2. Digestive system / Nervous system of an insect
- 3. Study the life cycle of Silkworm
- 4. Diversity indices
- 5. Human-wildlife conflict: elephant, leopard, tiger, primates, wild boar, deer, antelope and birds

MINOR

- 1. Mode of insect attack on trees
- 2. Identification of an Elephant Corridor
- 3. Wildlife crimes: tusk, skin, nail, hair, meat, feather and beak
- 4. Invasive alien species: Prosopis, Lantana, Chromolaena, Senna, Parthenium and Wattle

SPOTTERS

- 1. Butterflies: red helen, common crow, common pierrot, common emigrant and yellow orange tip
- 2. Gall insects, wood boring insects, bark beetle and fluid feeding insect
- 3. Plant species: Teak, bamboo, sandal, amla, and sissoo
- 4. Beneficial organisms
- 5. Economic importance

25PWB2CN

Programme	Code: 27	M.Sc. WILDLIFE BIOLOGY		
Title of the paper: Core Paper 8 PHYSIOLOGY OF WILDLIFE				
Batch 2025-2027Hours / Week 8Total Hours 120Credits 				

COURSE OBJECTIVES

- 1. To study about the adaptation of animals in various environments.
- 2. To acquire knowledge on the osmo and thermo regulatory mechanisms.
- 3. Understand the respiratory organs, structure and functions.
- 4. To understand the excretory physiology and the role of hormones in the biological activities such as gestation and lactation
- 5. To acquire knowledge on the neural and muscular physiology.

COURSE OUTCOMES

On successful completion of the course, the students will be able to

	CO1	Acquire the knowledge on the concepts of adaptation, homeostasis and organisms
K.	COI	surviving in various environments
	cor	Learn about mechanism of thermo and osmoregulation, osmoregulation in aquatic
	02	and terrestrial environment and the importance of physiological activities
to	CO3	Understand the respiratory organs, function and transportation of respiratory gases
	CO4	Gain knowledge on excretory organs, mechanism, adaptation, excretory products, endocrine glands, role of reproductive hormones, gamete formation, fertilization, embryonic development, parturition and lactation
K1	CO5	Understand about the neuron structure and types, nerve impulse transmission, neuro degenerative diseases, muscular physiology and muscle contraction

UNIT I

SYLLABUS

(24 HOURS)

ADAPTATION AND HOMEOSTASIS: 1) Adaptation - Levels and Mechanism of adaptation - Significance of body size – Adaptation, acclimation and acclimatization - Concepts of homeostasis. Physiological adaptations of different environments: Marine - Shores and Estuaries – Freshwater - Extreme aquatic environments -Terrestrial life. Extreme terrestrial environments - Parasitic habitats. Stress Physiology – Basic concept of environmental stress and strain; concept of elastic and plastic strain; stress resistance, stress avoidance and stress tolerance, Meditation & Yoga*.

UNIT II

(24 HOURS)

MECHANISM OF THERMO AND OSMOREGULATIONS: Physiological mechanism of thermo regulation. Physiological adaptation to osmatic and ionic stress; mechanism of cell volume regulation. Osmoregulation in aquatic and terrestrial environments. Physiological response to oxygen deficient stress.

UNIT III

RESPIRATORY PHYSIOLOGY: Introduction to respiratory physiology– Respiratory organs-Structure and function. Respiratory gases–uptake – respiratory pigments – O2 & CO2 dissociation curves – transport of respiratory gases.

(24 HOURS)

25PWB308 (24 HOURS)

EXCRETORY PHYSIOLOGY AND ENDOCRINOLOGY: Excretory physiology -Excretory organs- mechanism of excretion- physiology – adaptations of excretion to environment – Excretory products: synthesis and elimination. Endocrine glands – Feedback regulation-Pituitary-gonadal axis. Role of reproductive hormones –gamete formation – fertilization-embryonic development – parturition – lactationneuroendocrine regulation. (Carnivore, Herbivores both ruminant and non-ruminant).

UNIT V

UNIT IV

(24 HOURS)

NEURAL AND MUSCULAR PHYSIOLOGY: Neural physiology –Neurons structure and types. Nerve impulse transmission - resting and action potential — neuro transmitters – mechanism of neural transmission. Neuro-degenerative diseases. Muscular physiology- Types of muscle, contraction–theories – molecular mechanism of muscle contraction.

Teaching Methods

Smart Class Room/ PowerPoint presentation/ Seminar/ Quiz/ Discussion

*: Self study

Programme C	code: 27	M.Sc. WILDLIFE BIOLOGY			
Title of the paper: Core Paper 9 MANAGEMENT OF ZOOS, SANCTUARIES AND NATIONAL PARKS					
Batch 2025-2027	Hours / Weel 8	Total Hours 120	Credits 5	Employable	

COURSE OBJECTIVES

- 1. To know the Sanctuaries, National Parks, Biosphere Reserves and Wildlife Projects.
- 2. To know the captive animal breeding and management.
- 3. To gain knowledge about habitat restoration, corridor management, introduction and reintroduction of species.
- 4. Techniques of tranquilization and translocation of animals, wildlife diseases

COURSE OUTCOMES

On successful completion of the course, the students will be able

j	CO1	To know the concepts, formation and management of the Wildlife Sanctuaries
K5	CO2	To know the concepts, formation and management of Biosphere Reserves the
	002	National Parks and Wildlife Projects
0	CO3	To understand the definition, aim, formation and management of the Zoos
t	CO4	To gain knowledge on habitat restoration, corridor management, exotic and
	04	invasive species, introduction and reintroduction of species
K3	CO5	To understand the diseases of wild animals, tranquilization and transportation of
[COS	problematic animals

UNIT 1

SYLLABUS

(24 HOURS)

(24 HOURS)

WILDLIFE SANTUARIES: 1) Definition, formation, management and administration. 2) Point Calimere WLS, 3) Vedanthangal BS. 4) Vellode BS, 5) Nellai WLS, 6) Uthayamarthandapuram BS 7) Thanthai Periyar WLS, 8) Koundinya WLS 9) Sri Venkateswara WLS, 10) Cauvery WLS.

UNIT II

NATIONAL PARKS AND TIGER RESERVES: 1) National Parks' definition, formation, management and administration: Guindy NP, Mukuruthi NP, Eravikulam NP, Silent Valley NP, Kaziranga NP, Gir NP. 2) Marine National Parks: Rann of Kutch, Gulf of Mannar, 3) Tiger Reserves' definition, formation, management and administration: Mudumalai Tiger Reserve, Sathyamangalam Tiger Reserve, Parambikulam Tiger Reserve, Bandipur Tiger Reserve, Badra Tiger Reserve, Manas Tiger Reserve, Kanha Tiger Reserve, Corbett Tiger Reserve, 4) Wildlife Projects: Lion, Rhinoceros, Dugong, River dolphin, Gharial and Nilgiri Tahr.

UNIT III

ZOOS AND ZOOLOGICAL PARKS: 1) Definition, Aims of Zoos, Formation and Management of Zoos and Zoological Parks, 2) Central Zoo Authority of India: National Zoo Policy 1998, Recognition of Zoo Rules 1992, Guidelines for Management of Zoos 3) Enclosures: Designing, Engineering and Enrichment. 4) Zoo animal nutrition: Food and feeding management. 5) Zoo sanitation: Principles and Management of Zoo. 6) Zoo veterinary services. 7) Animal restraint: Principles and Methods, release of restrained animals. 8) Transportation of animals. 9) Pests and Parasites, nutritional disorders 10) Zoo education, 11) Captive breeding: Aims, Principles, methods and case studies 12) World Association of Zoos and Aquariums (WAZA), Conservation Planning Specialist Group (CPSG)-IUCN-SSG.

(24 HOURS)

UNIT IV

(24 HOURS)

SPECIES CONSERVATION: 1. Conservation breeding, Identifying the key species, 2) Assessment of carrying capacity of habitat, 3) Exotic and Invasive Species: Problems and removal - Case Studies. 4) Introduction and re-introduction of endangered species: Case Studies, Tiger, Rhinoceros, Red panda and Cheetah.

UNIT V

(24 HOURS)

WILDLIFE MORTALITY AND DISEASES: 1. Infectious (Viral, bacterial, fungal diseases) and non-infectious (colon impaction, cancer, respiratory diseases, auto immune disease). 2. Zoonotic Diseases. 3) Techniques of tranquilization, 4) Rescue and treatment

Teaching Methods

Smart Class Room/PowerPoint presentation/Seminar/Quiz/Discussion *: Self study

25PWB3CO

Programme Code: 27 M.Sc. WILDLIFE BIOLOGY						
Title of the Practical: Core Practical 4 PHYSIOLOGY OF WILDLIFE						
Batch 2025-2027Hours / Week 4Total Hours 60Credits 						

COURSE OBJECTIVES

- 1. To understand the physiology of wildlife through practical
- 2. To assess the impact of salinity on wildlife

COURSE OUTCOMES

On successful completion of the course, the students will be able to

3	CO1	Understand the effect of temperature
\mathbf{X}	CO2	Know the gravity of blood
to	CO3	Gain the knowledge on the effect of salinity on oxygen intake
-	CO4	Estimation of ammonia, urea and Uric acid from excreta
K	CO5	Estimation of haemoglobin content

SYLLABUS

Major:

- 1. Identification of endoparasites and ectoparasites of wildlife
- 2. Effect of temperature on the opercular movement of fish and calculation of Q10.
- 3. Determination of the specific gravity of the blood in vertebrate animal by copper sulphate method.
- 4. Active uptake of Na+ and Cl-of a fish from the environmental water.
- 5. Effects of salinity on oxygen consumption of fishes and plot on graph.

Minor:

- 1. Analysis of ammonia, urea and uric acid from excretory product of animals.
- 2. Estimation of Haemoglobin content in fish blood.
- 3. Determination of LD-50 and LC-50.

SPOTTERS

- 1. pH meter
- 2. Centrifuge
- 3. Haemoglobino meter
- 4. Spectrophoto meter
- 5. Sphygmomano meter
- 6. ECG Recorded strip
- 7. X-ray machine
- 8. Thermo meter
- 9. Stop watch

SUBMISSIONS

- 1. Report on the field trips
- 2. Bonafide Record

Programme Code: 27 M.Sc. WILDLIFE BIOLOGY				
Title of the Practical: Core Practical 5 MANAGEMENT OF ZOOS, SANCTUARIES AND NATIONAL PARKS				
Batch 2025-2027	Hours / Week 4	Total Hours 60	Credits 2	Employable

COURSE OBJECTIVES

The main objectives of this course are to:

- 1. Know the various Protected Areas (PAs)
- 2. Feed preparation for zoo and tamed animals
- 3. Designing animal cages
- 4. Restraining animals using drugs and equipments
- 5. Know about the impact of parasites

COURSE OUTCOMES

On successful completion of the course, the students will be able to

ζ5	CO1	Understand various Protected Areas
щ	CO2	Understand about the feeding of zoo and tamed animals
to	CO3	Know about the captive breeding.
3	CO4	Knowledge about wildlife diseases
X	CO5	Understand about the animal captures

SYLLABUS

Major

- 1. Marking major National Parks and Wildlife Sanctuaries of Tamil Nadu
- 2. Marking major and Tiger Reserves of India
- 3. Marking Biodiversity Hotspots and Biosphere Reserves of India
- 4. Estimation of carrying capacity of an area
- 5. Food preparation for zoo and captive animals

Minor

- 1. Designing of animal cages (animal enclosures, moat/ Island)
- 2. Restraining of animals using drugs and equipments
- 3. Ectoparasite in wild animals
- 4. Endoparasite in wild animals
- 5. Captive Breeding (LTM)

SPOTTERS

- 1. Blow pipe
- 2. Mist net
- 3. Darting gun
- 4. Darting syringe
- 5. Microchip
- 6. Chemicals used in various operations of wildlife management

25PWB3CP

FIELD TRIPS

1. Field trip to Protected Areas

Submission at the time of Practical Examination

- 1. Report on the field trips

Programme C	Code: 27	M.S	c. WILDLIFE B	IOLOGY	
Title of the paper: Core Paper 10 – WILDLIFE MANAGEMENT TECHNIQ			IENT TECHNIQUES		
Batch	Hours / Week	Veek Total Hours Credits			
2025-2027	8	120	5	Employable	

COURSE OBJECTIVES

- 1. To make understand the applications and basic wildlife equipments.
- 2. To acquire the knowledge of GPS and mapping techniques
- 3. To sensitize the students on wildlife population estimation techniques.
- 4. To understand the survey and mapping of water resources and conservation.
- 5. To acquire knowledge on dealing problematic animals

COURSE OUTCOMES

On successful completion of the course, the students will be able to

	CO1	Acquire the knowledge on uses of various field equipments
	CO2	Gain the mechanism of GPS, GIS, Remote sensing and Radio Collaring methods
0	CO3	Learn the wildlife population estimation methods and tools used in estimation
- ×	CO4	Know the survey and mapping of water resources, wildlife conflicts, wildlife damage control, anti-poaching operations
Σž	CO5	Identifying problematic animals, translocation and their monitoring

SYLLABUS

(24 HOURS)

UNIT I

EQUIPMENT USED IN WILDLIFE: 1) Making observations and records, field notes & datasheets, 2) Planning wildlife management 3) Investigations and projects, funding agencies. 4) Wildlife Photography: types of cameras & binoculars - camera trap - 5) Altimeter, pedometer, field compass. 6) Sound recording & Media players - activity recording, weight measurement. 7) Drone and Artificial Intelligence.

UNIT II

(24 HOURS)

ANIMALS TRACKING: 1) Radio isotopes - radio collaring – GPS – GIS & Remote sensing. 2) Q GIS – Map Info –Arc view (outlines only). 3) Molecular methods in Wildlife; 4) Habitat manipulation: food, water and shade improvement. 5) Use of GIS and Remote sensing in Wildlife.

UNIT III

(24 HOURS)

(24 HOURS)

POPULATION ESTIMATION: 1) Planning census, sample counts, Block counts – Road side counts – Dung count – Pugmark & Waterhole census, 2) Identifying animals based on indirect signs 3) Capture recapture techniques 4) tiger, co-predator monitoring census methods. 5) Distance software, Creation of capture matrix and softwares used in wildlife sciences.

UNIT IV

FOREST CONSERVATION: 1) Survey and mapping water sources* 2) rain gauge setting, supplementary water source, providing access to natural & artificial water sources, 3) Fire as a tool. 4) Wildlife damage control, assessment methods, reasons for conflicts, trench fences, trenches & other methods 5) Anthropogenic pressure, Trail survey in boundary, Antipoaching operations 6) Ecotourism and Ecodevelopment.

(24 HOURS)

RESCUE AND REHABILITATION OF PROBLEMATIC ANIMALS: 1) Identification of problematic individuals. 2) Capturing methods. 3) Translocation. 4) Release of problematic animals. 5) Captive management. 6) Monitoring activities.

Teaching Methods

Programme	Code: 27	M.Sc. W	ILDLIFE BIC	DLOGY	
Title of the	paper: Core Pr	Practical 6 – WILDLIFE MANAGEMENT TECHNIQUES			
Batch 2025-2027	Hours / Week 4	Total Hours 60	Credits 2	Employable	

COURSE OBJECTIVES

The main objectives of this course are:

- 1. To make understand the applications and basic wildlife equipments.
- 2. To acquire the knowledge on handling the equipment related to wildlife.
- 3. To learn GIS and Remote sensing uses and its applications on wildlife management.
- 4. To sensitize the students on wildlife population estimation techniques.
- 5. To know the monitoring of tigers and their habitats.

COURSE OUTCOME

On successful completion of the course, the students will be able to

10	CO1	Acquire the knowledge in wildlife and equipments usage in the field	
CO2 Learn the significance of various field equipments			
to	CO3	Appreciate the mechanism of GIS, Remote sensing and Radio Collaring methods in wildlife	
3	CO4	Evaluate various types of population estimation, mapping techniques and wild animals health monitoring and postmortem techniques	
X	CO5	Understand the monitoring methods of wildlife	

SYLLABUS

Major

- 1. Preparation of Quadrats and estimation of population
- 2. Laying line transects in an area and estimation of population
- 3. Point Count for birds
- 4. Block count / Dung density estimation
- 5. Identification birds calls and write in detail about the bird species

Minor

- 1. Forest cover monitoring, map reading and surveying techniques of forest area
- 2. Marking geo-coordinates using softwares
- 3. Monitoring Tiger population using M-STrIPES software
- 4. Usage of drone Cameras in Wildlife management
- 5. Taxidermy (Demonstration only).

Spotters

- 1. GPS
- 2. Altimeter
- 3. Binoculars

Programme	Code: 27	M.Sc	. WILDLIFE BI	OLOGY
Title of the paper: PROJECT & VIVA – VOCE				
Batch	Hours / Week	k Total Hours Credits Shill Development		
2025-2027	14	210	8	Skin Development

COURSE OBJECTIVES

- 1. To acquire inherent knowledge and exposures on relevant practical problems in various fields.
- 2. To understand the data interpretation
- 3. To acquire the knowledge on thesis writing.

COURSE OUTCOMES

On successful completion of the project work, the students will be able to

5	CO1	Apply theoretical knowledge in the real field of wildlife research
\mathbf{X}	CO2	Analyze the importance of tasks in collecting the data
0	CO3	Evaluate relationships existing between theories and experiments
ţ	CO4	Provide problem solving skills on selected problems in any disciplines of
-		animal sciences
X	CO5	Execute appropriate statistical tools and interpretation of appropriate results

Individual project work will be allotted to each students under the supervision and guidance of the Faculty members during IV Semester. Project works will be given based on the various fields of specialization of the supervisors under whom the students are allotted. They are allotted based on the lot system. The fields of specialization include Herpetology, Ornithology, Mammalogy, on ecological and conservation related topics. The students shall do their projects under their supervisors and submit their dissertations at the end of IV Semester. During their Viva-Voce examination, both the Internal and External Examiners shall jointly evaluate the project reports submitted by the students and marks will be awarded on the basis as mentioned below.

Guidelines for the Distribution of Marks:

	Grand Total	•	100
	Viva – Voce	20	
ESE	Project Report Present	60	80
	Regularity	05	
CIA	Project Review	15	20

MAJOR ELECTIVE PAPERS

- 1. Forestry and Silviculture
- 2. Ethnobiology
- 3. Biotechnology and Genetic Engineering
- 4. Wildlife Crime

Programme Code: 27		M.Sc. WILDLIFE BI	OLOGY	
Title	of the paper:	Major Elective: FORE	STRY AND SII	LVICULTURE
Batch	Hours / Wee	k Total Hours	Credits	Skill Development
2025-2027	5	75	5	Skii Development

COURSE OBJECTIVES

- 1. To explain the core concepts of ecology for a better understanding of the environment.
- 2. To motivate, identify and solve environmental problems.
- 3. To create awareness about the improvement and protection of the environment.
- 4. To make understand the need for conservation of biodiversity and natural resources.
- 5. To help understand the concepts of exobiology.

COURSE OUTCOMES

On successful completion of the course, the students will be able to

3	CO1	Understand the ecological dynamics and the significance of environmental integrity
Y	CO2	Recognize various global and regional environmental concerns that affect the biosphere and analyze the impact of human activities on the environment.
0	CO3	Appreciate the significance of the conservation of native biodiversity.
t	CO4	Scrutinize specific cases of environmental pollution and challenges, and their impacts on ecology.
K1	CO5	Apply knowledge of chemistry, biology, molecular biology and microbiology to arrive at innovative solutions to environment issues and extra-terrestrial habitats.

UNIT I

SYLLABUS

(15 HOURS)

FOREST MANAGEMENT: 1) Forest types in India, identification, 2) Establishment of herbaria and arboreta. 3) Agro forestry systems, Social forestry system, Urban forestry system 4) Joint Forest Management and Water shed management 5) Deforestation and Impacts. 6) Forest Inventory.

UNIT II

II (15 HOURS) REGENERATION OF FOREST: 1) Natural and artificial regeneration of forests. 2) Nursery and planting techniques. 3) Clear felling, Uniform shelter wood selection, coppice and conversion systems. 4) Silviculture management: mangroves, cold desert & plantations. 5) Tree improvement & Seed Technology: Collection, storage, pretreatment and germination, establishment and tendings. 6) Non-Timber Forest Products (NTFP) 7) Wood seasoning and preservation 8) Anatomical structure of wood, defects and abnormalities of wood, timber identification*.

UNIT III

FOREST MENSURATION: 1) Forest management techniques: Methods of measuring diameter, girth, height and volume of trees, - form-factor- volume estimation of stand Sampling methods and sample plots. 2) Yield calculation- 3) forest cover monitoring through remote sensing -3) GIS management and modeling-4) Forest survey-map reading.

UNIT IV

IV (15 HOURS) FOREST WORKING PLAN AND ACTS: 1) Forest Working Plan: Planning, evaluation, monitoring and forest industries. 2) Silvicultural systems – 3) Indian forest Act 1927), 4) Forest Conservation Act (1980); 5) Biodiversity Act 2002, 6) HACA.

UNIT V

(15 HOURS)

SOIL CONSERVATION: 1) Role of Forest in soil Conservation: erosion-reclamation - role of microorganisms, 2) Watershed management, forest hydrology, river channel stabilization, avalanche and landslide control, ground water recharge. 3) Check dam and Percolation pond, 4) Soil Conservation Act 1951.

COURSE OBJECTIVES

- 1. To provide the history and concepts of ethnobiology
- 2. To understand the folk biological classification and nomenclature
- 3. To impart ethics in ethnobotany, ethnozoology, ethnomycology and ethnoecology
- 4. To understand the inherent knowledge on traditional system of herbal medicine

COURSE OUTCOMES

On successful completion of the course, the students will be able to

3	CO1	To learn the history and concepts of ethnobiology
X	CO2	To know indigenous intellectual property and rights
to	CO3	To learn ethnobotany and ethnozoology,
-	CO4	To learn ethnomycology and ethnoecology
K	CO5	To understand the inherent knowledge on traditional system of medicine

SYLLABUS

UNIT I:

Ethnobiology: 1) Overview of a growing field-definition of a field, an interdisciplinary field, local biology as science, ethnobiology spreads out, ethnobiology goes international, traditional ecological knowledge and its sorrows, moving toward more local participation, interfacing with political ecology, ethnobiology as future, History of Ethnobiology: the beginning, ethnobotany, ethnozoology, stages of ethnobiology, stage 1. ethnoecology, stage 2. Traditional ecological knowledge stage 3. Indigenous intellectual property and rights

UNIT II:

Ethics in Ethnobiology: 1) History, International Law and Policy, and Contemporary Issues: Introduction, 2) History of research ethics as related to ethnobiology, International Law and Policy debates and negotiations, key concepts, terms and definitions, 3) United Nations Treaties, (I) Convention on Biological Diversity, (II) World Intellectual Property Organization, International regime on access and benefit sharing, 4) Intergovernmental Committee on Genetic Resources, 5) Traditional knowledge and folklore (IGC), 6) Contemporary issues for ethnobiologists

UNIT III.

Ethnozoology: Definition of Terms and Scope of the field, A brief history of ethnozoological investigations, case studies and theoretical issues, folk biological classification and nomenclature, general principles of classification and nomenclature, "the hunting hypothesis" versus "woman the gatherer", the dietary role of meat in farming societies, the role of animals among pastoralists, conservation, animals are "good to think", animism

(15 HOURS)

(15 HOURS)

UNIT IV.

Ethnobotany: The study of people-plant relationships: introduction, the development of ethnobotany, methods in ethnobotany, classic case studies and their contributions to ethnobotanical praxis, intergenerational research in medical ethnobotany, using paleoethnobotany to understand the past, solving the mystery of a notorious illness: ethnobotany and cycad toxicity*.

UNIT V

Ethnomycology: Fungi and mushrooms in cultural entanglements, subjects of the third kingdom, the beginnings and foundational principles of ethnomycology, methods in ethnomycology, the many rewards of the third hunt, mushrooms in art and material culture, all in one: medicine, poison, and food

Programme	Code: 27	M.Sc. WILDLIFE BIOLOGY			
I	Title of the paper: Major Elective: BIOTECHNOLOGY AND GENETIC ENGINEERING				
Batch 2025-2027Hours / Week 5Total Hours 75Credits 5Employable				Employable	

COURSE OBJECTIVES

- 1. To make aware of the students about the theories, concepts and basics of Biotechnology.
- 2. To provide knowledge about tissue culture.
- 3. To acquire knowledge about molecular methods involved in genetic engineering.

COURSE OUTCOMES

On successful completion of the course, the students will be able to

5	CO1	Understand methodological approach to the study of Biotechnology.
\mathbf{X}	CO2	Identify contamination and understand preservation
•	CO3	Develop an idea, how to arrange sequences of DNA.
tc	CO4	Understand the Recombinant Techniques.
K1	CO5	Attain a basic conceptual knowledge of the principle Mechanisms of the genetic and molecular elements that are involved.
		Weenamisms of the genetic and molecular elements that are involved.

SYLLABUS

UNIT I

(15 HOURS)

TISSUE CULTURE AND MEDIA PREPARATION: 1) Introduction to Animal Tissue Culture: Background, Advantages, Limitations and applications. 2) Culture Environment, Essential Equipment's required for animal tissue culture, 3) Aseptic Technique and general safety. 4) Media: Physicochemical properties, Balanced Salt Solutions, Complete media, serum, Advantage and Disadvantages of serum, free media.

UNIT II

PRESERVATION OF CULTURE: 1) Contamination: Source of contamination, Types of Microbial contamination, Monitoring, Eradication of contamination, Cross-contamination. 2) Cryopreservation: Need of cryopreservation, Apoptosis and its determination: cytotoxicity assays. 3) Application of animal cell culture, Vaccine production, 4) Tissue engineering.

UNIT III

RECOMBINANT TECHNIQUES: 1) In vitro Fertilization and Embryo Transfer: Composition of IVF media, steps involved in IVF, 2) Fertilization by means of micro insemination, PZD, ICSI, SUZI, MESA, stem cell culture, embryonic stem cell and their applications. 3) Ethical issues in animal biotechnology*.

UNIT IV

GENE MANIPULATION: 1) Genomic and cDNA libraries; 2) PCR: Principle and types; 3) Site directed mutagenesis; DNA sequencing, Microarrays – cDNA and protein chips. 4) DNA fingerprinting; SNPs, VNTRs and microsatellites, Molecular

(15 HOURS)

(15 HOURS)

Marker techniques; RFLP, RAPD, STS, SSR, ISSR, SCAR, SSCPAND AFLP. 5) Importance of molecular markers assisted selection.

UNIT V

(15 HOURS)

ENZYMES INVOLVED IN GENETICAL ENGINEERING: 1) Definition of enzyme, enzymology and enzyme technology, nature of the enzymes. 2) Enzymes used in manipulation; 3) Polymerases and types, nucleases, endonucleases, exonucleases and restriction enzymes; ligases; topoisomerases, methylases. 4) Applications of enzymes. 5) Electrophoresis.

Teaching Methods

Programme Code: 27 M.Sc. WILDLIFE BIOLOGY					
	Title of the Paper: Major Elective: WILDLIFE CRIME				
Batch	Batch Hours / Week Total Hours Credits				
2025-2027 5 75 5 Skiil Developmen					

COURSE OBJECTIVES

- 1. To study about the types of wildlife crime like, poaching, illegal wildlife trade, illegal hunting
- 2. To acquire knowledge on the socio-economic factors that contribute to wildlife crime
- 3. To study about the effectiveness of existing laws, policies, and enforcement measures
- 4. To acquire knowledge on the wildlife crime and investigation, intelligence gathering, and organized crime
- 5. To Understand the impact of wildlife crimes, policy and law enforcement agencies

COURSE OUTCOMES

On successful completion of the course, the students will be able to

K1 CO1		Acquire the knowledge of various types of wildlife crimes such as poaching,
		illegal wildlife trade, illegal hunting
	CO2	Learn about how the socioeconomic variables influencing wildlife crime in India
to	CO3	Know the existing laws and policies to conserve the flora and fauna conservation
	CO4	Learn about the concept of wildlife crime, investigation of wildlife crime,
K5	C04	intelligence gathering, investigation of organized wildlife crimes and networks
	CO5	Understand the impact of wildlife crimes and law enforcement agencies

SYLLABUS

(15 HOURS)

Dimensions and consequences of Wildlife Crime: 1) Poaching: Illegal hunting, killing or capturing of wild animals. 2) Illegal wildlife trade: global issue of ivory, tiger parts, leopard parts, rhino horns, 3) Parts of mammal, reptile, amphibian, bird, fish, coral reef, butterfly, molluska, red sander, medicinal plants, ornamental plants.

UNIT II

UNIT I

(15 HOURS)

Effectiveness of Existing laws, policies, and Enforcement Authorities: 1) Wildlife (Protection) Act 1972, 2) Foreign Trade (Development and Regulation) Act, 1992, 3) Customes Act 1962, 4) Indian Forest Act 1927, 5) WCCB, DRI, Convention of International Trade in Endangered Species of Wild Flora and Fauna (CITES)*, 6) MIKE-IUCN, TRAFFIC, 7) Interpol

UNIT III

Socio-Economic Factors that contribute to Wildlife Crime: 1) Socio-economic aspects of wildlife crime issue in India, Criminal activities like, logging, mining, and growing illicit crops. 2) Cultural norms influence wildlife crime like, traditional medicine and animals' parts.

UNIT IV

Wildlife Crime Investigation: 1) Concept of wildlife crime, 2) Collection of information, evidence, intelligence network, search and seizure, 3) Criminal investigation and complaints, investigation of organized crime syndicates and transnational networks.

(15 HOURS)

UNIT V

(15 HOURS)

Wildlife Forensics: 1) Forensic protocols for species identification, molecular markers used in forensics, 2) Species identification: Morphological identification, Molecular identification, 3) Role and functions of WCCB, case studies, 4) Significance of wildlife forensics.

Teaching Methods

NON-MAJOR ELECTIVE PAPERS

- 1. Research Methodology
- 2. Biostatistics, Application of computing & Artificial Intelligence 4.0
- 3. Environmental Science
- 4. Information Security

Programme Code: 27 M.Sc. WILDLIFE BIOLOGY						
	Title of the paper: Non-Major Elective RESEARCH METHODOLOGY					
BatchHours / WeekTotal Hours2025-2027460			Credits 4	Skill Development		

COURSE OBJECTIVES

- 1. To understand about research.
- 2. To acquire the knowledge on thesis writing.
- 3. To learn the methodology about the research work.
- 4. To understand the data interpretation.
- 5. To sensitize the students to study about research.

COURSE OUTCOMES

On successful completion of the course, the students will be able to

3	CO1	Acquire the knowledge on research
X	CO2	Learn significance of writing literature.
to	CO3	Understanding the data interpretation.
1	CO4	Evaluate the results of interpreted data.
К	CO5	Understand the significance of research.

SYLLABUS

UNIT I

(12 HOURS)

BASIC OF RESEARCH: Topic Selection-Planning research-defining objectives-Preparation of work plans. Identification of suitable methodology-Preparation of project proposal-Funding agencies-Student project

UNIT II

(12 HOURS)

COLLECTION OF LITERATURE: Collection of literature - News articles-Newsletters-Journals. Digital library and search of articles - Keywords and search -Internet-Google Scholar-Pubmed- Inflibnet-Medline- Agricola-Science direct -Open access Journals - virtual sources - other sources.

UNIT III

DATA ANALYSIS: Collection of samples/data-Data analysis-Microsoft Office -Construction of tables-headings Footer - hypothesis testing -Test of Significance-Tabulation-Presentation of results. Mean, Median, Mode, range, standard deviation, student 't' test, Correlation, Regression, One-way Anova.

UNIT IV

THESIS STRUCTURE: Thesis structure-Components - Writing Introductionreview of literature-Materials & Methods-Presentation of results - Discussion of Results based on literature-Arrangement of Bibliography and how to quote reference in thesis-Appendix.

(12 HOURS)

(12 HOURS)

UNIT V

(12 HOURS)

PUBLISHING ARTICLES: Publishing of Articles in newspapers/newsletters – Selection of journals–ISSN Number–Peer Reviewed Journals–Science citation index–impact factor and importance. Manuscripts preparation for Journals–components–Submission and Publication*.

COURSE OBJECTIVES

- 1. To understand about research.
- 2. To learn the methodology about the research work.
- 3. To understand the data interpretation.
- 4. To sensitize the students to study about research.

COURSE OUTCOMES

On successful completion of the course, the students will be able to

3	CO1	Acquire the knowledge on research
\mathbf{X}	CO2	Learn significance of data collection
to	CO3	Understanding the data interpretation.
-	CO4	Evaluate the results of interpreted data.
K	CO5	Learn the significance of softwares in research.

Unit 1

(12 HOURS)

DATA COLLECTION AND TABULATION: 1) Primary data collection and secondary data collection. 2) Processing data: classification and tabulation. 3) Organizing of data: individual, discrete and continuous series. 4) Diagrammatic representation of data: line diagram, bar diagram and pie diagram. 5) Graphic representation of data: histogram, frequency polygon, frequency curve and ogive.

Unit: 2

(12 HOURS) MEASURES OF CENTRAL TENDENCIES AND DEVIATIONS: 1) Mean, Median, Mode. 2) Measures of dispersion: range, standard deviation, variance, standard error, Skewness and kurtosis. 3) Correlation: Types and methods of correlation, correlation coefficient. 4) Regression analysis: Regression lines and equations.

Unit:3

TESTING OF HYPOTHESIS: 1) Null and alternative hypothesis – chi square test, student 't' test, F test (ANOVA) with experimental samples (one way & two way). 2) Probability; Basic Principles - apriori and aposteriori probabilities - addition and multiplication rules of probability - conditional probability.

Unit:4

INTRODUCTION TO COMPUTER: 1) Introduction, Advantages of using computer, Generation of computers, Computer codes - BCD code, ASCII code, Functional units of a computer; 2) Types of computers: Desktop, Laptop, palmtop, PDA etc. 3) Definition: Hardware, Software and Firmware, ROM, RAM, CD-ROM, DVD, Pendrive, Hard disc, LCD projector.

(12 HOURS)

(12 HOURS)

Unit 5:

(12 HOURS)

SOFTWARE PROGRAMS AND TOOLS: 1) MS Word processor, MS Excel for Charts, MS PowerPoint and Multimedia. 2) Viruses and Worms, 3) Software packages in Biostatistics: Applications of MINITAB and SPSS. 4) Communication networking and Computer networking*.

Teaching Methods: Smart Class Room/PowerPoint presentation/Seminar/Quiz/Discussion

COURSE OBJECTIVES

- 1. To study about the need of environmental conservation
- 2. To acquire knowledge on the natural resources
- 3. To study about the ecosystem
- 4. To acquire knowledge on the biodiversity
- 5. To Understand the environmental pollution

COURSE OUTCOMES

On successful completion of the course, the students will be able to

2	CO1	Acquire the knowledge of importance of environmental conservation
K.	CO2	Learn about the role of natural resources
to	CO3	Know the importance of ecosystem, forest ecosystem, grassland ecosystem and aquatic ecosystem
1	CO4	Understand about the value of biodiversity, hotspots of biodiversity conservation of biodiversity
\mathbf{N}	CO5	Learn about various types of the environmental pollution

UNIT I

SYLLABUS

(12 HOURS) The Environment – Introduction: 1) Multi-disciplinary nature of environmental studies. 2) Importance of environmental studies and public awareness. 3) Components of environment, atmosphere, hydrosphere, lithosphere. 4) Modification of earth's environment by the biosphere.

UNIT II

(12 HOURS)

Natural Resources: 1) Forest resources, 1) Dams, 2) Water Resources, 3) Food Resources, 4) Energy Resources And 5) Land Resources*.

UNIT III

Ecology: 1) Ecosystem, 2) Biome and ecosystem, 3) Energy flow through ecosystem, 4) Food chain and webs, ecological pyramids, biomagnification, 5) Forest ecosystem, grassland ecosystems and aquatic ecosystems.

UNIT IV

Biodiversity and its Conservation: 1) Introduction, definition, species and ecosystem diversity. 2) Biogeographical classification of India. 3) Biodiversity at global, national and local levels. 4) Hotspots of biodiversity. 5) Threats to biodiversity.

(12 hours)

(12 Hours)

UNIT V

(12 HOURS)

Environmental pollution: 1) Definition, causes, air pollution, water pollution, soil pollution, marine pollution, noise pollution, thermal pollution, nuclear pollution. Role of an individual in prevention of pollution.

Programme Co	ode: 27	M.Sc. WILDLIFE BIOLOGY			
Title of the paper: Non-Major Elective: INFORMATION SECURITY					
Batch	Hours / Week	Total Hours	Credits	Shill Development	
2025-2027	4	60	4	Skill Development	

COURSE OBJECTIVES

- 1. Students will identify the core concepts of Information security.
- 2. To examine the concepts of Information Security.
- 3. To design and implement the security features for IT and Industrial sectors **COURSE OUTCOMES**

On successful completion of the course, the students will be able

3	CO1	To Learn the principles and fundamentals of information security.
Х	CO2	To Demonstrate the knowledge of Information security concepts
to	CO3	To Understand about Information Security Architecture.
1	CO4	To Analyze the various streams of security in IT and Industrial sector.
Κ	CO5	To know about cyber laws and regulations.

SYLLABUS

(12 Hours)

(12 Hours)

UNIT I

Information Security basics: Definition of Information Security - History of Information Security - Characteristics of Information Security - Components of Information Security - Security System Development Life Cycle (SDLC). Information Security for technical administrators: Server Security – Network security- Social Media Security.

UNIT II

Cryptography: Basic concepts - plain text - Cipher text - Encryption Principles - CRYPT Analysis - Cryptographic Algorithms - Cryptographic Tools – Authentication -Biometrics* - passwords - Access Control Devices - Physical Security - Security and Personnel. Language-based Security: Analysis of code for security errors, Safe language and sandboxing techniques.

UNIT III

(12 Hours)

Firewalls, Viruses & Worms & Digital Rights Management: Viruses and Worms-Worms - Digital Rights Management – Firewalls - Application and Circuit Proxies -Stateful Inspection - Design Principles of Firewalls. Logical Design: Access Control Devices- Physical Security-Security and Personnel - NIST Models-VISA International Security Model- Design of Security Architecture-Planning for Continuity.

UNIT IV

Hacking: Introduction – Hacker Hierarchy – Password cracking – Phishing - Network Hacking -Wireless Hacking - Windows Hacking - Web Hacking*- Ethical Hacking. Security Investigation: Need for Security- Business Needs-Threats- Attacks- IP Addressing and Routing - Social Media

(12 Hours)

UNIT V

25PGI4N2 (12 Hours)

Cyber Laws: What is Cyber Law? - Need for Cyber laws - Common Cyber Crimes Applicable Legal Provisions: A Snapshot - Cyber Law (IT Law) in India – The Information Technology Act of India 2000 - Cyber Law and Punishments in India -Cyber Crime Prevention guide to users – Regulatory Authorities.

*Self-study questions for examination may be taken from the self-study portions also.

Teaching Methods:
