DEPARTMENT OF BOTANY

PROGRAMME SPECIFIC OUTCOMES (PSO)

M.SC. BOTANY

For the students admitted
in the Academic Year 2022-2023

PROGRAMME SPECIFIC OUTCOMES (PSO)

PSO1

- ❖ Highest priority is given to morphology, taxonomy, anatomy and embryology to know each and every character of the plant, both external and internal characters for their identification and classification to involve plants further in biochemical and pharmaceutical aspects.

PSO2

- ❖ Students will be able to apply fundamental biostatistics, bioinformatics tools and biophysical principles for the analysis of relevant biological situations and for developing intellectual skills on biological data and databases.

PSO3

- ❖ Students will be able to explicate the ecological interconnections of life on earth by tracing energy and nutrient flows through the environment by the microbial and degradation of the waste. They will be able to relate the physical features of the environment to that of the structure of populations, communities and ecosystem.

PSO4

- ❖ Study on medicinal plants provide firsthand knowledge on local, rare, endangered, endemic and exotic medicinal plants in their original habitats, their therapeutic values acquired through their physiological pathways and their cultivation practices for effective conservation for future use.

PS05

- ❖ Through microbiological core concepts the students were able to inter-relate integral and ubiquitous role of microbes with their environment. In plant pathology, students are expected to recognize plant diseases and their disease management for economically important crop plants.
