Report in Detail:

The Poster presentation, Paper presentation conducted under the DBT Star College Scheme centered on the theme of “Artificial Intelligence” bringing together 316 students from various departments to showcase their perspectives and insights. Each participants crafted visually engaging posters that highlighted scientific concepts, methodologies and innovative approaches, focusing on fostering critical thinking and analytical skills.

The event provided the platform for students to present their ideas and interpretation of scientific topics, encouraging them to communicate complex ideas effectively and engage in discussions with peers and faculty members. Through this programme, students not only demonstrated their understanding of scientific principles but also showcased their presentation and communication abilities, contributing to a culture of scientific inquiry and exploration within the college community.

The Quiz competition tested students knowledge of scientific facts and principles, encouraging active learning and quick thinking.

The Connection, Web designing, Advertisement competitions stimulated creativity and artistic expression, allowing students to visually represent scientific concepts.

These competitions provided a platform for in-depth exploration of scientific topics, enhancing research and thinking skills. These competitions not only engaged students in science education but also developed critical thinking, communication and creative skills, fostering a passion for scientific exploration and innovation. The events were successful in promoting a culture academic excellence and competitive spirit among students.
