

**KONGUNADU ARTS AND SCIENCE COLLEGE**

(AUTONOMOUS)

**COIMBATORE – 641 029**

**DEPARTMENT OF COMPUTER SCIENCE (UG)**

**CURRICULUM AND SCHEME OF EXAMINATIONS (CBCS)**

**(2026 - 2027 onwards)**

## **PROGRAMME OUTCOMES (PO)**

- PO1** Understand the basic concepts, fundamental principles and scientific theories that are needed for higher learning and research.
- PO2** Identify, formulate and analyze the complex situations to arrive acceptable solutions by applying domain specific knowledge, acquired through the programme.
- PO3** Learn moral and ethical values and commit to professional ethics and responsibilities in the associated disciplines. Exercise social concern with the ability to act with awareness of issues in diversified domains to participate in the national development.
- PO4** Ability to design, implement and evaluate a computational system to meet the desired needs within realistic constraints.
- PO5** Realize the need for self and life-long learning to move along with the scientific and technological developments.
- PO6** Ability to communicate and engage effectively with diverse stakeholders.
- PO7** Analyze the impacts of computing on individuals, organizations and society.
- PO8** Acquire skills of observing and drawing logical inferences from the scientific facts.

## **PROGRAMME SPECIFIC OUTCOMES (PSO)**

- PSO1** Impart the core knowledge in the areas such as Software Engineering, Data Communication, Networking and Security, Database Management, Web Technology, Operating System, Artificial Intelligence and other emerging areas in Computer Science.
- PSO2** Provide well trained professionals to industries by enhancing the programming skills and new computing technologies through theoretical and practical knowledge.
- PSO3** Train to solve real world problems by selecting appropriate techniques and best logic.
- PSO4** Enhance the ability to design and develop software applications, to understand the basic concepts of hardware and to comprehend and apply mathematical and accounting principles.
- PSO5** Make use of Computer Science techniques to one's own work as a member or a leader in a team to arrive conclusions and carryout projects.

# **KONGUNADU ARTS AND SCIENCE COLLEGE**

**(AUTONOMOUS)**

**Coimbatore – 641029**

## **Vision:**

- Developing the total personality of every student in a holistic way by adhering to the principles of Swami Vivekananda and Mahatma Gandhi.
- To inculcate Human, Moral and ethical values in the young minds of the students and thereby improving the total personality of the students.

## **Mission:**

- Imparting holistic and man-making education with emphasis on character, culture and value - moral and ethical.
- Designing the curriculum and offering courses that transform its students into value added skilled human resources.
- Constantly updating academic and management practices towards total quality management and promotion of quality in all spheres.
- Extending the best student support services by making them comprehensive and by evolving a curriculum relevant to student community and society at large.
- Taking steps to make education affordable and accessible by extending scholarships to the meritorious and economically disadvantaged students.
- Motivating the teachers in such a way that they become the role models in promoting Higher Education.
- To produce employable graduates to cater the needs of various industries.

CBCS – Choice Based Credit system, CIA– Continuous Internal Assessment, ESE– End of Semester Examinations

\$ For those students who opt NCC under Cocurricular activities will be studying the prescribed syllabi of the UGC which will include Theory, Practical & Camp components. Such students who qualify the prescribed requirements will earn an additional 24 credits.

@ Hindi/Malayalam/ French/ Sanskrit – 26HIN/MLM/FRN/SAN101 - 404

\* - No End-of-Semester Examinations. Only Continuous Internal Assessment (CIA)

\*\* - No Continuous Internal Assessment (CIA). Only End-of-Semester Examinations (ESE)

\*\*\* Project Report – 60 marks; Viva voce – 20 marks; Internal-20 marks

&& 4 hours allotted for project will not be allocated to staff work load.

\*\*\*\* The students shall undergo Internship training / field work for a minimum period of 14 working days at the end of the fourth semester during summer vacation and submit the report in the fifth semester which will be evaluated for 100 marks by the concerned guide and followed by an Internal Viva voce by the respective faculty or HOD as decided by the department. According to their marks, the grades will be awarded as given below.

Marks %	Grade
85 – 100	O
70 – 84	D
60 – 69	A
50 – 59	B
40 – 49	C
< 40	U (Reappear)

## One Credit Self Study Course

**Major Elective Papers (2 papers are to be chosen from the following 6 papers)**

1. Data Mining and Warehousing
2. Computer Network & Security
3. Advanced Robotics and its Applications
4. Natural Language Processing
5. Cloud Computing
6. Computing Intelligence

**Non-Major Elective Papers**

1. Human Rights
2. Women's Rights
3. Consumer Affairs

**Sub. Code & Title of the Extra Departmental Course (EDC) :**

**26USC5XL – WEB DEVELOPMENT LABORATORY**

- Product development through Technology Readiness Levels:
    - Phase 1 Level (TRL 1-3) : Basic research: 1 credits
    - Phase 2 Level (TRL 4 -6) : Development and validation : 2 credits
    - Phase 3 Level (TRL 7-9) : Deployment : 3 credits
  - National / International level paper presentation in conferences and publications of full papers in reputed Scopus/ web of Science indexed journals
    - National Level : 1 credit/ paper
    - International Level : 2 credits/ paper
    - Open access Journals are not included
- Extra credits shall be awarded to students who prefer to opt any course out of their programme on self learning mode. No internal components. 100% ESE.

### Teaching Pedagogy

Smart Classroom/Powerpoint presentation/Seminar/Quiz/Discussion/Flipped Classroom/ Peer Learning/Experimental Learning/Blended learning

### Flipped Classroom

#### Preamble:

- Under flipped classroom model, students review foundational content before class, with class time dedicated to practice, discussion, and problem – solving where the role of the teachers will be facilitating discussions and enabling students to embark on a holistic learning perspectives

#### Work instructions:

- One flipped session / unit is made mandatory and the course In-charge shall identify and specify the topic to be covered in the flipped session in the lesson plan.
- Detailed session plans must be intimated to all students at least one week in advance.
- Curated content such as LORs, video lectures, animations, and other relevant digital content shall be provided to students in advance to facilitate effective preparation for the flipped classroom session.

### Peer Learning

#### Preamble:

- Peer Assisted learning enables students to learn from each other sharing knowledge in a collaborative learning environment.
- Development of leadership skills and student engagement through student-to-student academic support.
- Reduce drop out/failure rates of the students and create a supportive academic culture where a high performing or trained student assists peers academically.

#### Work Instructions:

- Course In-charge shall supervise the programme by periodically reviewing its implementation, conducting review meetings, and monitoring the progress reports.
- Course In-charge shall identify 5 to 6 fast learners based on their academic performance in internal and external examinations.
- Course In-charge shall also identify students who require additional academic support and assign 4 to 5 such students to each fast learner to facilitate peer learning.
- This team will operate remedial classes on a peer learning mode as per the following:
  - a) One session / week / course and each session shall be for 30 minutes in duration, with follow-up learning activities.
  - b) The faculty In-charge shall review attendance records and monitor the academic progress of the students.

### # List of Cocurricular Activities:

1. National Cadet Corps (NCC)
2. National Service Scheme (NSS)
3. Youth Red Cross (YRC)
4. Physical Education (PYE)
5. Eco Club (ECC)
6. Red Ribbon Club (RRC)
7. Women Empowerment Cell (WEC)

### ## List of JOC :

- Microsoft Power BI
- Digital Marketing

**Note:** In core/ allied subjects, no. of papers both theory and practical are included wherever applicable. However, the total credits and marks for core/allied subjects remain the same as stated below.

### Tally Table:

S.No.	Part	Subject	Marks	Credits
1.	I	Language – Tamil/Hindi/Malayalam/ French/ Sanskrit	400	12
2.	II	English	400	12
3.	III	Core – Theory/Practical	1600	60
	III	Allied	400	20
		Electives/Project	300	15
4.	IV	Basic Tamil / Advanced Tamil (OR) Non-major electives	150	4
		Skill Based subject	300	9
		EDC	100	3
		Environmental Studies	50	2
		Value Education	50	2
5.	V	Cocurricular Activities	50	1
		<b>Total</b>	<b>3800</b>	<b>140</b>

- 100 % CIA for Basics of Cyber Security, EDC and Basics of Intellectual Property Right's
- The students should complete **Health and Wellness Programme (26UHW401)###** in the **4<sup>th</sup> semester** and the completion marks should be submitted through the HoD to the Controller of Examinations. Extra credits will be given to the candidates who have successfully completed.
- The students should complete any **MOOC course available for Online learning platforms like SWAYAM, NPTEL, Coursera<sup>ss</sup>, IIT Bombay Spoken Tutorial, e - Pathshala etc.,** before the completion of the **5<sup>th</sup> semester** and the course completion certificate should be submitted through the HoD to the Controller of Examinations. Appropriate credits will be given to the candidates who have successfully completed.

<sup>ss</sup>**Note:** One course to be taken from coursera for all the under graduate students of self finance stream during the even semester of the I year. **Appropriate extra credits@@@** and certification as applicable shall be awarded to the students who have completed the course.

**@@@Note :** Course Duration :

Duration	Extra Credits
< 10 hours	0
> =10 hours and < = 20 hours	1
> 20 hours	2

- An **Onsite Training** preferably relevant to the course may be undertaken as per the discretion of the HoD.
- Extra credits shall be awarded for innovative products/ individual paper presentations and publications in reputed national/ international proceedings and in indexed journals by the UG students for their original research contributions.

## BLOOM'S TAXONOMY BASED ASSESSMENT PATTERN

K1-Remembering;K2-Understanding;K3-Aplying;K4-Analyzing;K5-Evaluating

### 1. ESE Theory Examination:

#### (i) CIA I & II and ESE: 75 Marks

Knowledge Level	Section	Marks	Description	Total
K1 Q1 to 10	A (Answer all)	10 x 1 = 10	MCQ	75
K1 – K5 Q11 to 15	B (Either or pattern)	5 x 5 = 25	Short Answers	
K2 – K5 Q16 to 20	C (Either or pattern)	5 x 8 = 40	Descriptive / Detailed	

#### (ii) CIA I & II and ESE: 55 Marks (Allied)

Knowledge Level	Section	Marks	Description	Total
K1 Q1 to 10	A (Answer all)	10 x 1 = 10	MCQ	55
K2 – K4 Q11 to 15	B (Either or pattern)	5 x 3 = 15	Short Answers	
K2 – K5 Q16 to 20	C (Either or pattern)	5 x 6 = 30	Descriptive / Detailed	

### 2. ESE Practical Examination:

Knowledge Level	Section	Marks	Total
K3	Experiments	50	60
K4		Record Work	
K5			

### 3. ESE Project Viva Voce:

Knowledge Level	Section	Marks	Total
K3	Project Report	60	80
K4		Viva voce	
K5			

### Scheme of Evaluation - Health and Wellness Programme (26UHW401)###

Part	Description	Mark
A	Report	40
B	Attendance	20
C	Activities (Observation during Practice)	40
<b>Total</b>		<b>100</b>

## Blended learning

### Preamble :

- Blended learning integrates traditional in class instruction with digital tools exposing students to a myriad options for learning from subject experts across the globe
- It is provided with online learning sessions on recorded videos, lecture captured sessions (included under guided library hours), digital resources, and guided sessions facilitated by internal faculty members and external experts through Zoom meets etc.,

### Work Instructions:

- For every course, students will be motivated to attend additional webinar/online courses through any interactive learning tools such as, telepresence systems, podcasts, interactive videos etc. with minimum of 2 sessions/course and maximum of 3 sessions/course.

## Components of Continuous Internal Assessment

Components		Marks	Total
<b>Theory</b>			
CIA I	75	(75+75 = 150/10)	25
CIA II	75	15	
Objective Capacity Testing */Seminar		5	
Attendance		5	
<b>Practical</b>			
CIA Practical		25	40
Observation Notebook		10	
Attendance		5	
<b>Project</b>			
Review		15	20
Regularity		5	
<b>Theory (Allied) (External : 55 marks)</b>			
CIA I	55	(55+55)	20
CIA II	55	Converted to 10	
Objective Capacity Testing */Seminar		5	
Attendance		5	
<b>Practical (Allied) (External : 30 marks)</b>			
CIA Practical		10	20
Observation Notebook		5	
Attendance		5	

### \* Objective Capacity Testing:

For the first assessment, questions shall be set from 2 ½ units (25 questions) and evaluation for 5 marks. The assessment shall be conducted through any authentic online platform, one week prior to the commencement of I CIA theory examinations.

For the second assessment, questions shall be set from 2 ½ units (25 questions) and evaluation for 5 marks. The assessment shall be conducted through any authentic online platform, one week prior to the commencement of II CIA theory examinations.

The average of the first and second assessment scores shall be considered for the final **5 marks** allocation.

**KONGUNADU ARTS AND SCIENCE COLLEGE (AUTONOMOUS)  
COIMBATORE - 641029**

**THE MODALITIES FOR THE CONDUCT OF 100% CIA  
EXAMINATIONS**

**PREAMBLE**

As per the recommendations of the Curriculum Development Cell in its meeting held on 27.08.2021, and decision taken in the General Board of Studies meeting held on 16.03.2022, the courses **Cyber Security and Information Security** were introduced in the III semester for all the UG programmes and in the even semester for the PG programme respectively for the students admitted from the academic year 2022-2023 and onwards. Also, it was unanimously decided to conduct 100 % CIA examinations (No End of Semester Examinations) for these courses. The name of the Courses **Cyber Security and Information Security** are renamed as **Basics of Cyber Security and Fundamentals of Information Security** as per the decision taken in the General Board of Studies meeting held on 26.03.2026 for the students to be admitted from the academic year 2026-2027 & onwards. As per the recommendations of the Curriculum Development Cell in its meeting held on 07.03.2022, it was approved in the BOS meeting held on 19.03.2022 to conduct 100% CIA Examinations for the **Extra Departmental Courses** offered in the UG and PG Programmes for the students admitted from the academic year 2022-2023 and onwards. The cited decisions had been approved by the Academic council in its meeting held on 18.04.2022. As per the recommendations of the Curriculum Development Cell in its meeting held on 27.02.2024, and decision taken in the General Board of Studies meeting held on 02.05.2024, the course **Basics of IPR** was introduced in the VI semester for all the UG programmes for the students admitted from the academic year 2024-2025 and onwards and decided to conduct 100 % CIA examinations (NO End of Semester Examinations) for the course.

Hence, the modalities is recommended for the following:

- (i) Conduct of I & II CIA Examinations
- (ii) Question Paper Pattern
- (iii) CIA Examination Mark Breakup
- (iv) Attendance Calculation

### **CONDUCT OF I & II CIA EXAMINATIONS**

1. The CIA Examinations I & II for the above said courses must be conducted along with the other courses under centralized system.
2. The students must appear I & II CIA Examinations compulsorily, since **End of Semester Examinations will NOT be conducted** for the above said courses.
3. If any of the student (s) could not appear for CIA Examinations for the above said courses, with reasons mentioned in the College Calendar, re-examination shall be conducted as per the existing procedures.

### **QUESTION PAPER PATTERN**

The following question paper pattern will be followed for the above said courses:

Section A - Multiple Choice	(10 × 1 = 10 Marks)
Section B - Either or Type	(5 × 5 = 25 Marks)
Section C - Either or Type	(5 × 8 = 40 Marks)

Maximum Marks : 75

Duration : 3 Hours

## ATTENDANCE CALCULATION

1. Separate attendance register must be maintained for **Basics of Cyber Security, Fundamentals of Information Security and Basics of IPR** in the Department and the final consolidated Attendance must be submitted to the COE along with the assessment Marks.
2. The attendance must be calculated by using the following formula:  
$$\text{Attendance percentage} = \frac{\text{Number of Classes attended}}{\text{Number of Classes conducted}} \times 100$$
3. The students should be allowed to write the CIA examinations as per the existing norms related to attendance. The staff in charge of the respective courses have the responsibility to calculate the attendance percentage and submit the same to the Coordinator of the CIA Examination Committee during the I CIA and II CIA Examinations.
4. If the staff in charge finds that students have not put up enough attendance during the I CIA Examinations, he/she shall counsel the student(s) appropriately so that at the end of the course they have sufficient Attendance.

  
**PRINCIPAL**  
Kongunadu Arts & Science College  
Coimbatore - 641 029

### CIA EXAMINATION MARK BREAKUP

The CIA Examination mark breakup for the courses **Basics of Cyber Security, Fundamentals of Information Security and Basics of IPR** is given below:

S.No.	Distribution Component	Marks
1	CIA I – 75 Marks Converted to 30	30
2	CIA II – 75 Marks Converted to 30	30
3	Seminar/Objective Capacity Testing	10
4	Seminar/Objective Capacity Testing	10
5	Attendance	05
6	Any Case Study related to Cyber Security (as a Group)	15
	<b>Total</b>	<b>100</b>

The CIA Examination mark breakup for the **Extra Departmental Courses** offered for UG/PG Programmes is given below:

S.No.	Distribution Component	Marks
1	CIA I – 75 Marks Converted to 40	40
2	CIA II – 75 Marks Converted to 40	40
3	Seminar/Objective Capacity Testing	05
4	Seminar/Objective Capacity Testing	05
5	Attendance	05
6	Others (Group Discussion, Flipped Class room, etc.,)	05
	<b>Total</b>	<b>100</b>

**KONGUNADU ARTS AND SCIENCE COLLEGE (AUTONOMOUS)  
COIMBATORE - 641029**

**THE MODALITIES FOR THE CONDUCT OF 100% CIA PRACTICAL  
EXAMINATIONS (For EDC Courses)**

**CONDUCT OF 100% CIA PRACTICAL EXAMINATIONS**

1. The Students shall appear for **TWO** CIA practical examinations which are evaluated as 100% internal examinations.
2. The students must appear **TWO** CIA practical examinations compulsorily, since End of Semester examinations will NOT be conducted for the above said course.
3. If any of the student(s) could not appear for CIA Examinations, as per reasons mentioned in the College Calendar, re-examination shall be conducted as per the existing procedures and norms.

The CIA Practical Examination mark breakup for the Extra Departmental Courses (EDC) offered for the UG & PG Programme is given below:

S.No.	Component Distribution	Marks
1.	CIA Practical I – 60 marks converted to 30	30
2.	CIA Practical II – 60 marks converted to 30	30
3.	Continuous assessment of practical (Observation to be submitted*) (15 Experiments/Programs x 2 = 30 marks)	30
4.	Record	05
5.	Attendance	05
<b>Total</b>		<b>100</b>

\* In case a student is absent for an Experiment/Program conducted on a particular day, the student will not be allowed to compensate that Experiment/Program and will be awarded zero for that particular Experiment/Program and shall be marked absent. In case any student has an attendance lack; the concerned faculty handling the course in consultation with HoD may permit the student who has an attendance lack to compensate one or two Experiment/Programs as the case may be to enable them to become eligible with mandate of 75% attendance to appear for the Continuous Internal Practical Examinations. However the compensated Experiment/Programs will not be awarded any marks whatsoever.

**PRINCIPAL**

PRINCIPAL  
Kongunadu Arts & Science Col  
Coimbatore - 641 029

**KONGUNADU ARTS AND SCIENCE COLLEGE (AUTONOMOUS)  
COIMBATORE – 641029**

**MODALITIES FOR THE CONDUCT OF OPEN BOOK EXAMINATION  
SYSTEM FOR THE COURSES BASICS OF CYBER SECURITY AND  
FUNDAMENTALS OF INFORMATION SECURITY FOR ALL UG AND  
PG PROGRAMMES RESPECTIVELY**

**PREAMBLE**

The Curriculum Development Cell (CDC) meeting was convened on 16.10.2025 and recommended to implement an open book examination system for the courses, Basics of Cyber Security and Fundamentals Information Security for all UG and PG programmes to improvise conceptual understanding skills, promote deep learning, enhance assessment quality and strengthen comprehensive skills, for the students to be admitted from the academic year 2026-2027 and onwards.

**1.Purpose**

To provide guidelines for conducting open book examinations that encourage critical thinking, application of knowledge, and analytical skills.

**2.Scope**

Applicable to Basics of Cyber Security and Fundamentals of Information Security courses for the undergraduate and postgraduate programmes respectively.

**3. Examination Guidelines**

**Question Paper Design**

- ❖ Questions should be Focused on higher-order thinking (analysis & evaluation)
- ❖ Avoid direct recall questions

**Communication to Students and Staff Members**

- ❖ Inform students in advance about the format, rules, and allowed resources.

- ❖ Provide sample questions to familiarize them with the OBE style.
- ❖ All the Staff members should be familiar about the prescribed Books of the Basics of Cyber Security and Fundamentals of Information Security.
- ❖ Students are permitted to carry the prescribed Books (in original or xerox copy) duly signed by the respective staff in charge of courses to the examination Hall.
- ❖ Invigilators of the respective examination halls should permit the students with the prescribed book (in original or xerox copy) and not to allow the students with other than the prescribed Books.

## QUESTION PAPER PATTERN

Duration : 2 Hours

Knowledge Level	Section	Marks	Description	Total
K1 Q1 to Q6	A (Answer all)	6 x 1 = 6	MCQ	50
K2 - K4 Q7 to Q 10	B (Either or pattern)	4 x 5 = 20	Short Answers	
K2 - K5 Q11 to Q 13	C (Either or pattern)	3 x 8 = 24	Descriptive / Detailed	

## 2. PART III THEORY APPLICABLE COURSE

(CIA : 20 MARKS, ESE : 55 MARKS)

**CIA: 20 Marks**

CIA I	55	(55+55)	20
CIA II	55	Converted to 10	
Objective Capacity Testing /Seminar		5	
Attendance		5	

**ESE : 55 Marks**

## QUESTION PAPER PATTERN

Knowledge Level	Section	Marks	Description	Total
K1 Q1 to 10	A (Answer all)	10 x 1 = 10	MCQ	55
K2 - K4 Q11 to 15	B (Either or pattern)	5 x 3 = 15	Short Answers	
K2 - K5 Q16 to 20	C (Either or pattern)	5 x 6 = 30	Descriptive / Detailed	

**PRINCIPAL**  
PRINCIPAL  
Kongunadu Arts & Science College  
Coimbatore - 641 029

**KONGUNABU ARTS AND SCIENCE COLLEGE (AUTONOMOUS)  
COIMBATORE – 641029**

**MODALITIES FOR THE AWARD OF APPROPRIATE EXTRA CREDIT  
TO THE STUDENTS WHO PREFER TO OPT ANY COURSE OUT OF  
THEIR PROGRAMME ON SELF LEARNING MODE**

**PREAMBLE**

The Curriculum Development Cell (CDC) meeting was convened on 16.10.2025 and recommended to motivate the students to opt any course(s) other than their core programme of study (theory papers only) through self-learning mode and extra credits can be awarded on their successful completion. However, such students availing this option shall not opt for any of the 100% CIA courses. This skill set will broaden intellectual horizons, foster holistic and integrative learning and equip diverse skill sets. This is applicable for the students to be admitted from the academic year 2026-2027 and onwards.

**1. Semester Restriction:**

Students may choose the courses offered only within their current semester. Courses beyond the semester in which they are enrolled shall not be permitted.

**2. Course Type:**

Only **theory courses** may be opted under this provision. Practical courses, Extra Departmental Courses (EDC), and courses assessed entirely through Continuous Internal Assessment (CIA) shall not be eligible.

**3. Evaluation Method:**

A **100% End of Semester Examination (ESE)** shall be conducted for the chosen course.

**4. Marks & Scheme:**

The ESE shall be conducted in accordance with the marks prescribed for the particular course in the approved scheme, along with its corresponding credit allocation.

5. **Conversion of Marks:**

The marks obtained by the student in the ESE shall be converted to a scale of **100 marks** for uniformity.

6. **Award of Credits:**

The credits allotted to the course in the scheme shall be transferred to the student as **Extra Credit**, provided the student secures the prescribed pass mark in the ESE.

**PRINCIPAL**  
Kongunadu Arts & Science College  
Coimbatore - 641 029

Programme Code:09		B.Sc. Computer Science		
Title of the Paper: Core Paper 1 - C Programming				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	5	75	5	

### Course Objectives

1. To gain adequate knowledge on the need of programming languages and problem-solving techniques.
2. To develop an in-depth understanding of functional and logical concepts of C Programming.
3. To get exposure to problem-solving through C programming.

### Course Outcomes (CO)

K1 to K5	CO1	Remember various programming constructs and to develop C programs.
	CO2	Understand the fundamentals of C programming.
	CO3	Apply the right data representation formats based on the requirements of the problem.
	CO4	Analyze the different Operations on arrays, functions, pointers, structures, Unions and files.
	CO5	Evaluate the concepts learnt through implementing and testing of the Programs that are developed.

### Syllabus

#### UNIT I

(15 Hours)

C Language with Ancient IKS - Introduction to C – Overview of Compilers and Interpreters – Structure of C Program – Programming Rules - Character Set – Keywords – Variables – Data types – Type Conversion – Constant and Volatile Variables. Operators and Expressions: Priority of operators – Arithmetic, Relational, Logical, Assignment, Increment / Decrement, Conditional, Bitwise and Special Operators. I/O in C: Formatted, Unformatted, Library Functions.

#### UNIT II

(15 Hours)

Decision Statements: if, if / else, switch, break, continue, goto. Loop Control Statements: Introduction – for, nested for loops - while, do - while statements.

#### UNIT III

(15 Hours)

Arrays: Introduction – Definition –1D, 2D, 3D or Multi-Dimensional Arrays – Strings: Standard Functions – Application of Strings. Pointers: Features – Declaration – Pointer and Arrays – Array of Pointers – Pointers to Pointers – Pointers and Strings –Void Pointers.

#### UNIT IV

(15 Hours)

Functions: Definition- Declaration – Types of Functions – Call by Value – Call by reference – Recursion-Pointer to Function. Storage Class: Automatic, External, Static, Register variables. Structure and Union: Introduction – Declaration and initialization – Union.

**UNIT V****(15 Hours)**

Files: Streams and File Types - Steps for File Operations – File I/O – Other File Function – Command Line Arguments – Application of Command Line Arguments. Programming embedded systems in C: Introduction - What is an embedded system? - \*Which programming language should you use? – Which operating system should you use? – How do you develop Embedded software?

**\*Self-study and questions for examinations may be taken from the self – study portions also.**

M.Sc (SE), MCA, M.Phil, MBA (IT), OCP, Ph.D (CSE),  
Associate Professor & Head,  
Department of Computer Science,  
Kongunadu Arts and Science College,  
Coimbatore - 641 029.

Programme Code:09		B.Sc. Computer Science		
Title of the Paper: <b>Core Practical 1 – C Programming Lab</b>				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	5	75	4	
<b>Course Objectives</b>				
<ol style="list-style-type: none"> <li>1. To understand the field of programming using C language.</li> <li>2. To familiarize the fundamental syntax and semantics of C language.</li> <li>3. To enhance the analyzing and problem-solving skills and use the same for writing programs in C.</li> </ol>				

<b>Course Outcomes (CO)</b>		
K3 to K5	CO1	Develop programming skills using the fundamentals and basics of C Language.
	CO2	Develop programs using the basic elements like control statements, Arrays and Strings.
	CO3	Enable effective usage of arrays, structures, functions and pointers.
	CO4	Implement files and command line arguments.
	CO5	Evaluate the ideas and concepts using testing of the programs.

#### LIST OF PRACTICAL PROBLEMS

1. Write a program to find the sum, average, standard deviation for a given set of numbers.
2. Write a program to generate 'n' prime numbers.
3. Write a program to find the biggest number among a set of numbers.
4. Write a program to arrange a set of numbers in ASCENDING ORDER using BUBBLE SORT.
5. Write a program to merge a set of numbers available in Two Array into a Single Array.
6. Write a program to calculate as in value and compare it with built-in function.  $[x - x^3/3! + x^5/5! \dots]$
7. Write a Recursive function to calculate factorial value which compute nCr value.
8. Write a program to find the number of palindromes in a given sentence.
9. Write a function to perform
  - i. String Copy
  - ii. String Concatenation
  - iii. String Reverse.

10. Write a program to implement LINEAR SEARCH to find a particular name in a list of names.
11. Write functions for following STACK operations
  - i. PUSH
  - ii. POP
  - iii. LISTSTACK
12. Write a generalized program to perform Matrix Addition.
13. Write a program to print the student's mark sheet assuming rollno, name, marks in 5 subjects in a structure. Create an array of structures and print the marksheet in the university pattern.
14. Write a program to display the content of an array using pointers.
15. Write a program which takes a file as command line argument and copy it to another file.

(Mrs. A. Imma Wate)

Programme Code:09	B.Sc. Computer Science			
Title of the Paper: Core Paper 2 - Data Structures using C++				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026-2027	5	75	5	

#### Course Objectives

1. To impart the basic concepts of data structures and algorithms.
2. To acquaint the student with the basics of the various data structures and make the students knowledgeable in the area of data structures.
3. This course also gives insight into the various algorithm design techniques.

#### Course Outcomes (CO)

K1 to K5	CO1	To introduce the concepts of Data structures and to understand simple linear data structures.
	CO2	Learn the basics of stack data structure, its implementation and application.
	CO3	Use the appropriate data structure in context of solution of given problem and demonstrate a familiarity with major data structures.
	CO4	To introduce the basic concepts of algorithms.
	CO5	To give clear idea on algorithmic design paradigms like Dynamic Programming, Back tracking, Branch and Bound.

#### Syllabus

##### UNIT I

(15 Hours)

Beginning with C++: What is C++? – Applications of C++-Structure of C++Program. Tokens, Expressions and Control structures: Token – Keywords –Identifiers and constants – Basic datatypes– User defined datatypes–Derived datatypes– Operators in C++ - Scope resolution operator–Operator overloading–Operator precedence–Control structures.

##### UNIT II

(15 Hours)

Functions in C++: The Main function – Function Prototyping – Call by Reference – Call by value – Inline functions – Function overloading – Friend and virtual functions. Classes and Objects: Specifying a class – Defining member functions - Array of object – Friendly function. Constructor and Destructor: Constructors–Copy constructor–Dynamic constructor– Destructor.

##### UNIT III

(15 Hours)

Operator overloading and type Conversions: Defining operator overloading – Overloading Unary operator - Overloading Binary operators – Type Conversion. Inheritance: Defining derived classes – Single inheritance – Multilevel inheritance–Multiple inheritance – Hierarchical inheritance – Hybrid inheritance. Pointers: Pointers to objects– this pointer-pointer to derived classes–virtual functions.

##### UNIT IV

(15 Hours)

Introduction and Overview: Data structures–Data structure Operations. Arrays, Records and Pointers: Linear arrays–Traversing Linear arrays–Inserting and deleting. Linked list: Linked list– Representation of linked list in memory–Traversing linked list–Searching a linked list – Inserting into a linked list– Deletion from a linked list.

**UNIT V****(15 Hours)**

Stacks, Queues, Recursion: Stacks – Array representation of stacks – linked representation of stacks – Recursion. Queues: Linked representation of Queues – Deques – \*Priority queues. Sorting: Insertion sort–Merge sort –Selection sort – Radix sort.

\*Self-study and questions for examinations may be taken from the self-study portions also.

Title of the Paper:		Core Practical 2- Data Structures using C++ Lab		
Batch	Hours/Week	Total Hours	Credits	Employability/Skill Development
2026 - 2027	5	75	4	

#### Course Objectives

1. To learn the basic concepts of Data Structures.
2. To learn about the concepts of Searching and Sorting.
3. To study about the linear and non-linear Data Structures.
4. To study about the linear and non-linear Data Structures.
5. To learn about the concepts of ADT including List, stack and Queues.

#### Course Outcomes (CO)

K3 to K5	CO1	Analyze the algorithm's/program's efficiency in terms of time and space Complexity.
	CO2	Solve the given problem by identifying the appropriate Data Structure.
	CO3	Solve problems in linear and non-linear Data Structures.
	CO4	Develop programs using various searching methods.
	CO5	Solve the problems using Linked List.

#### LIST OF PRACTICAL PROBLEMS

1. Write a C++ Program to array representation.
2. Write a C++ Program to implement stack and perform push& pop operation.
3. Write a C++ Program to implement queue to insert & delete item.
4. Write a C++ Program to create singly linked list.
5. Write a C++ Program to create doubly linked list.
6. Write a C++ Program to perform circular queue.
7. Write a C++ Program to perform insertion sort.
8. Write a C++ Program to perform merge sort.
9. Write a C++ Program to perform radix sort.
10. Write a C++ Program to perform selection sort.

Programme Code:09		B.Sc. Computer Science		
Title of the Paper: Core Paper 3 - Java Programming				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	4	60	5	
<b>Course Objectives</b>				
<ol style="list-style-type: none"> <li>1. To gain knowledge about basic Java language syntax and semantics to write Java programs and use concepts such as variables, conditional and iterative execution methods etc.</li> <li>2. To understand the fundamentals of object-oriented programming in Java, including managing classes, objects, invoking methods and exception handling mechanisms.</li> <li>3. To know the concepts of inheritance, packages, interfaces and multithreading are introduced.</li> </ol>				

Course Outcomes (CO)		
K1 to K5	CO1	Remember the fundamentals of programming such as variables, conditional statements and iterative execution statements.
	CO2	Understand the concepts of arrays, strings, packages and multithreading.
	CO3	Apply the concepts of applet programming, graphics programming and files.
	CO4	Analyze a software application using the Java programming language
	CO5	Evaluate the concepts learnt through implementing and testing of the programs that are developed.

### Syllabus

#### UNIT I

(12 Hours)

Java Language with Ancient IKS - JAVA Evolution: History–Features–How Java differs from C and C++ - Java and Internet- Java and WWW–Web Browsers. Overview of Java Language: Introduction–Simple Java program– Structure– Java Tokens –Statements-Java virtual Machine.

#### UNIT II

(12 Hours)

Constants – variables – Datatypes – Operators and Expressions. Decision Making and Branching: If, If-else, elseif ladder, Switch, Conditional operator Decision Making and Looping: While, do, for – jumps in loops-labeled loops. Classes, Objects and Methods.

#### UNIT III

(12 Hours)

Arrays, Strings and Vectors - Interfaces: Multiple Inheritance - Packages: Putting classes together – Multi Threaded Programming.

#### UNIT IV

(12 Hours)

Managing Errors and Exceptions – Applet programming – Graphics programming.

**UNIT V****(12 Hours)**

Files: Introduction – concept of streams – Stream classes – \*Using streams – I/O Classes - File class – I/O Exceptions – creation of files-Reading/Writing characters/Bytes - Handling primitive datatypes – Random Access Files.

\*Self-study and questions for examinations may be taken from the self-study portions also.

<b>Course Objectives</b>				
<ol style="list-style-type: none"> <li>To understand the object-oriented programming principles implemented through JAVA programs.</li> <li>To know the event-driven programming methods, including creating and manipulating objects, classes, graphics concepts and applet programming.</li> <li>To design, code, debug and implement JAVA programs.</li> </ol>				

Course Outcomes (CO)		
K3 to K5	CO1	Apply the fundamentals of Java programming language in software development.
	CO2	Examine the basics of Java programming, multi-threaded programs and Exception handling.
	CO3	Analyze and use Java in a variety of applications.
	CO4	Illustrate a software application using the Java programming language.
	CO5	Evaluate the ideas and concepts using testing of the programs.

#### LIST OF PRACTICAL PROGRAMS

- Write a program, which creates and displays a message on the window.
- Write a program to draw several shapes in the created window.
- Write a program to create an applet and draw gridlines.
- Write a java program to create a frame with two buttons called father and mother. When we click the father button the name of the father, his age and designation must appear. When we click mother similar details of mother appear.
- Write a java program to create four text fields for the name, street, city and pin code with suitable labels. Also add a button called my details, when you click the button your name, street, city and pin code must appear in the text fields.
- Write a Java program to create a frame with three text fields for name, age and qualification and a text field of multiple line for address.
- Write a Java program to demonstrate multiple selection list box.
- Write Java program to create a menu bar and pull-down menus.
- Write a Java program to create a window when we press M or m the window displays Good Morning A or a, the window displays Good Afternoon E or e the window displays Good Evening N or n the window displays Good Night.
- Write a program to move different shapes (Circle, Ellipse, Square, Rectangle) according to the arrow key pressed.
- Write a program to draw circle, ellipse, square, rectangle at the mouse click position.

12. Write a program to handle the divide by zero exception.
13. Write a program to create an exception called payout of bounds and throw the exception.
14. Write a program to explain the multithreading with the use of multiplication tables. Three threads must be defined. and each one must create one multiplication table; they are 5 tables, 7 tables and 13 table.
15. Write a program to illustrate thread priority. Create three threads and assign three different priorities.

Title of the Paper: Allied Paper 3 – Advanced Digital Marketing				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	6	90	5	

### Course Objectives

1. To enable the students to Enhance the knowledge in the Digital Marketing
2. To understand the concepts and developments of Digital Marketing
3. To learn the practical aspects of Digital Marketing

### Course Outcomes (CO)

K1 to K5	CO1	Recall the basic concepts related to Digital Marketing
	CO2	Infer the changing marketing landscape in the context of digital marketing
	CO3	Interpret the theoretical framework about Digital Marketing optimization
	CO4	Understand various Marketing Approaches and Tools
	CO5	Analyze the various technological advancement and implications in Digital marketing

### Syllabus

#### UNIT I

(18 Hours)

**Introduction to Digital Marketing:** Introduction - Origin and development of digital marketing – Digital Marketing Strategy - Digital Advertising Market in India - Digital Marketing plan Skills Required in Digital Marketing-Careers in Digital Marketing.

#### UNIT II

(18 Hours)

**Display Advertising:** Concept of Display Advertising -Digital Metrics-Types of Display Ads – Pillars of Paid Marketing Targeting in Digital Marketing. Search Engine Advertising: Introduction – Why Pay for Search Advertising? – Create your First Ad Campaign.

#### UNIT III

(18 Hours)

**Social Media Marketing:** Introduction – Listen – Implementation – Measure – Different forms of Social Entertainment – Gamification. Facebook Marketing: Introduction –Paid Marketing – Other Marketing Tools.

#### UNIT IV

(18 Hours)

**LinkedIn:** Introduction – LinkedIn Algorithm – Linked Strategy – Content Strategy – LinkedIn Analytics. Twitter Marketing: Introduction – Twitter Usage - Twitter for Business – Twitter Ads – Twitter Tools and Tips for Marketers.

## UNIT V

**Mobile Marketing** : Introduction – Mobile Advertising – Mobile Marketing Toolkit – Mobile Marketing Features – Mobile Analytics. Search Engine Optimization: Introduction – Search Engine – Social Media Reach- \***Google Search Engine**.

\*Self-study and questions for examinations may be taken from the self – study portions also.

Kongunadu Arts and Science College,  
Coimbatore - 641 029.

Programme Code:09		B.Sc. Computer Science		
Title of the Paper: <b>Core Paper 4 -.Net Applications</b>				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	4	60	4	
<b>Course Objectives</b>				
<ol style="list-style-type: none"> <li>1. To develop ASP .NET Web application using standard controls.</li> <li>2. To create rich database applications using ADO.NET.</li> <li>3. To implement file handling operations.</li> <li>4. To utilize ASP .NET security features for authenticating the website.</li> <li>5. To handles SQL Server Database using ADO.NET.</li> </ol>				

Course Outcomes (CO)		
K1 to K5	CO1	To identify and understand the goals and objectives of the .NET frame work and ASP .NET with C# language.
	CO2	To develop web application using various controls.
	CO3	To analyze C# programming techniques in developing web applications.
	CO4	To assess a Web application using Microsoft ADO .NET.
	CO5	To develop a software to solve real-world problems using ASP.NET.

### Syllabus

#### UNIT I

(12 Hours)

Overview of .NET framework: Common Language Runtime (CLR), Framework Class Library - C# Fundamentals: Primitive types and Variables– Operators- Conditional statements - Looping Statements – Creating and using Objects–Arrays–String operations.

#### UNIT II

(12 Hours)

Introduction to ASP.NET – IDE - Languages supported Components - Working with Web Forms – Web form standard controls: Properties and its events – HTML controls - List Controls: Properties and its events.

#### UNIT III

(12 Hours)

Rich Controls: Properties and its events – validation controls: Properties and its events – File Stream classes - File Modes – File Share – Reading and Writing to files – Creating, Moving, Copying and Deleting files – File uploading.

#### UNIT IV

(12 Hours)

ADO .NET Overview – Database Connections – Commands – Data Reader – Data Adapter - Data Sets – Data Controls and its Properties - Data Binding.

#### UNIT V

(12 Hours)

Grid View control: Deleting, editing, Sorting and Paging.XML classes–Web form to manipulate XML files - \***Website Security** - Authentication - Authorization – Creating a Web application.

\*Self-study and questions for examinations may be taken from the self-study portions also.

#### Text Book:

1. ASP.Net 4 Unleashed Stephen Walther, Kevin Hoffman, 2010.
2. C# and .Net 8 –Modern cross Platform development, Packt Publishing, 2023.
3. Svetlin Nakov, Veselin Kolev & Co, "Fundamentals of Computer Programming with C#", Faber publication, 2019.
4. Tbuai Thai & Hoang Q.Lam ".Net Framework", Essentials, Third Edition, December 2013.

#### Reference Books:

1. Herbert Schildt, The Complete Reference C# .NET, Tata McGraw-Hill, 2017.
2. Kogent Learning Solutions, C#2012 Programming Covers .NET 4.5 Black Book, Dream tech pres, 2013.
3. Anne Boehm, Joel Murach, Murach's C#2015, Mike Murach & Associates Inc. 2016.

#### E-Learning Resources

1. <https://learn.microsoft.com/en-us/dotnet/>
2. <https://www.geeksforgeeks.org/asp-net-tutorial/>
3. <https://www.tutorialspoint.com/asp.net/index.htm>
4. <https://www.c-sharpcorner.com/technologies/asp-net>

Title of the Paper:		Core Practical 4 -.Net Lab		
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	5	75	4	
<b>Course Objectives</b>				
<ol style="list-style-type: none"> <li>1. To develop ASP .NET Web application using standard controls.</li> <li>2. To create rich database applications using ADO.NET.</li> <li>3. To implement file handling operations.</li> <li>4. To utilize ASP .NET security features for authenticating the website.</li> <li>5. To handles SQL Server Database using ADO .NET.</li> </ol>				

<b>Course Outcomes (CO)</b>		
K3 to K5	CO1	To identify and understand the goals and objectives of the .NET framework and ASP .NET with C# language.
	CO2	To develop web application using various controls.
	CO3	To analyze C# programming techniques in developing web applications.
	CO4	To assess a Web application using Microsoft ADO .NET.
	CO5	To develop a software to solve real-world problems using ASP.NET.

#### LIST OF PRACTICAL PROBLEMS

1. Create an exposure of Web applications and tools
2. Implement the Html Controls
3. Implement the Server Controls
4. Web application using Web controls.
5. Web application using List controls.
6. Web Page design using Rich control. Validate user input using Validation controls. Working with File concepts.
7. Web application using Data Controls.
8. Data binding with Web controls
9. Data binding with Data Controls.
10. Database application to perform insert, update and delete operations.
11. Database application using Data Controls to perform insert, delete, edit, paging and sorting operation.
12. Implement the Xml classes.
13. Implement Authentication–Authorization.
14. Ticket reservation using ASP .NET controls.
15. Online examination using ASP .NET controls.

Department of Computer Science,  
Kongunadu Arts and Science College,  
Coimbatore - 641 029.

Programme Code:09		B.Sc. Computer Science		
Title of the Paper: Allied Paper 4 -Digital Principles and Computer System Architecture				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	5	75	5	
<b>Course Objectives</b>				
<ol style="list-style-type: none"> <li>1. To know the basics of computer hardware and how software interacts with computer hardware.</li> <li>2. To familiarize with different numbering methods like binary, octal, and hexadecimal.</li> <li>3. To understand the concepts of memory hierarchy and compare different methods for computer architecture.</li> </ol>				
<b>Course Outcomes (CO)</b>				
K1 to K5	CO1	Remember basic structure of computer, numbering methods, arithmetic and logical operations performed by computers.		
	CO2	Understand various data transfer techniques in digital computer and control unit operations.		
	CO3	Apply performance issues in processor and memory design of a digital computer various data representation.		
	CO4	Analyze architectures and computational designs and computer Architecture concepts related to design of modern processors, memories and I/Os.		
	CO5	Evaluate the performance of commercially available computers.		

**Syllabus****UNIT I (15 Hours)**

Number Systems and Codes-Binary Number System: Binary to Octal, Decimal, Hexadecimal Conversions – Decimal Number System: Decimal to Binary, Octal, Hexadecimal Conversions –Octal Number System: Octal to Binary, Decimal, Hexadecimal Conversions - Hexadecimal Number System: Hexadecimal to Binary, Octal, Decimal Conversions–ASCII Code–Excess – 3 Code – Gray Code.

**UNIT II (15 Hours)**

Digital Logic: The Basic Gates –AND, OR, NOT–Universal Logic Gates: NAND and NOR – AND-OR-Invert Gates. Combinational Logic Circuits: Boolean Laws and Theorems - Sum-of - Products Method-Truth Table to Karnaugh Map – Pairs, Quads and Octets–Karnaugh Simplification - Don't Care Conditions-Product-of-Sums Method.

**UNIT III (15 Hours)**

Multiplexers – De-multiplexers – 1-of-16 Decoders – BCD-Decimal Decoders - Encoders – Flip-flops: RS Flip-flops- Edge-triggered RS Flip-flops - Edge-triggered D Flip-flops – Edge - triggered JK Flip-flops.

**UNIT IV (15 Hours)**

Central Processing Unit: General Register Organization – Stack Organization – Instruction Formats – Addressing Modes. Input-Output Organization: Peripheral Devices - Input- Output Interface–Asynchronous Data Transfer (strobe control & handshaking) – Priority Interrupt– Direct Memory Access–Input-Output Processor–Serial Communication.

**UNIT V****(15 Hours)**

Memory Organization: Memory Hierarchy – Main Memory – Cache Memory –Virtual Memory.  
Multiprocessors: Characteristics of Multiprocessors- **\*Inter connection Structures.**

**\*Self-study and questions for examinations may be taken from the self-study portions also.**

**Text Book:**

1. Albert Malvino, Donald P. Leach (2018), “**Digital Principles and Applications**”, Eighth Edition, McGraw Hill Company [Unit I, II, III].

Programme Code:09		B.Sc. Computer Science		
Title of the Paper: <b>Core Paper 5 - Software Engineering and Testing</b>				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	6	90	4	
<b>Course Objectives</b>				
<ol style="list-style-type: none"> <li>1. To understand the basic software engineering methods and practices.</li> <li>2. To familiarize the techniques for developing software systems.</li> <li>3. To enrich the knowledge about object-oriented design and software testing approaches.</li> </ol>				

Course Outcomes (CO)		
K1 to K5	CO1	Remember the basic concepts of software engineering
	CO2	Understand the software engineering models in developing software applications.
	CO3	Apply the object-oriented design in various projects
	CO4	Analyze the various software testing approaches
	CO5	Evaluate the Software testing Plan and Reporting.

### Syllabus

#### UNIT I

(18 Hours)

Introduction – The Evolving Role of Software – Software – Software Myths – Software Engineering Technology – Software Process Models – Waterfall model - Incremental process model - Evolutionary process models.

#### UNIT II

(18 Hours)

Requirements Engineering: Requirements engineering tasks – Developing use cases– Negotiating requirements – Validating requirements. Building the Analysis model: Requirement Analysis – Data Modeling Concepts – Flow Oriented Modeling.

#### UNIT III

(18 Hours)

Design Engineering: Design Concepts – Design Model. Creating an Architectural Design: what Is software architecture-Mapping Data Flow into a Software Architecture Quality Management - Quality Concepts– Software Quality Assurance.

#### UNIT IV

(18 Hours)

Testing: Verification and Validation. Types of Testing: White Box Testing - Black Box Testing – Integration Testing and its Types – Scenario Testing – Functional Testing – Non-Functional Testing – Acceptance Testing.

#### UNIT V

(18 Hours)

Performance Testing: Introduction–Factors Governing Performance Testing–Methodology for Performance Testing. Regressing Testing: What is Regression Testing–Types of Regression Testing– Test Planning, \*Execution and Reporting.

\*Self-study and questions for examinations may be taken from the self-study portions also.

Programme Code:09		B.Sc. Computer Science		
Title of the Paper: Core Paper 6 - Operating Systems				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	5	75	3	
<b>Course Objectives</b>				
<ol style="list-style-type: none"> <li>1. To gain knowledge on the basic operating system concepts.</li> <li>2. To attain an in-depth understanding of process concepts, deadlock and memory management.</li> <li>3. To get an exposure to scheduling algorithms, devices and information management.</li> </ol>				

Course Outcomes (CO)		
K1 to K5	CO1	Remember the basic concepts of operating system.
	CO2	Understand the concepts like interrupts, deadlock, memory management and File management.
	CO3	Apply the different algorithms used for representation, scheduling, allocation in DOS and UNIX operating system.
	CO4	Analyze the need for scheduling algorithms.
	CO5	Evaluate the storage management policies with respect to different storage Management techniques.

### Syllabus

#### UNIT I

(15 Hours)

Introduction and Definition of OS - Process Concept: Definition of Process – Process States – Process State Transition – Interrupt Processing – Interrupt Classes-Context Switching Deadlock: Introduction-Deadlock Prevention-Deadlock Avoidance – Deadlock Detection– Deadlock Recovery-Indefinite Postponement.

#### UNIT II

(15 Hours)

Storage Management Real Storage: Real Storage Management Strategies–Contiguous Vs Non-Contiguous Storage Allocation – Single User Contiguous Storage Allocation – Fixed Partition Multiprogramming – Variable Partition Multiprogramming, Multiprogramming with Storage Swapping. Virtual Storage Organization: Evolution and Basic Concepts – Definition of Paging and Segmentation - Virtual Storage Management Strategies- Page Replacement Strategies – Locality.

#### UNIT III

(15 Hours)

Processor Management Job and Processor Scheduling: Preemptive Vs Non-Preemptive Scheduling – Priorities – Deadline Scheduling- FIFO – RR – Quantum Size – SJF - SRT– HRN. Distributed Computing: Classification of Sequential and Parallel Processing – Array Processors – Dataflow Computers - Multiprocessing – Fault Tolerance.

**UNIT IV****(15 Hours)**

Device and Information Management Disk Performance Optimization: Operation of Moving Head Disk Storage – Need for Disk Scheduling - Seek Optimization – FCFS – SSTF – SCAN – RAM Disks – Optical Disks. File and Database Systems: File System – Functions – Organization – Allocating and Freeing Space – File Descriptor – Access Control Matrix.

**UNIT V****(15 Hours)**

Case Studies: Linux: History of Linux–Overview of Linux: Linux Goals–Interfaces to Linux – The Shell – Linux Utility Programs – Kernel Structure – Processes: Fundamental Concepts - Memory Management: Fundamental Concepts - File System: Fundamental Concepts - Security: Fundamental Concepts. Windows Vista: History – System Structure: The Kernel Layer - Processes and Threads: Fundamental Concepts - Caching in Windows Vista – Security: **\*Fundamental Concepts.**

**\*Self-study and questions for examinations may be taken from the self-study portions also.**

Kongunadu Arts and Science College,  
Coimbatore - 641 029.

Programme Code:09		B.Sc. Computer Science		
Title of the Paper: Core Paper 7- Relational Database Management System				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	5	75	4	

#### Course Objectives

1. To understand the different issues involved in the design of a database system.
2. To know the essential DBMS concepts such as: database security, integrity and normalization.
3. To design and build a simple database system and demonstrate competence with the fundamental tasks involved with modeling and designing a DBMS.

#### Course Outcomes (CO)

KI to K5	CO1	Remembered at a independence, data models for database systems, Database schema and database instances.
	CO2	Understand and use data manipulation language to query and manage a database.
	CO3	Analyze and design a real database application.
	CO4	Apply normalization concepts for designing a good database with integrity constraints.
	CO5	Evaluate the principles behind systematic database design approaches by Covering conceptual design, logical design through normalization.

#### Syllabus

##### UNIT I

(15 Hours)

Introduction: Purpose of Database Systems - View of Data - Data Models – Database Languages - Transaction Management - Storage Management Database Administrator - Database Users–Overall System Structure. Entity Relationship Model: Basic concepts - Keys - Entity Relationship Diagram, Weak Entity sets, Extended E-R Features: Specialization, generalization.

##### UNIT II

(15 Hours)

Relational Model: Relational Algebra - Views. SQL: Background- Basic Structure - Set Operations - Aggregate Functions- Null values - Derived Relations - Views - Modification of the Database - Joined Relations - Data Definition Language.

##### UNIT III

(15 Hours)

Integrity Constraints: Domain Constraints - Referential Integrity – Assertions - Triggers. Functional Dependencies - Relational Database Design: Pitfalls - Decomposition - Normalization using Functional Dependencies.

##### UNIT IV

(15 Hours)

Object Oriented Databases: New Database Applications - Object Oriented Data Model - Object Oriented Languages - Persistent Programming Languages. Database System Architecture: Centralized Systems - Client / Server Systems - Parallel Systems - Distributed Systems - Network Types.

**UNIT V****(15 Hours)**

New Applications: Decision Support Systems - Data Analysis-Data Mining - Data Warehousing - Spatial and Geographic Databases - Multimedia Databases - \***Mobility and Personal Databases** – Information - Retrieval Systems - Distributed Information Systems.

**\*Self-study and questions for examinations may be taken from the self-study portions also.**

Title of the Paper: Core Practical 5-Relational Database Management System Lab				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	6	90	2	

#### Course Objectives

1. To learn and understand DDL&DML
2. To learn and understand DCL.
3. To implement Basic SQL commands.
4. To execute PL/SQL programs.
5. To develop GUI applications in any platform.

#### Course Outcomes (CO)

K3 to K5	CO1	Implement DDL and DML commands.
	CO2	Implement DCL commands.
	CO3	Analyze PL/SQL programs
	CO4	Understand PL/SQL programs.
	CO5	Develop GUI applications in their known platform.

#### LIST OF PRACTICAL PROBLEMS

1. Create Table using Data Definition Language (DDL).
2. Modify Table using Data Manipulation Language (DML).
3. Store and Retrieve data through Data Control Language (DCL).
4. Implement Constraints and Built-in functions in various tables.
5. Perform Joins and Group-by functions.
6. Implement Simple Programs in PL/SQL.
7. Create PL/SQL programs using functions.
8. Create PL/SQL programs using Cursor.
9. Create PL/SQL programs using triggers.
10. Developing GUI applications.
  - a. Student Information System.
  - b. Inventory Management.
  - c. Payroll Processing

Programme Code:09	B.Sc. Computer Science			
Title of the Paper		Core Paper 8 - Virtual and Augmented Reality		
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	4	60	3	

### Course Objectives

1. To enable the students to Enhance the knowledge in the Virtual Reality
2. To understand the concepts and Techniques of Augmented reality
3. To learn the practical aspects of Virtual Reality Application

### Course Outcomes (CO)

K1 to K5	CO1	Describe the concept of virtual reality and Communication Media
	CO2	Understand current virtual reality hardware and software
	CO3	Understand various modeling approaches
	CO4	Illustrate the concepts of Human Factors and Applications of VR
	CO5	Build a Virtual Reality Application

### Syllabus

#### UNIT I

(12 Hours)

**Introduction to Virtual Reality (VR):** Defining Virtual Reality - The Three I's of Virtual Reality - A Short History of Early Virtual Reality - VR Technology - VR Becomes an Industry - The Five Classic components of a VR System.

#### UNIT II

(12 Hours)

**Input Devices: (Trackers, Navigation, and Gesture Interfaces):** Three - Dimensional Position Trackers - Navigation and Manipulation Interfaces - Gesture interfaces. **Output Devices:** Graphics Displays - Sound Displays & Haptic feedback.

#### UNIT III

(12 Hours)

**Modeling:** Geometric modeling - Kinematics Modeling, Physical Modeling, Behavior Modeling, Model management. **Human Factors in VR :** VR Health and Safety Issues – VR and Society.

#### UNIT IV

(12 Hours)

**Augmented Reality (AR):** Taxonomy, Technology and Features of Augmented Reality - AR Vs VR, Challenges with AR - AR systems and functionality - Augmented Reality Methods - Visualization Techniques for Augmented Reality- Enhancing interactivity in AR Environments. AR software Development: AR software - Camera parameters and camera calibration – Marker - based augmented reality - AR Toolkit.

#### UNIT V

(12 Hours)

**Interaction & Audio:** Interaction - Motor Programs and Remapping – Locomotion - Manipulation, Social Interaction. Audio - The Physics of Sound- The Physiology of Human Hearing, Auditory Perception, Auditory Rendering. Interaction - Motor Programs and Remapping, Locomotion – Manipulation - Social Interaction. Audio - The Physics of Sound - \* **The Physiology of Human Hearing** - Auditory Perception - Auditory Rendering.

**\*Self-study and questions for examinations may be taken from the self-study portions also.**

**Dr. R. Saravana Moorthy**  
 M.Sc (SE), MCA, M.Phil, MBA (IT), OCP, Ph.D (CSE),  
 Associate Professor & Head,  
 Department of Computer Science,  
 Kongunadu Arts and Science College,  
 Coimbatore - 641 029.

Programme Code:09		B.Sc. Computer Science		
Title of the Paper: Core Paper 9 - Python Programming and IoT				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	5	75	3	

#### Course Objectives

1. To understand the fundamentals of Python Programming and IOT
2. To get exposure to Programming Raspberry Pi with Python.
3. To acquire knowledge about IOT Enabling Technologies.

#### Course Outcomes (CO)

K1 to K5	CO1	Remember the concept of operators, datatypes, looping statements in python programming.
	CO2	Understand the concepts of Input / Output operations in file.
	CO3	Apply the various protocols for IOT.
	CO4	Analyze the applications of IOT in Realtime scenario.
	CO5	Evaluate the concept of Python's web Application.

#### Syllabus

##### UNIT I (15 Hours)

Python with Ancient IKS - Python: Introduction - Standard Data Types – Operators - Statement and expressions – String operations – Control statements- Iteration -While statement- Built-in functions- Composition of functions-User defined functions-Parameters and Arguments-Function calls-The return statement-Python recursive function -List.

##### UNIT II (15 Hours)

Tuples- Dictionaries -Classes and Objects: Overview of OOP. Directories: mkdir(), chdir(). Exception – Modules–Packages-File Handling. Python Packages of Interest for IOT.

##### UNIT III (15 Hours)

IoT with Ancient IKS - Introduction to Internet of Things: Physical Design of IOT - Things in IOT - IOT Protocols - Logical Design of IOT – IOT Functional blocks - IOT Communication models - IOT Communication APIs - IOT Enabling Technologies, IOT Levels. Domain Specific IOTs: Home Automation, Cities, Environment, Energy, Retail, Logistics, Agriculture, Industry, Health & Life Style.

##### UNIT IV (15 Hours)

IOT and M2M: M2M - Difference between IOT and M2M - SDN and NFV for IOT. IOT System Management with NETCONF- YANG: Need for IOT Systems Management-Simple Network Management Protocol (SNMP)-Network Operator Requirements, NETCONF, YANG, IOT Systems management with NETCONF-YANG.

##### UNIT V (15 Hours)

IOT Physical Devices & Endpoints: Basic Building Blocks of an IOT Device - IOT Physical servers and cloud offerings: Introduction to cloud storage Models and communication APIs - \*WAMP Auto bahn for IOT.

\*Self-study and questions for examinations may be taken from the self-study portions also.

Programme Code:09		B.Sc. Computer Science		
Title of the Paper: Core Paper 10 – Artificial Intelligence and Machine Learning				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	5	75	4	
<b>Course Objectives</b>				
<ol style="list-style-type: none"> <li>1. To understand the basic concept of AI&amp; ML.</li> <li>2. To understand strength and weakness of problem solving and search algorithms.</li> <li>3. To know about basic concepts of knowledge, and reasoning, Machine Learning.</li> <li>4. To optimize the different linear methods of regression and classification.</li> <li>5. To interpret the different supervised classification methods of support vector machine and tree-based models.</li> </ol>				

Course Outcomes (CO)		
K1 to K5	CO1	Evaluate Artificial Intelligence (AI) methods and describe their foundations.
	CO2	Analyze and illustrate how search algorithms play vital role in problem solving, inference, perception, knowledge representation and learning
	CO3	Fundamentals of knowledge representation, building of simple knowledge-based Systems and to apply knowledge representation.
	CO4	To introduce the basic concepts and techniques of machine learning and the need for Machine learning techniques for real world problem
	CO5	To provide understanding of various Machine learning algorithms and the way to Evaluate the performance of ML algorithms.

### Syllabus

#### UNIT I (15 Hours)

Foundation and History of AI, Overview of AI problems, Evolution of AI - Applications of AI, Classification Types of AI. Artificial Intelligence vs Machine learning. Intelligent Agent: Types of AI Agent, Concept of Rationality, nature of environment, structure of agents. Turing Test in AI.

#### UNIT II (15 Hours)

Constructing Search Trees, Stochastic Search, AO Search Implementation, Minimax Search,ss Alpha- Beta Pruning Basic Knowledge Representation and Reasoning: Propositional Logic, First - Order Logic, Forward Chaining and Backward Chaining, Introduction to Probabilistic Reasoning, Bayes Theorem.

#### UNIT III (15 Hours)

Introduction to Machine Learning: History of ML Examples of Machine Learning Applications, Learning Types, ML Lifecycle, AI & ML, dataset for ML, Data Pre-processing, Training versus Testing, Positive and Negative Class, Cross-validation.

**UNIT IV****(15 Hours)**

Types of Learning: Supervised, Unsupervised and Semi-Supervised Learning. Supervised: Learning a Class from Examples, Types of supervised Machine learning Algorithms - Unsupervised: Types of Unsupervised Learning Algorithm, Dimensionality Reduction: Introduction to Dimensionality Reduction, Subset Selection, and Introduction to Principal Component Analysis.

**UNIT V****(15 Hours)**

Supervised Learning: Regression: Linear Regression, Polynomial Regression, logistic regression, Non-linear Regression, Model evaluation methods. Classification–support vector machines (SVM), Naïve Bayes classification. Unsupervised learning: Nearest neighbor models - K-means - clustering around medoids - silhouettes–hierarchical clustering - k-d trees, \***Clustering trees**.

\*Self-study and questions for examinations may be taken from the self-study portions also.

 Kongunadu Arts and Science College,  
 Coimbatore - 641 029.

Programme Code:09		B.Sc. Computer Science		
Title of the Paper: Core Practical 6 – Python Programming and IoT Lab				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	5	75	3	
<b>Course Objectives</b>				
<ol style="list-style-type: none"> <li>To gain knowledge on the concepts of python programming.</li> <li>To design IoT applications in different domains and be able to analyze their performance.</li> <li>To know the various hardware and sensing technologies to build IoT applications.</li> </ol>				
<b>Course Outcomes (CO)</b>				
K3 to K5	CO1	Apply the basic concepts of python programming with IOT.		
	CO2	Examine the IOT Enabling Technologies and Domain Specific IOTs.		
	CO3	Analyze Programming Raspberry Pi with Python.		
	CO4	Illustrate the Python Packages for IOT.		
	CO5	Evaluate the ideas and concepts using Python with IOT.		
<b>LIST OF PRACTICAL PROBLEMS</b>				

- Write a python program that displays the following information: Your name, Full address Mobile number, College name, Course subject.
- Write a python program to find the largest three integers using if-else and conditional operator.
- Write recursive functions for Fibonacci sequence up to given number.
- Write a python program that writes a series of random numbers to a file from 1 to n and display.
- (i) Write a Python program for Switching LED on/off Using any micro controller. (ii) Write a Python program for blinking LED.
- Write a python program on using any microcontroller to publish temperature data to MQTT broker.
- Write a program to send sensor data to Smartphone using Bluetooth with any microcontroller.
- Write a Python program for sending an E-mail on switch press with any micro controller.
- To interface LED and Switch with any microcontroller and write a python program to control an LED with as switch.
- Write a python program to create TCP server on any microcontroller and respond with humidity data to TCP client when requested.

11. To interface motor using relay with any microcontroller and write a program to turn ON motor when push button is pressed.
12. Write a Python program for implementation of the intrusion detection service that runs on any microcontroller.
13. Write a Python program for implementation of the Smart Parking service that runs on any micro controller.
14. Write a Python program for weather reporting both that tweets weather updates to twitter.
15. Write a Python program for Analyzing Light Intensity.

Title of the Paper: Project Work and Viva-Voce				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	4	60	5	

### Course Objectives

1. To understand and select the task-based core skills.
2. To get knowledge about analytical skill for solving the selected task.
3. To get confidence for implementing the task and solving the real time problems.

### Course Outcomes (CO)

K3 to K5	CO1	Apply the domain specific knowledge and define the project.
	CO2	Analyze the achievable goals and choose the right software for project development
	CO3	Estimate the resources and create the project schedule
	CO4	Test the deliverables
	CO5	Evaluate the project results.

Students have an individual project in the sixth semester of the course program. The students choose the interested area of specialization namely IoT, Web development and applications etc., and do their research on it. Students gain knowledge and viva-voce is conducted at the end of the semester.

### MARK DISTRIBUTION:

	Marks
Project Report*	60
Viva-Voce*	20
Internal	20

\*Both Internal & External Examiners shall evaluate Project & Viva-Voce jointly.

(Dr. R. SARAVANAMOORTHY)

Programme Code:09		B.Sc. Computer Science		
Title of the Paper Major Elective - Data Mining and Warehousing				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	5	75	5	

### Course Objectives

1. To provide the knowledge on Data Mining and Warehousing concepts and techniques.
2. To study the basic concepts of cluster analysis.
3. To study a set of typical clustering methodologies, algorithms, and applications.

### Course Outcomes (CO)

KI to K5	CO1	To understand the basic concepts and the functionality of the various data Mining and data warehousing component
	CO2	To know the concepts of Data mining system architectures.
	CO3	To analyze the principles of association rules.
	CO4	To get analytical idea on Classification and prediction methods.
	CO5	To Gain knowledge on Cluster analysis and its methods.

### Syllabus

#### UNIT I

(15 Hours)

Introduction: Datamining – Functionalities – Classification – Introduction to Data Warehousing– Data Preprocessing: Preprocessing the Data – Data cleaning – Data Integration and Transformation – Data Reduction.

#### UNIT II

(15 Hours)

Data Mining, Primitives, Languages and System Architecture: Data Mining– Primitives–Data Mining Query Language, Architecture of Datamining Systems. Concept Description, Characterization and Comparison: Concept Description, Data Generalization and Summarization, Analytical Characterization, Mining Class Comparison– Statistical Measures.

#### UNIT III

(15 Hours)

Mining Association Rules: Basic Concepts – Single Dimensional Boolean Association Rules from Transaction Databases, Multilevel Association Rules from transaction databases – Multidimension Association Rules from Relational Database and Data Warehouses.

#### UNIT IV

(15 Hours)

Classification and Prediction: Introduction – Issues – Decision Tree Induction – Bayesian Classification of Back Propagation. Classification based on Concepts from Association Rule Mining – Other Methods. Prediction – Introduction – Classifier Accuracy.

#### UNIT V

(15 Hours)

Cluster Analysis: Introduction–Types of Data in Cluster Analysis, Partitioning Methods – Hierarchical Methods - Density Based Methods – \*GRID Based Method – Model based Clustering Method.

\*Self-study and questions for examinations may be taken from the self-study portions also.

Programme Code:09		B.Sc. Computer Science		
Title of the Paper : Major Elective- Computer Network & Security				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	5	75	5	

### Course Objectives

1. To study the number theory used for network security.
2. To understand the design concept of cryptography and authentication.
3. To develop experiments on algorithm used for security.

### Course Outcomes (CO)

K1 to K5	CO1	To Understand the basics of Computer Network architecture, OSI and TCP/IP Reference models.
	CO2	To gain knowledge on Telephone systems and Satellite communications.
	CO3	To understand the basic concepts and the functionality of the various network Security attacks, services.
	CO4	To know the concepts of network security.
	CO5	To analyze the principles of Public key cryptography and RSA.

### Syllabus

#### UNIT I

(15 Hours)

Introduction–Network Hardware–Software–Reference Models–OSI and TCP/IP Models – Example Networks:Internet, ATM, Ethernet and Wireless LANs-Physical Layer– Theoretical Basis for Data Communication-Guided Transmission Media.

#### UNIT II

(15 Hours)

Wireless Transmission- Communication Satellites–Telephone System: Structure, Local Loop, Trunks and Multiplexing and Switching. Data Link Layer: Design Issues– Error Detection and Correction.

#### UNIT III

(15 Hours)

Model of network security– Security attacks, services and attacks– OSI security architecture - Classical encryption techniques – SDES – Block cipher Principles DES – Strength of DES – Block cipher design principles – Block cipher mode of operation – Evaluation criteria for AES - RC4 – Differential and linear cryptanalysis – Placement of encryption function – traffic confidentiality.

#### UNIT IV

(15 Hours)

Number Theory – Prime number – Modular arithmetic – Euclid's algorithm - Fermet's and Euler's theorem – Primality – Chinese remainder theorem – Discrete logarithm – Public key cryptography and RSA–Key distribution – Key management – Diffie Hellman key exchange – Elliptic curve cryptography.

#### UNIT V

(15 Hours)

Authentication requirement–Authentication function–MAC–Hash function– Security of hash function and MAC – SHA - HMAC – CMAC - \*Digital signature and authentication protocols – DSS.

\*Self-study and questions for examinations may be taken from the self- study portions also.

Programme Code:09		B.Sc. Computer Science		
Title of the Paper:		Major Elective - Advanced Robotics and its Applications		
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	5	75	5	

### Course Objectives

1. To make the students familiar with the various drive systems of robots, sensors and their applications in robots.
2. To introduce the parts of robots, basic working concepts and types of robots.

### Course Outcomes (CO)

K1 to K5	CO1	Describe the different physical forms of robot architectures.
	CO2	Kinematically model simple manipulator and mobile robots.
	CO3	Mathematically describe a kinematic robot system.
	CO4	Analyze manipulation and navigation problems using knowledge of Coordinate frames, kinematics, optimization, control, and uncertainty.
	CO5	Program robotics algorithms related to kinematics, control, optimization, and uncertainty.

### Syllabus

#### UNIT I

(15 Hours)

Introduction: Introduction, brief history, components of robotics, classification, workspace, work-envelop, motion of robotic arm, end-effectors and its types, service robot and its application, Artificial Intelligence in Robotics.

#### UNIT II

(15 Hours)

Actuators and sensors: Types of actuators, stepper- DC- servo- and brush less motors-model of a DC servo motor- types of transmissions- purpose of sensor-internal and external sensor-common sensors-encoders tachometers-strain gauge based force torque sensor-proximity and distance measuring sensors-Kinematics of robots: Representation of joints and frames, frames transformation, homogeneous matrix, D-H matrix, Forward and inverse kinematics: two link planar(RR) and spherical robot(RRP). Mobile robot Kinematics: Differential wheel mobile robot.

#### UNIT III

(15 Hours)

Localization: Self-localizations and mapping-Challenges in localizations– IR based localizations – vision based localizations – Ultrasonic based localizations - GPS localization systems.

#### UNIT IV

(15 Hours)

Path Planning: Introduction, path planning-overview-road map path planning-cell decomposition path planning potential field path planning-obstacle avoidance-case studies Vision system: Robotic vision systems-image representation-object recognition-and categorization-depth measurement-image data compression-visual inspection-software considerations.

**UNIT V****(15 Hours)**

Application: Ariel robots-collision avoidance robots for agriculture- mining-exploration-underwater-civilian-and military applications -nuclear applications -space applications- Industrial robots-artificial intelligence in robots- **\*application of robots in material handling-** Continuous arc welding-spot welding - spray painting-assembly operation - cleaning-etc.

\*Self-study and questions for examinations may be taken from the self-study portions also.

Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	5	75	5	

### Course Objectives

1. To Introduce to some of the problems and solutions of NLP and their relation to linguistics and statistics
2. To understand the various facets of modeling Techniques

### Course Outcomes (CO)

K1 to K5	CO1	To understand linguistic phenomena and learn to model them with formal grammars.
	CO2	To understand and carry out proper experimental methodology for training and evaluating empirical NLP systems.
	CO3	To learn how to manipulate probabilities, construct statistical models over string sand trees
	CO4	To learn how to manipulate probabilities, construct statistical models over string sand trees
	CO5	To design, implement, and analyze NLP algorithms

### Syllabus

#### UNIT I

(15 Hours)

Natural Language processing (NLP) : Introduction, Applications or Use cases of NLP, Components of NLP, Steps in NLP, Finding the Structure of Words: Words and Their Components, Lexemes, Morphemes, Morphology, Problems in morphological processing, Typology, Morphological Typology, Natural Language Processing with python NLTK package (Text Preprocessing Tasks): Word Tokenization, Sentence Tokenization, Filtering Stop words, Stemming, Tagging Parts of Speech, Lemmatization, Chunking, Chinking, Named Entity Recognition, Term Frequency and Inverse Document Frequency (TF-IDF).

#### UNIT II

(15 Hours)

Syntax Analysis: Parsing Natural Language, Tree banks: A Data-Driven Approach to Syntax, Representation of Syntactic Structure: Syntax Analysis using Dependency Graph, Syntax Analysis using Phrase Structure Trees, Parsing Algorithms: Shift Reduce Parsing, Hyper Graphs and Chart Parsing (CYK Parsing), Models for ambiguity Resolution in Parsing: Probabilistic Context Free Grammar, Generative Models, Discriminative models for Parsing

#### UNIT III

(15 Hours)

Language Modeling: Introduction, N-Gram Models, Language Model Evaluation, Parameter Estimation, Language Model Adaptation, Types of Language Models, Language-Specific Modeling Problems.ing: Probabilistic Context Free Grammar, Generative Models, Discriminative models for Parsing.

#### UNIT IV

(15 Hours)

Semantic Parsing: Introduction, Semantic Interpretation, System Paradigms, Word Sense Systems, Software.

#### UNIT V

(15 Hours)

Predicate-Argument Structure, Meaning Representation Systems, Software. Discourse Processing: Cohesion, Reference Resolution, \*Discourse Cohesion and Structure.

\*Self-study and questions for examinations may be taken from the self-study portions also.

### Text Book:

1. Multilingual natural Language Processing Applications: From Theory to Practice–Daniel M.Bikel and Imed Zitouni, Pearson Publication.
2. Speech and Natural Language Processing-Daniel Jurafsky & James H Martin, Pearson Publications

 M.Sc (SE), MCA, M.Phil, MBA (IT), OCP, Ph.D (CSE),  
 Associate Professor & Head,  
 Department of Computer Science,  
 Kongunadu Arts and Science College,  
 Coimbatore - 641 029.

Programme Code:09	<b>B.Sc. Computer Science</b>			
Title of the Paper:	<b>Major Elective - Cloud Computing</b>			
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
<b>2026-2027</b>	<b>5</b>	<b>75</b>	<b>5</b>	

### Course Objectives

1. To impart fundamental concepts of Cloud Computing.
2. To impart a working knowledge of the various cloud service types and their uses and pitfalls.
3. To enable the students to know the common features and differences in the service offerings of the three major Cloud Computing service providers, namely Amazon, Microsoft and Google.
4. To provide know-how of the various aspects of application design, benchmarking and security on the Cloud.

### Course Outcomes (CO)

KI to K5	CO1	To understand the concepts and technologies involved in Cloud Computing.
	CO2	To understand the concepts of various cloud services and their implementation in the Amazon, Microsoft and Google cloud computing platforms.
	CO3	To understand the aspects of application design for the Cloud.
	CO4	To understand the concepts involved in benchmarking and security on the Cloud.
	CO5	To understand the way in which the cloud issued in various domains.

### Syllabus

#### UNIT I

(15 Hours)

**Introduction to Cloud Computing:** Definition of Cloud Computing–Characteristics of Cloud Computing– Cloud Models–Cloud Service Examples–Cloud-based Services and Applications - **Cloud Concepts and Technologies:** Virtualization–Load balancing – Scalability and Elasticity – Deployment–Replication–Monitoring – Software Defined Networking – Network Function Virtualization – MapReduce–Identity and Access Management–Service Level Agreements – Billing.

#### UNIT II

(15 Hours)

**Cloud Services :** Compute Services: Amazon Elastic Computer Cloud - Google Compute Engine - Windows Azure Virtual Machines. Storage Services: Amazon Simple Storage Service- Google Cloud Storage - Windows Azure Storage - **Database Services:** Amazon Relational Data Store - Amazon Dynamo DB - Google Cloud SQL - Google Cloud Data Store – Windows Azure SQL Database - Windows Azure Table Service - **Application Services:** Application Runtimes and Frameworks – Queuing Services – Email Services – Notification Services Media Services- **Content Delivery Services:** Amazon Cloud Front- Windows Azure Content Delivery Network.

**UNIT III****(15 Hours)**

Cloud Application Design: Introduction – Design Consideration for Cloud Applications – Scalability – Reliability and Availability – Security – Maintenance and Upgradation – Performance Reference Architectures for Cloud Applications – Cloud Application Design Methodologies: Service Oriented Architecture (SOA), Cloud Component Model, IaaS, PaaS and SaaS Services for Cloud Applications, Model View Controller (MVC), REST full Web Services – Data Storage Approaches: Relational Approach (SQL), Non-Relational Approach (NoSQL).

**UNIT IV****(15 Hours)**

**Cloud Application Benchmarking and Tuning:** Introduction to Benchmarking – Steps in Benchmarking–Workload Characteristics–Application Performance Metrics–Design Consideration for Benchmarking Methodology – Benchmarking Tools and Types of Tests – Deployment Prototyping- **Cloud Security:** Introduction–CSA Cloud Security Architecture – Authentication (SSO)–Authorization–Identity and Access Management – **Data Security:** Securing data at rest, securing data in motion–Key Management–Auditing.

**UNIT V****(15 Hours)**

**Case Studies:** Cloud Computing for Healthcare–Cloud Computing for Energy Systems - Cloud Computing for Transportation Systems- Cloud Computing for Manufacturing Industry - **\*Cloud Computing for Education.**

**\*Self-study and questions for examinations may be taken from the self-study portions also.**

Programme Code:09		B.Sc. Computer Science		
Title of the Paper:		Major Elective - Computing Intelligence		
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	5	75	5	
<b>Course Objectives</b>				
<ol style="list-style-type: none"> <li>To provide strong foundation on fundamental concepts in Computing Intelligence.</li> <li>To apply basic principles of Artificial Intelligence and solutions that require problem solving, influence, perception, knowledge representation and learning.</li> </ol>				

Course Outcomes (CO)		
K1 to K5	CO1	Describe the fundamentals of artificial intelligence concepts and searching techniques.
	CO2	Develop the fuzzy logic sets and membership function and defuzzification techniques.
	CO3	Understand the concepts of Neural Network and analyze and apply the learning techniques.
	CO4	Understand the artificial neural networks and its applications.
	CO5	Understand the concept of Genetic Algorithm and Analyze the optimization problems using GAs.

### Syllabus

#### UNIT I

(15 Hours)

Introduction to AI: Problem formulation–AI Applications – Problems–State Space and Search– Production Systems – Breadth First and Depth First – Travelling Salesman Problem – Heuristic search techniques: Generate and Test – Types of Hill Climbing.

#### UNIT II

(15 Hours)

Fuzzy Logic Systems: Notion of fuzziness – Operations on fuzzy sets – T-norms and other aggregation operators –Basics of Approximate Reasoning – Compositional Rule of Inference – Fuzzy Rule Based Systems–Schemes of Fuzzification–Inferencing–Defuzzification–Fuzzy Clustering–fuzzy rule-based classifier.

#### UNIT III

(15 Hours)

Neural Networks: What is Neural Network, learning rules and various activation functions, Single layer Perceptions, Back Propagation networks, Architecture of Backpropagation (BP) Networks, Backpropagation Learning, Variation of Standard Backpropagation Neural Network, Introduction to Associative Memory, Adaptive Resonance theory and Self Organizing Map, Recent Applications.

#### UNIT IV

(15 Hours)

Artificial Neural Networks: Fundamental Concepts – Basic Models of Artificial Neural Networks – Important Terminologies of ANNs – McCulloch-Pitts Neuron – Linear Separability – Hebb Network.

#### UNIT V

(15 Hours)

Genetic Algorithm: Introduction – Biological Background – Genetic Algorithm Vs Traditional Algorithm – Basic Terminologies in Genetic Algorithm – Simple GA – General Genetic Algorithm – \*Operators in Genetic Algorithm.

**\*Self-study and questions for examinations may be taken from the self-study portions also.**

<b>B.Sc. Computer Science</b>				
<b>Title of the Paper: Skill Based Subject 1 – Basics of Cyber Security</b>				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
<b>2026 - 2027</b>	<b>2</b>	<b>30</b>	<b>3</b>	

### **COURSE OBJECTIVES**

1. To provide fundamental knowledge of cyber security concepts and the digital environment.
2. To create awareness about cyber threats, cybercrimes, and common online frauds.
3. To develop the ability to identify risks associated with internet, mobile, and online transactions.
4. To familiarize students with safe practices in email, social media, and digital communication.
5. To introduce basic cyber laws, ethics, and responsible digital behavior.

### **COURSE OUTCOMES**

**On successful completion of the course, the students will be able to:**

<b>K Level</b>	<b>CO Code</b>	<b>Course Outcome</b>
K1 ↑ ↓ K5	CO1	Apply the fundamental concepts of cyber security and digital safety at appropriate place
	CO2	Identify various cyber threats, cybercrimes, and online frauds
	CO3	Enable safe practices while using internet, mobile, and e-commerce platforms
	CO4	Interpret security issues related to email and social media usage
	CO5	Comprehend cyber laws, ethics, and legal responses to cybercrime

### **SYLLABUS**

#### **UNIT I**

**(6 Hours)**

Foundations of Cyber Security: Cyberspace and Digital Environment -Evolution of Cyber Security- Basic Concepts and terminology in Cybersecurity –Cybersecurity Threat – Defense in Depth concept in Cyber Security- Information Literacy – Types of False Information — Digital footprint — Cyber Frauds- Basic Safety Practices and Password Awareness - Multi-Factor Authentication (MFA)- Zero Trust Security Model.

#### **UNIT II**

**(6 Hours)**

Cyber Crimes & Threat Landscape: Introduction to AI in Cyber Security- Cyber Crimes- Important of Cybercrime- Types of Cyber Crime - CIA Triad – Tools for Confidentiality, Integrity, Availability - Cyber Crime & Digital Evidence Indian Perspective- Recent Cyber Crime Incidents-Social Engineering Frauds- Financial Frauds using Social Media Platforms- Ransomware Attacks -Deep fake based frauds - Cryptocurrency scams -Dark Web basics - Preventive Measures for individuals and Organizations – Awareness and Safe Online Behavior- Incident Response Process.

**UNIT III****(6 Hours)**

Internet, Mobile & Digital Transaction Security: Browser Security Tools – Mobile phone security and privacy settings – E-commerce concepts and risks – UPI Fraud Awareness -QR Code Scams - App permissions & Data Tracking – Malware Types and Cyber Attacks- Secure browsing and Data Theft & Public Wi-Fi Precautions – Symmetric vs Asymmetric Encryption.

**UNIT IV****(6 Hours)**

Communication & Social Media Security: Basics of email usage and Communication – Email threats: Spam, Phishing, Malicious links- Fake News – Fake profiles, Cyber Bullying and Data Misuse –Computer Viruses – Antivirus and Firewall concepts – Safe sharing practices and Digital responsibility. Ethical Hacking.

**UNIT V****(6 Hours)**

Cyber Laws, Ethics & Digital Responsibility: Introduction to Cyber Law – IT Act 2000 and Amendments– Data Protection Laws (India DPDP Act 2023). Intellectual Property in Digital Space- Cybercrime and legal provisions – User rights and responsibilities in cyberspace – Digital footprint and online identity – Personal data protection and privacy – Cyber ethics and responsible usage – Cyber safety awareness programs and best practices.

**Case Study:** Case studies of cyber law enforcement in India

**WORK BOOK**

1. *Basics of Cyber Security*, prepared by Kongunadu Arts and Science College, Coimbatore.

**KONGUNADU ARTS AND SCIENCE COLLEGE (AUTONOMOUS)  
COIMBATORE - 641029**

**THE MODALITIES FOR THE CONDUCT OF 100% CIA  
EXAMINATIONS**

**PREAMBLE**

As per the recommendations of the Curriculum Development Cell in its meeting held on 27.08.2021, and decision taken in the General Board of Studies meeting held on 16.03.2022, the courses **Cyber Security and Information Security** were introduced in the III semester for all the UG programmes and in the even semester for the PG programme respectively for the students admitted from the academic year 2022-2023 and onwards. Also, it was unanimously decided to conduct 100 % CIA examinations (No End of Semester Examinations) for these courses. The name of the Courses Cyber Security and Information Security are renamed as **Basics of Cyber Security and Fundamentals of Information Security** as per the decision taken in the General Board of Studies meeting held on 26.03.2026 for the students to be admitted from the academic year 2026-2027 & onwards. As per the recommendations of the Curriculum Development Cell in its meeting held on 07.03.2022, it was approved in the BOS meeting held on 19.03.2022 to conduct 100% CIA Examinations for the **Extra Departmental Courses** offered in the UG and PG Programmes for the students admitted from the academic year 2022-2023 and onwards. The cited decisions had been approved by the Academic council in its meeting held on 18.04.2022. As per the recommendations of the Curriculum Development Cell in its meeting held on 27.02.2024, and decision taken in the General Board of Studies meeting held on 02.05.2024, the course **Basics of IPR** was introduced in the VI semester for all the UG programmes for the students admitted from the academic year 2024-2025 and onwards and decided to conduct 100 % CIA examinations (NO End of Semester Examinations) for the course.

Hence, the modalities is recommended for the following:

- (i) Conduct of I & II CIA Examinations
- (ii) Question Paper Pattern
- (iii) CIA Examination Mark Breakup
- (iv) Attendance Calculation

#### **CONDUCT OF I & II CIA EXAMINATIONS**

1. The CIA Examinations I & II for the above said courses must be conducted along with the other courses under centralized system.
2. The students must appear I & II CIA Examinations compulsorily, since **End of Semester Examinations will NOT be conducted** for the above said courses.
3. If any of the student (s) could not appear for CIA Examinations for the above said courses, with reasons mentioned in the College Calendar, re-examination shall be conducted as per the existing procedures.

#### **QUESTION PAPER PATTERN**

The following question paper pattern will be followed for the above said courses:

Section A - Multiple Choice	(10 × 1 = 10 Marks)
Section B - Either or Type	(5 × 5 = 25 Marks)
Section C - Either or Type	(5 × 8 = 40 Marks)

Maximum Marks : 75

Duration : 3 Hours

**CIA EXAMINATION MARK BREAKUP**

The CIA Examination mark breakup for the courses **Basics of Cyber Security, Fundamentals of Information Security and Basics of IPR** is given below:

<b>S.No.</b>	<b>Distribution Component</b>	<b>Marks</b>
1	CIA I – 75 Marks Converted to 30	30
2	CIA II – 75 Marks Converted to 30	30
3	Seminar/Objective Capacity Testing	10
4	Seminar/Objective Capacity Testing	10
5	Attendance	05
6	Any Case Study related to Cyber Security (as a Group)	15
	<b>Total</b>	<b>100</b>

The CIA Examination mark breakup for the **Extra Departmental Courses** offered for UG/PG Programmes is given below:

<b>S.No.</b>	<b>Distribution Component</b>	<b>Marks</b>
1	CIA I – 75 Marks Converted to 40	40
2	CIA II – 75 Marks Converted to 40	40
3	Seminar/Objective Capacity Testing	05
4	Seminar/Objective Capacity Testing	05
5	Attendance	05
6	Others (Group Discussion, Flipped Class room, etc.,)	05
	<b>Total</b>	<b>100</b>

**ATTENDANCE CALCULATION**

1. Separate attendance register must be maintained for **Basics of Cyber Security, Fundamentals of Information Security and Basics of IPR** in the Department and the final consolidated Attendance must be submitted to the COE along with the assessment Marks.
2. The attendance must be calculated by using the following formula:  
$$\text{Attendance percentage} = \frac{\text{Number of Classes attended}}{\text{Number of Classes conducted}} \times 100$$
3. The students should be allowed to write the CIA examinations as per the existing norms related to attendance. The staff in charge of the respective courses have the responsibility to calculate the attendance percentage and submit the same to the Coordinator of the CIA Examination Committee during the I CIA and II CIA Examinations.
4. If the staff in charge finds that students have not put up enough attendance during the I CIA Examinations, he/she shall counsel the student(s) appropriately so that at the end of the course they have sufficient Attendance.

  
**PRINCIPAL**  
Kongunaru Arts & Science College  
Coimbatore - 641 029

**KONGUNADU ARTS AND SCIENCE COLLEGE (AUTONOMOUS)  
COIMBATORE – 641029**

**MODALITIES FOR THE CONDUCT OF OPEN BOOK EXAMINATION  
SYSTEM FOR THE COURSES BASICS OF CYBER SECURITY AND  
FUNDAMENTALS OF INFORMATION SECURITY FOR ALL UG AND  
PG PROGRAMMES RESPECTIVELY**

**PREAMBLE**

The Curriculum Development Cell (CDC) meeting was convened on 16.10.2025 and recommended to implement an open book examination system for the courses, Basics of Cyber Security and Fundamentals Information Security for all UG and PG programmes to improvise conceptual understanding skills, promote deep learning, enhance assessment quality and strengthen comprehensive skills, for the students to be admitted from the academic year 2026-2027 and onwards.

**1.Purpose**

To provide guidelines for conducting open book examinations that encourage critical thinking, application of knowledge, and analytical skills.

**2.Scope**

Applicable to Basics of Cyber Security and Fundamentals of Information Security courses for the undergraduate and postgraduate programmes respectively.

**3. Examination Guidelines**

**Question Paper Design**

- ❖ Questions should be Focused on higher-order thinking (analysis & evaluation)
- ❖ Avoid direct recall questions

**Communication to Students and Staff Members**

- ❖ Inform students in advance about the format, rules, and allowed resources.

- ❖ Provide sample questions to familiarize them with the OBE style.
- ❖ All the Staff members should be familiar about the prescribed Books of the Basics of Cyber Security and Fundamentals of Information Security.
- ❖ Students are permitted to carry the prescribed Books (in original or xerox copy) duly signed by the respective staff in charge of courses to the examination Hall.
- ❖ Invigilators of the respective examination halls should permit the students with the prescribed book (in original or xerox copy) and not to allow the students with other than the prescribed Books.

  
**PRINCIPAL**

**PRINCIPAL**  
Kongunadu Arts & Science Colleg  
Coimbatore - 641 029

Programme Code:09		B.Sc. Computer Science		
Title of the Paper: Skill Based Subject 2- Mobile Application Development Lab				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	2	30	3	
<b>Course Objectives</b>				
<ol style="list-style-type: none"> <li>1. To understand the Android application development environment.</li> <li>2. To know the user interfaces for interacting with apps and triggering actions.</li> <li>3. To realize the tasks used in handling multiple activities.</li> </ol>				

Course Outcomes (CO)		
K3 to K5	CO1	Apply the skills for designing and implementing basic mobile apps
	CO2	Examine the basic programming skills needed for developing mobile apps for a specific platform.
	CO3	Analyze the options to save persistent application data
	CO4	Illustrate the role of security and performance in Android applications
	CO5	Evaluate the functionality of mobile application using androids dk

#### LIST OF PRACTICAL PROBLEMS

1. Develop an application that uses GUI components, Font and Colors.
2. Develop an application that uses Layout Managers and event listeners.
3. Develop a native calculator application using UI Widgets.
4. Write an application that draws basic graphical primitives on the screen.
5. Develop an application that uses Multiple Font and Colors using UI Widgets.
6. Develop a native application that uses GPS location information.
7. Implement an application that writes data to the SD card using UI Widgets.
8. Implement an application that creates an alert upon receiving a message.
9. Write a mobile application that creates alarm clock using UI Widgets.
10. Develop a mobile application to send an email.

B.Sc. Computer Science				
Title of the Paper: Skill Based Subject 3 - Basics of Intellectual Property Right's				
Batch	Semester	Hours/Week	Total Hours	Credits
2026 - 2027	VI	2	30	3

### COURSE OBJECTIVES

1. To create awareness about recent trends in IPR and Innovation
2. To explore the basic concepts IPR
3. To focus upon trademarks, copyrights, patents, industrial designs and traditional knowledge.
4. To learn more about managing IP rights and legal aspects.

### COURSE OUTCOMES

On successful completion of the course, the students will be able to

K1  K5	CO1	Know about basic concepts of IPR and patent
	CO2	Understand copyrights, industrial designs and geographical indication of goods.
	CO3	Differentiate between trademarks and trade secrets
	CO4	Acquire knowledge on parotection of traditional knowledge and plant varieties.
	CO5	Manage and protect IP Rights

#### UNIT – I

(6 hours)

**Introduction** -origin and development of Intellectual Property Rights (IPR), need for protecting IP, **Patents:** Foundation of patent law, patent searching process, basic criteria of patentability. Patentable and non - patentable subject matters in India. Patent prior art search, drafting the patent specification and filing procedure

#### UNIT – II

(6 hours)

**Copyrights:** Fundamentals of copyright law, originality of material, right of reproduction, right to perform the work publicly, copyright ownership issues, notice of copyright. **Industrial Designs:** Kind of protection provided in Industrial design. **Geographical Indication of Goods:** Basic aspects and need for the registration.

Sub code :26UBI6S3

**UNIT – III****(6 hours)**

**Trade Marks:** Purpose and function of trademarks, acquisition of trade mark rights, transfer of rights, selecting and evaluating trademark, registration of trademarks, claims. **Trade Secrets:** Trade secret law, determination of trade secret status, liability form is appropriation of trade secrets, trade secret litigation.

**UNIT – IV****(6 hours)**

**Protection of traditional knowledge** - Objectives, concept of traditional knowledge, issues concerning, bioprospecting and biopiracy. **Protection of Plant Varieties** - Objectives, international position, plant varieties protection in India. Rights of farmers, breeders and researchers.

**UNIT- V****(6 hours)**

**Managing IP Rights:** Acquiring IP Rights: letters of instruction, joint collaboration agreement, protecting IP Rights: non-disclosure agreement, cease and desist letter, settlement memorandum. **Transferring IP Rights:** Assignment contract, license agreement, deed of assignment. Infringement and enforcement.

**KONGUNADU ARTS AND SCIENCE COLLEGE (AUTONOMOUS)  
COIMBATORE - 641029**

**THE MODALITIES FOR THE CONDUCT OF 100% CIA  
EXAMINATIONS**

**PREAMBLE**

As per the recommendations of the Curriculum Development Cell in its meeting held on 27.08.2021, and decision taken in the General Board of Studies meeting held on 16.03.2022, the courses **Cyber Security and Information Security** were introduced in the III semester for all the UG programmes and in the even semester for the PG programme respectively for the students admitted from the academic year 2022-2023 and onwards. Also, it was unanimously decided to conduct 100 % CIA examinations (No End of Semester Examinations) for these courses. The name of the Courses Cyber Security and Information Security are renamed as **Basics of Cyber Security and Fundamentals of Information Security** as per the decision taken in the General Board of Studies meeting held on 26.03.2026 for the students to be admitted from the academic year 2026-2027 & onwards. As per the recommendations of the Curriculum Development Cell in its meeting held on 07.03.2022, it was approved in the BOS meeting held on 19.03.2022 to conduct 100% CIA Examinations for the **Extra Departmental Courses** offered in the UG and PG Programmes for the students admitted from the academic year 2022-2023 and onwards. The cited decisions had been approved by the Academic council in its meeting held on 18.04.2022. As per the recommendations of the Curriculum Development Cell in its meeting held on 27.02.2024, and decision taken in the General Board of Studies meeting held on 02.05.2024, the course **Basics of IPR** was introduced in the VI semester for all the UG programmes for the students admitted from the academic year 2024-2025 and onwards and decided to conduct 100 % CIA examinations (NO End of Semester Examinations) for the course.

**CIA EXAMINATION MARK BREAKUP**

The CIA Examination mark breakup for the courses **Basics of Cyber Security, Fundamentals of Information Security and Basics of IPR** is given below:

S.No.	Distribution Component	Marks
1	CIA I – 75 Marks Converted to 30	30
2	CIA II – 75 Marks Converted to 30	30
3	Seminar/Objective Capacity Testing	10
4	Seminar/Objective Capacity Testing	10
5	Attendance	05
6	Any Case Study related to Cyber Security (as a Group)	15
	<b>Total</b>	<b>100</b>

The CIA Examination mark breakup for the **Extra Departmental Courses** offered for UG/PG Programmes is given below:

S.No.	Distribution Component	Marks
1	CIA I – 75 Marks Converted to 40	40
2	CIA II – 75 Marks Converted to 40	40
3	Seminar/Objective Capacity Testing	05
4	Seminar/Objective Capacity Testing	05
5	Attendance	05
6	Others (Group Discussion, Flipped Class room, etc.,)	05
	<b>Total</b>	<b>100</b>

Sub Code: 26USC5OP

Programme Code:09		B.Sc. Computer Science		
Title of the Paper:		Prompt Engineering		
Batch	Hours/Week	Total Hours	Credits	Skill Development
2026 - 2027	1	15	1	
<b>Course Objectives</b>				
<ol style="list-style-type: none"> <li>1. Understand the principles and techniques of prompt engineering, including the designs of effective prompts</li> <li>2. Explore the capabilities of large language models for text and image generations and to leverage the creation of engaging content</li> <li>3. Gain practical experience in crafting prompts and generating text and images using AI tools</li> </ol>				

Course Outcomes (CO)		
K1 to K5	CO1	Design clear, concise, and relevant prompts following the standard principles of prompt engineering
	CO2	Utilize LLMs to generate text and image for designing more effective content and design
	CO3	Analyze existing prompts and make strategic combinations for enhanced prompts and platforms
	CO4	Identifying, troubleshooting, and mitigating AI biases and "hallucinations" to ensure responsible, accurate, and ethical outputs.
	CO5	Managing token limitations and structuring prompts for multi-turn conversations.

### Syllabus

#### UNIT I

(3 Hours)

**Introduction to LLM and Prompting with Large Language Models:** What are Text Generation Models, Large Language Models are Magic, A Brief History of Language Models, LLMs in the Market.

#### UNIT II

(3 Hours)

**The Art of Text Data Generation with GenAI and Standard Practices for Text Generation:** Generating Lists, Explain It Like I'm Five, Universal Translation Through LLMs, Ask For Context, Text Style Unbundling, Identifying the Desired Textual Features, Generating New Content with the Extracted Features, Role Prompting, Analyzing Existing Prompts for Strengths and Weaknesses.

#### UNIT III

(3 Hours)

**Learning to Craft Image Data with GenAI and Introduction to Diffusion Models for Image Generation:** Introduction to Image Generation with AI, Principles of Designing Prompts for Image Generation, Available Models - OpenAI DALL-E, Midjourney, Stable Diffusion, Google Gemini, Text to Video, Model Comparison, Reverse Engineering Prompts, Negative Prompts, Prompt Re-Writing, Prompt Analysis.

#### UNIT IV

(3 Hours)

**Building AI Powered Applications:** AI Blog Writing, Topic Research, Expert Interview, Generate Outline, Text Generation, Writing Style, Title Optimization, AI Blog Images, User Interface, Ethical Considerations of Using AI for Text and Image Generation.

**UNIT V**

**(3 Hours)**

Advanced prompt engineering techniques- prompt chaining, prompt tuning, prompt ensembles, few-\*shot learning with prompts.

**\*Self-study and questions for examinations may be taken from the self-study portions also.**

**Text Book:**

**MODALITIES FOR THE CONDUCT OF 100% CIA FOR THE ONE  
CREDIT SELF- STUDY COURSE AND THE MARK DISTRIBUTION  
PATTERN FOR THE PART III THEORY PAPER OF APPLICABLE  
COURSE**

**PREAMBLE**

The Curriculum Development Cell (CDC) meeting was convened on 16.10.2025 and recommended to have one credit Self Study Course for applicable programmes in both UG & PG programme in the V and II semester respectively for the students to be admitted from the academic year 2026-2027 and onwards.

In order to foster independent learning, enhance academic flexibility, and encourage students to explore knowledge, the institution introduces the One Credit Self Study Course. This initiative is designed to provide students with an opportunity to pursue structured self-learning during the regular programme of study.

The one credit Self Study Course for applicable UG & PG programme in the V and II semester respectively, for the students admitted from the academic year 2026-2027 and onwards.

**1. CIA COMPONENTS FOR ONE CREDIT COURSE**

CIA shall be conducted by the department concerned.

CIA I	50 (Converted to 10)		
CIA II	50 (Converted to 10)	20	25
	Case Study	5	

**QUESTION PAPER PATTERN**

Duration : 2 Hours

Knowledge Level	Section	Marks	Description	Total
K1 Q1 to Q6	A (Answer all)	6 x 1 = 6	MCQ	50
K2 - K4 Q7 to Q 10	B (Either or pattern)	4 x 5 = 20	Short Answers	
K2 - K5 Q11 to Q 13	C (Either or pattern)	3 x 8 = 24	Descriptive / Detailed	

**2. PART III THEORY APPLICABLE COURSE**

(CIA : 20 MARKS, ESE : 55 MARKS)

CIA: 20 Marks

CIA I	55	(55+55)	20
CIA II	55	Converted to 10	
Objective Capacity Testing /Seminar		5	
Attendance		5	

ESE : 55 Marks

**QUESTION PAPER PATTERN**

Knowledge Level	Section	Marks	Description	Total
K1 Q1 to 10	A (Answer all)	10 x 1 = 10	MCQ	55
K2 - K4 Q11 to 15	B (Either or pattern)	5 x 3 = 15	Short Answers	
K2 - K5 Q16 to 20	C (Either or pattern)	5 x 6 = 30	Descriptive / Detailed	

**PRINCIPAL**  
**PRINCIPAL**  
 Kongunadu Arts & Science College  
 Coimbatore - 641 029

Programme Code:09		For UG Students		
Title of the Paper:		EDC - Web Development Laboratory		
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	2	30	3	
<b>Course Objectives</b>				
<ol style="list-style-type: none"> <li>To design and develop websites using fundamental web languages, technologies, and tools.</li> <li>To implement the concepts in visual design and content structuring</li> <li>To develop an ability to design and implement static and dynamic website</li> <li>To develop skills in analyzing the usability of a web site.</li> <li>To demonstrate the role of languages like HTML, CSS, JavaScript, PHP and protocols in the workings of the web and web applications.</li> </ol>				

Course Outcomes (CO)	
KI to K5	CO1   Understanding the use of HTML tags.
	CO2   Create web pages using HTML and Cascading Stylesheets and Develop dynamic web pages using JavaScript.
	CO3   Use cascading style sheets to design web pages
	CO4   Use JavaScript and HTML to create web pages with advanced interactivity.
	CO5   Understand, analyze and build web applications using PHP and Integrate HTML forms to PHP scripts.

### LIST OF PRACTICAL PROBLEMS

- Design a page having suitable background color and text color with title "My First Web Page" using all the attributes of the Font tag and Create a HTML document giving details of your [Name, Age], [Address, Phone] and [Register Number, Class] aligned in proper order using alignment attributes of Paragraph tag.
- Write HTML code to design a page containing some text in a paragraph by giving suitable heading style.
- Write HTML code to create a Web Page that contains an Image at its center and description of the image.
- Use table tag to format web page and also create the Time Table of your class using table.
- Create your profile page i.e. educational details, Hobbies, Achievement, My Ideals etc.
- Develop and demonstrate the usage of inline, internal and external style sheet using CSS.
- Write an HTML page that contains a selection box with a list of 5 countries. When the user selects a country, its capital should be printed next in the list. Add CSS to customize the properties of the font of the capital (color, bold and font size).
- A web application that takes name and age from an HTML page. If the age is less than 18, it should send a page with "Hello, you are not authorized to visit the site" message, where should be replaced with the entered name. Otherwise, it should send "Welcome to this site" message.

9. Design a web page for your department.
10. Design the following static web pages required for an online bookstore web site.
  - 1) HOME PAGE: The static home page must contain three frames.
  - 2) LOGIN PAGE
  - 3) CATALOGUE PAGE: The catalogue page should contain the details of all the books available in the web site in a table.
  - 4) REGISTRATION PAGE
11. Write JavaScript to validate the following fields of the Registration page.
  1. First Name (Name should contain alphabets and the length should not be less than 6 characters).
  2. Password (Password should not be less than 6 characters length).
  3. E-mail id (should not contain any invalid and must follow the standard pattern name@domain.com)
  4. Mobile Number (Phone number should contain 10 digits only).
  5. Last Name and Address (should not be Empty).
12. Write PHP program to upload registration form into database and Display the Registration form from the database.

**TEXT BOOKS**

1. Jon Duckett (2000) – “Beginning Web Programming With HTML, XHTML AND CSS”, – Second Edition, Wiley India Pvt Ltd.
2. Bootstrap for Quick Start: A Beginner's Guide to Building Responsive Layouts with Bootstrap.

**REFERENCE BOOKS**

2. Chris Bates - “Web Programming Building Internet Applications”, Second Edition, John Wiley & Sons, Ltd.

**Guide lines to the distribution of marks for Practical Examinations:**

**CIA:** Total marks–40 [Practical – 25, Observation-10, Attendance – 5].

**ESE:** Two Questions will be given for each student. (3Hours/60marks) Record:10 Marks

Particulars	Program1 (Marks)	Program2 (Marks)
Algorithm	5	5
Program Coding	15	15
Result	5	5

**KONGUNADU ARTS AND SCIENCE COLLEGE (AUTONOMOUS)  
COIMBATORE - 641029**

**THE MODALITIES FOR THE CONDUCT OF 100% CIA PRACTICAL  
EXAMINATIONS (For EDC Courses)**

**CONDUCT OF 100% CIA PRACTICAL EXAMINATIONS**

1. The Students shall appear for **TWO** CIA practical examinations which are evaluated as 100% internal examinations.
2. The students must appear **TWO** CIA practical examinations compulsorily, since End of Semester examinations will NOT be conducted for the above said course.
3. If any of the student(s) could not appear for CIA Examinations, as per reasons mentioned in the College Calendar, re-examination shall be conducted as per the existing procedures and norms.

The CIA Practical Examination mark breakup for the Extra Departmental Courses (EDC) offered for the UG & PG Programme is given below:

S.No.	Component Distribution	Marks
1.	CIA Practical I – 60 marks converted to 30	30
2.	CIA Practical II – 60 marks converted to 30	30
3.	Continuous assessment of practical (Observation to be submitted*) (15 Experiments/Programs x 2 = 30 marks)	30
4.	Record	05
5.	Attendance	05
<b>Total</b>		<b>100</b>

\* In case a student is absent for an Experiment/Program conducted on a particular day, the student will not be allowed to compensate that Experiment/Program and will be awarded zero for that particular Experiment/Program and shall be marked absent. In case any student has an attendance lack; the concerned faculty handling the course in consultation with HoD may permit the student who has an attendance lack to compensate one or two Experiment/Programs as the case may be to enable them to become eligible with mandate of 75% attendance to appear for the Continuous Internal Practical Examinations. However the compensated Experiment/Programs will not be awarded any marks whatsoever.

**PRINCIPAL**

PRINCIPAL  
Kongunadu Arts & Science Col  
Coimbatore - 641 029

B.Sc. Computer Science				
Title of the Paper:		Part - IV Environmental Studies		
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	2	30	2	

### COURSE OBJECTIVES

- To provide a fundamental understanding of natural resources, environmental ethics, and the impact of modern practical conservation and sustainability.
- To inculcate knowledge and create awareness about concepts, components and function of ecosystems
- To appraise on the importance of biodiversity, its values, threats, indigenous and Traditional knowledge systems, conservation strategies, and modern identification tools, and cultivate conscious responsibility and awareness for biodiversity conservation and sustainability.
- To understand the environment threats and pollution, its impacts and mitigation strategies
- To develop an understanding of disasters (natural and man-made) and its preparedness

### COURSE OUTCOMES

On Successful completion of the course, the students will be able to

K1  K5	CO1	Formulate genetic resource conservation strategies and assess India's SDG performance through AI/ML tools.
	CO2	Evaluate and predict the impact of humans on web of life, global economy and quality
	CO3	Think critically and develop strategies for biodiversity conservation, sustenance and environmental equity through eco conscious approach
	CO4	Demonstrate values and have compassion towards complex environmental issues and take part in mitigating current environment challenges through sustainable solutions
	CO5	Apply basic safety and preparedness measures in disaster situations in society, household and workplace

Sub. Code: 26EVS101

**UNIT I - MULTIDISCIPLINARY NATURE OF ENVIRONMENT AND ITS SOCIAL ETHICS AND VALUES (6 HOURS)**

Introduction to environment; Historical Development of Human – environment interaction; Industrial revolution, Economic development and its impact on the environment; **Overview of resources:** Definition, Classification of natural resources – biotic and abiotic, renewable and non-renewable. **Renewable Resources:** Water Resources- Rainwater Harvesting, Reservoirs managements, AI & ML tools for water resource management. Sustainable Development goals - Agriculture and Environment. Revisiting traditional agricultural practices- Biodynamic Farming, Physical and Biological soil factors. **Non-renewable Resources-** fossil fuel, nuclear fuel, Energy Resources: Conventional and non-conventional Resources- solar, wind, clean energy- hydrogen, Biomass energy-coir pith, charcoal; Use of exotic/invasive weed biomass for alternative energy/economy. Eg: *Lantana camara*, *Eichhornia Sp*, Genetic Resources and conservation, strategies.

- \*Activity:** (i) Analyze your department and its practices towards compliance to SDG's. List out the compliances towards SDG's with justification.
- (ii) Examine your campus' current resource conservation strategies and provide recommendations to improve its sustainability and resource efficiency.

\* Students can take up any one of the above.

**UNIT II - ECOSYSTEMS (6 HOURS)**

**Ecosystem-** Definition, Components (producers, consumers and decomposers) and functions- Energy flow, Food chains and its types, food web, Disturbances to food chain and food web due to anthropogenic intrusions Eg: Diclofenac Case, Ecological pyramids: types and importance of ecological pyramids, **Types of Ecosystems:** Natural ecosystem- Aquatic Ecosystem (Pond, River, Marine and Estuarine), Terrestrial Ecosystem (Forest, Grassland and Desert). Artificial Ecosystem (Crop land).

**Activity:** Develop a working model for an ecosystem through building a Terrarium or Suseum.

**UNIT III - BIODIVERSITY (6 HOURS)**

**Concept of Biodiversity:** Definition, Types-Genetic, Species and Ecosystem diversity. Indigenous Knowledge Systems on Biodiversity – Traditional knowledge and legal framework for bioprospecting and Biomimicry. Biodiversity- Values, uses and threats, sustainable use of bioresources for value additions, Conservation strategies of Biodiversity- *In-situ* - National Parks, Wildlife Sanctuaries, Community Reserve and Conservation Reserves, *Ex-situ* – Zoological Park, Aquarium, Botanical garden. **\*Case Study-** Nilgiri Tahr Conservation Project.

**Activity: (i)** Applications for plant and animal identification by software -*iNaturalist* and Merlin Bird ID (ii) Field observation and documentation of the campus biodiversity.

**UNIT IV - ENVIRONMENTAL THREATS AND POLLUTION****(6 HOURS)**

**Introduction and Classification of Pollution-** physical, chemical and biological; major types of pollution- air, water, soil/land, noise, thermal, radioactive, solid waste, electronic waste (e-waste), plastic, biomedical waste. **Assessment and Monitoring:** Pollution impact assessment/health risk assessment & monitoring techniques, Biological indicators of pollution – Dissolved Oxygen (DO), Biological Oxygen Demand (BOD) and Chemical Oxygen Demand (COD). Impact of pollution and incidence of Life style disorders like Diabetes, Cardio Vascular Disease, Cancer, PCOS etc. **Waste Management** – concept of 3R (Reduce, Recycle and Reuse) and sustainability. \*Case studies: Dye Industrial pollution from tanneries, paper and pulp industrial effluents in Noyyal and Cauvery rivers.

Activity: Prepare an Audit report for:

- (i) Water usage in your department/house
- (ii) Magnitude of solid waste generation and its management at your department/house.

**UNIT V - DISASTER MANAGEMENT AND PREPAREDNESS****(6 HOURS)**

Definition and Classification of Disaster (Natural and Man-made disasters). **Natural Disaster:** Earthquakes, Landslides, Tsunami, Floods, Volcanic eruptions, Cyclones. Wayand- landslides, Joshimath- The sinking Village, Forest fires: causes, spread, control measures. **Man-made Disasters:** Industrial and chemical accidents (Bhopal disaster, oil spills), Nuclear hazards (Chernobyl and Fukushima). Kasargod- Impact of Endosulfan spraying on cashew farms. **Preparedness and safety measures:** Early warning system, response, recovery, mitigation, vulnerability, risk, resilience and capacity building. **Forecasting methods:** Conventional – cloud formation & wind, wave patterns, behaviours of animals & plants, Modern methods – remote sensing, drone and AI tools for impact assessment. \*Case studies: Chennai flood 2015, causes and control measures.

Activity: Prepare (i) Personal/Class emergency plan

- (ii) Risk identification checklist like loose heavy furniture, poor wiring, blocked exits
- (iii) A document using Mobile technology to map local resources or identify safer locations.

**Field Study:** Visit to eco parks'/conservation sites and report.

\* Case studies are not for examination purposes.

**QUESTION PAPER PATTERN**

Maximum Marks : 50

Duration : 3 Hours

Answer all Questions (5×10=50 Marks)

Essay type, Either or type questions from each unit.

B.Sc. Computer Science				
Title of the Paper: VALUE EDUCATION – Moral and Ethics				
Batch	Hours/Week	Total Hours	Credits	Employability/ Skill Development
2026 - 2027	2	30	2	

### Course Objectives

1. To impart Value Education in every walk of life
2. To help the students to reach excellence and reap success
3. To impart the right attitude by practicing self-introspection
4. To portray the life and messages of Great Leaders
5. To insist the need for universal brotherhood, patience and tolerance
6. To help the students to keep them fit
7. To educate the importance of Yoga and Meditation

### Course Outcomes (CO)

After completing the course the students:

K1 to K5	CO1	will be able to recognize Moral values, Ethics, contribution of leaders, Yoga and its practice
	CO2	will be able to differentiate and relate the day to day applications of Yoga and Ethics in real life situations
	CO3	can emulate the principled life of great warriors and take it forward as a message to self and the society
	CO4	will be able to Analyse the Practical outcome of practicing Moral values in real life situation
	CO5	could Evaluate and Rank the outcome of the pragmatic approach to further develop the skills

### Syllabus

#### UNIT I:

(4 Hours)

**Moral and Ethics:** Introduction – Meaning of Moral and Ethics – Social Ethics – Ethics and Culture – Aim of Education.

#### UNIT II:

(6 Hours)

**Life and Teachings of Swami Vivekananda:** Birth and Childhood days of Swami Vivekananda – At the Parliament of Religions – Teachings of Swami Vivekananda

Sub. Code: 26VED201

**UNIT III:****(4 Hours)**

**Warriors of our Nation:** Subhas Chandra Bose – Sardhar Vallabhbhai Patel – Udhham Singh – V. O. Chidambaram Pillai – Bhagat Singh – Tiruppur Kumaran – Dheeran Chinnamalai – Thillaiyadi Valliammai – Velu Nachiyar – Vanchinathan

**UNIT IV:****(8 Hours)**

**Fundamentals of Yoga :** Introduction to Yoga – Benefits of Yoga - Principles of Yoga Practice– Yoga for Health and Well Being – Yoga for Peace – Yoga for Success – Brain Yoga Benefits – The Science of Yoga - Importance of Yoga in Modern Life

**UNIT V:****(8 Hours)**

**Yoga Practices :** Warm-Up Exercises in Yoga : Neck, Shoulder, Wrist, Hip, Knee and Ankle Rotations - Basic Yoga Asanas: Tadasana, Vrikshasana, Bhujangasana, Vajrasana , Shavasana and Ardhasiddhasana – Surya Namaskar - Pranayama - Meditation and Relaxation.

**TEXT BOOKS:**

Connecting with nature</b></p> <p>Practicing to be in the present moment - Nature walk, feeling the sun, listening to the natural sounds.</p> <p>Exploring with intention - Hiking, gardening to observe the nature.</p> <p>Reflecting on the emotions, and feeling kindled by nature.</p> <p><b>2. Serving people</b></p> <p>Identifying the needs of others.</p> <p>Helping others.</p> <p>Volunteering your time, skills and listening ear.</p> <p>Finding joy in giving.</p> <p><b>3. Creative Expressions</b></p> <p>Indulging in writing poems, stories, music making/listening, creating visual arts to connect with inner selves.</p> <p><b><u>Suggested Activities (Sample):</u></b></p> <p>(Mindfulness and Meditation) Conducting guided meditation every day for 10 minutes and directing the students to record the changes they observe.</p>	

10	<p><b>Situational Awareness (Developing Life skills)</b></p> <p><b>1. Being street smart</b></p> <p><b>Discuss:</b></p> <p>Who are street smarts?</p> <p>Why is it important to be street smart?</p> <p>Characteristics of a street-smart person: Importance of acquiring life skills to become street smart (General First-aid procedure, CPR Procedure, Handling emergency situations like fire, flood etc).</p> <p><b>2. Digital Awareness</b></p> <p><b>Discuss:</b></p> <p>Cyber Security</p> <p>Information Literacy</p> <p>Digital Privacy</p> <p>Fraud Detection</p> <p><b><u>Suggested Activities (sample):</u></b></p> <p>(Street Smart) Inviting professionals to demonstrate the CPR Procedure</p> <p>Conducting a quiz on Emergency Numbers</p>	
11	<p><b>Understanding Addiction</b></p> <p><b>Plan this session around:</b></p> <p>Identifying the environmental cues, triggers that lead to picking up this habit.</p> <p>Knowing the impact of substance abuse Adverse health conditions, social isolation, ruined future, hidden financial loss and damaging the family reputation.</p> <p>Seeking help to get out of this addiction.</p> <p><b><u>Suggested Activities:</u></b></p> <p>Provide Worksheets to check the students' level of understanding about substance addiction and their impacts.</p> <p>Share case studies with students from real-life.</p> <p>Play/share awareness videos on addiction/de-addiction, experts talk.</p> <p>*Conduct awareness programmes on Drugs and its ill effects.</p> <p>(Arrange Experts from the concerned government departments and NGOs working in drug addiction issues) and maintain the documents of the program.</p>	

**Closure:**

Each student should submit a Handwritten Summary of their Learnings & Action Plan for the future.

**Assessments:**

- Use Self-reflective worksheets to assess their understanding.
- Submit the worksheets to internal audit/external audit.
- Every student's activities report should be documented and the same have to be assessed by the Physical Director with the mentor. The evaluation should be for 100 marks. No examination is required.

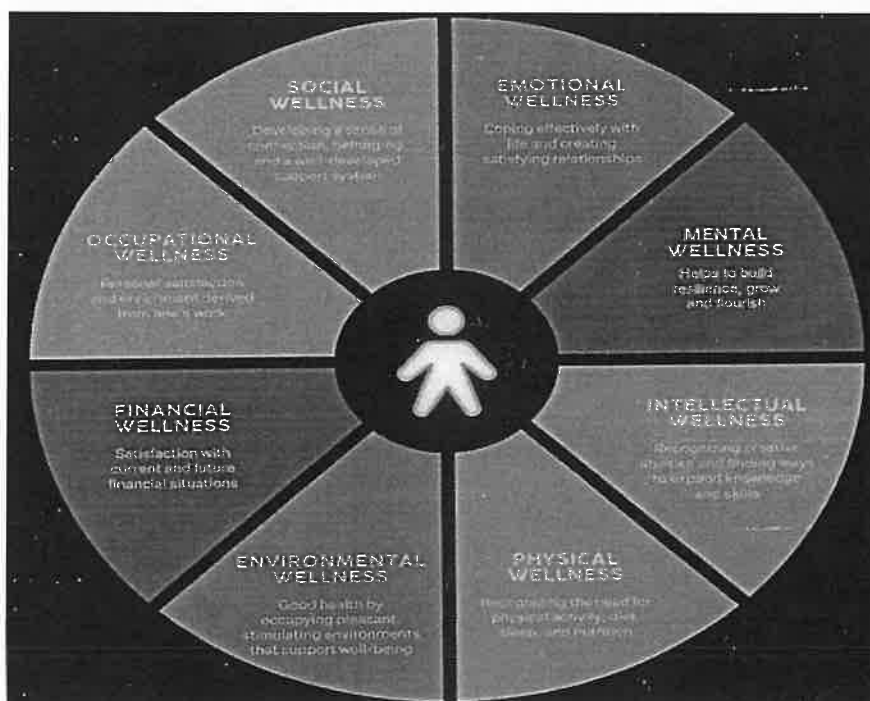

**Scheme of Evaluation**

Part	Description	Marks
A	Report	40
B	Attendance	20
C	Activities (Observation During Practice)	40
Total		100

**References/Resource Materials:**

The course acknowledges that individual needs for references and resources may vary. However, here are some general reference materials and resources that may be helpful:

**1. The Well-Being Wheel:**

**2. Facilities & Spaces:** Some activities may require access to specific facilities, resources or spaces. Students may need to coordinate with the college administration to reserve these as required.

**3. Online Resources:**

1. United Nations Sustainable Development Goals - Goal 3-Good Health & Well-Being: <https://www.un.org/sustainabledevelopment/health/>
2. Mindfulness and Meditation: Stanford Health Library offers mindfulness and meditation resources:  
<https://healthlibrary.stanford.edu/books-resources/mindfulness-meditation.html>

# **JOB ORIENTED COURSE**

<b>Programme Code:09</b>		<b>For all Students</b>	
<b>JOC 1- MICROSOFT POWER BI</b>			
<b>Batch</b>	<b>Hours / Week</b>	<b>Total Hours</b>	<b>Credits</b>
<b>2026 - 27</b>	<b>2</b>	<b>30</b>	<b>2</b>

### COURSE OBJECTIVES

The primary objective of this course is to provide students with a comprehensive understanding of business intelligence concepts and hands-on experience using Microsoft Power BI for data analysis and visualization.

### COURSE OUTCOMES

1. Understand the concepts of Business Intelligence and explain the features, components, and advantages of Microsoft Power BI compared to other BI tools.
2. Connect to multiple data sources, perform data loading, and apply data transformation, cleaning, and modeling techniques using Power BI Desktop.
3. Apply Data Analysis Expressions (DAX) to create calculated columns, measures, and perform advanced data analysis using functions and operators.
4. Design and develop interactive and visually appealing dashboards and reports using various visualization tools in Power BI.
5. Deploy and manage dashboards in Power BI Service, utilize features like Q&A and Quick Insights, and establish live connections with data sources including Excel.

#### UNIT – I

Introduction to Power BI: Traditional BI vs. Power BI - Power BI vs. Tableau vs. QlikView - Uses of Power BI - The Flow of Work in Power BI Working with Power BI - Basic Components of Power BI - Comparison of Power BI Version.

#### UNIT – II

Power BI Desktop and Data Transformation: Data Sources in Power BI Desktop - Loading Data in Power BI Desktop - Views in Power BI Desktop - Query Editor in Power BI - Transform, Clean, Shape, and Model Data - Manage Data Relationship - Editing a Relationship - Cross Filter Direction - Saving Work file.

#### UNIT – III

Data Analysis Expression (DAX): Introduction to DAX Importance of DAX - Data Types in DAX - DAX Calculation Types - Steps to Create Calculated Columns - Measures in DAX - DAX Syntax - DAX Functions - DAX Operators- DAX Tables and Filtering.

**UNIT – IV**

Introduction to Visuals in Power BI Visualization Charts in Power BI - Matrixes and Tables- Slicers and Map Visualizations - Gauges and Single Number Cards - Modifying Colors in Charts and Visuals - Shapes, Text Boxes, and Images - Custom Visuals - Page Layout and Formatting.

**UNIT – V**

Power BI Service: Creating a Dashboard - Quick Insights in Power BI - Configuring a Dashboard - Power BI Q&A - Ask Questions about your Data. Connectivity Modes: Data Sources Supported in Power BI - Exploring Live Connections to Data Sources- Connecting Power BI in Excel.

**TEXT BOOK:**

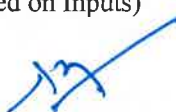

1. Yash Sinha “Introducing Microsoft Power BI”, 2022.

<b>JOC 2- DIGITAL MARKETING</b>			
Batch <b>2026 - 27</b>	Hours / Week <b>2</b>	Total Hours <b>30</b>	Credits <b>2</b>

### COURSE OBJECTIVES

The primary objective of this course is to provide students with a comprehensive understanding of business intelligence concepts and hands-on experience using Microsoft Power BI for data analysis and visualization.

### COURSE OUTCOMES

1. To understand the fundamentals of digital marketing, including its importance, scope, and key components in the modern business environment.
2. To apply search engine optimization (SEO) techniques to improve website visibility and ranking on search engines.
3. To Utilize social media platforms effectively to design and implement marketing campaigns for brand promotion and audience engagement.
4. To analyze and implement search engine marketing (SEM), email marketing, and content marketing strategies to drive online traffic and conversions.
5. To use web analytics tools to measure, interpret, and optimize digital marketing performance.

### SYLLABUS

Module 1 : Digital Marketing Fundamentals

Module 2 : Digital Marketing Campaign - Understanding the

Types of Campaigns.

Module 3 : E-mail marketing

Module 4 : Building a Website - Hosting a Website

Module 5 : Customer Relationship Management (CRM)

Module 6 : Managing Social Media

Module 7 : Leadership skills for digital marketing professionals

Module 8 : Internet marketing strategy

Module 9 : Assignments

Module 10 : Case studies

*Dr. R. Saravana Moorthy*

**Dr. R. Saravana Moorthy**  
M.Sc (SE), MCA, M.Phil, MBA (IT), OCP, Ph.D (CSE),  
Associate Professor & Head  
Department of Computer Science (SF)  
Kongunadu Arts and Science College,  
Coimbatore - 641 029, Tamil Nadu, India.

**KONGUNADU ARTS AND SCIENCE COLLEGE**

**(AUTONOMOUS)**

**COIMBATORE – 641029**

**DEPARTMENT OF COMPUTER SCIENCE (UA)**

**Certificate Course**

**in**

**Ethical Hacking**

**CURRICULUM AND SCHEME OF EXAMINATIONS**

**(2026-2027)**

## **DEPARTMENT OF COMPUTER SCIENCE (UA)**

### **Vision:**

- To inculcate Human, Moral and ethical values in the young minds of the students and thereby improving the total personality of the students.

### **Mission:**

- To produce employable graduates to cater the needs of various industries.

### **PROGRAMME OUTCOME (PO)**

- PO1** To understand the purpose of ethical hacking in identifying vulnerabilities and enhancing cybersecurity.
- PO2** To explore the scope of ethical hacking in various domains such as network security, web application security, and mobile security.
- PO3** To Learn about the tools and techniques used in each stage, such as port scanning, vulnerability scanning, and exploitation.
- PO4** To explore real-world applications of ethical hacking in industries such as finance, healthcare, and government.
- PO5** To analyze the potential effects of ethical hacking on improving cybersecurity posture and mitigating cyber threats.
- PO6** To design and implement robust defense mechanisms against common cyber threats like Malware, Trojans, Denial-of-Service
- PO7** To conduct active and passive reconnaissance (information gathering) on a target network using tools like Nmap, Shodan, and Google Dorking.
- PO8** To configure and optimize firewalls, Intrusion Detection Systems (IDS), and Honeypots to actively defend an enterprise environment.

## **PROGRAMME SPECIFIC OUTCOME (PSO)**

On successful completion of this course you will have knowledge and understanding of:

- PSO1** Ability to understand the scientific and technological principles in Ethical Hacking.
- PSO2** Ability to know the concepts of Ethical Hacking Techniques and Tools.
- PSO3** Ability to apply the design and development principles in Ethical Hacking.
- PSO4** Ability to identify problem and solution provision in Ethical Hacking.
- PSO5** Utilization of machine learning in Ethical Hacking.

## CERTIFICATE COURSE IN ETHICAL HACKING

(Six Months)

CURRICULUM & SCHEME OF EXAMINATION

[APPLICABLE TO THE STUDENTS ADMITTED DURING THE ACADEMIC YEAR 2026-2027 & ONWARDS]

	Subject code	Title of the Paper	Instruction Hours/Cycle	Exam. Marks			Duration of Exam (hrs)	Credits
				CIA	ESE	Total		
Semester	26CEH101	<b>Core Paper 1 –</b> Fundamentals of Ethical Hacking	3	25	75	100	3	2
	26CEH102	<b>Core Paper 2 -</b> Social Engineering	3	25	75	100	3	2
	26CEH103	<b>Core Paper 3 –</b> System Hacking & Security	3	25	75	100	3	2
	26CEH1CL	<b>Core Practical 1–</b> Ethical Hacking Essentials - Lab	3	40	60	100	3	2
		<b>Total</b>	12	-	-	400	-	8

**Part-wise Total Marks:**

SUBJECT	MARKS	TOTALCREDITS
Core Theory	300	6
Core Practical	100	2

**CIA–Continuous Internal Assessment ESE–**

**End –of-Semester Examination**

**50% CIA is applicable to all subjects for both Theory and Practical.**

**Teaching Methods:**

Chalk and Talk, Smart Class Room, Powerpoint Presentation, Seminar, Quiz & Discussion
---

**COMPONENTS OF CONTINUOUS INTERNAL ASSESSMENT (50 MARKS)**

Components		Marks	Total
<b>Theory</b>			
CIA I	75	(75+75) Converted to 15	25
CIA II	75		
Assignment/Seminar		5	
Attendance		5	
<b>Practical</b>			
CIA Practical		25	40
Observation Notebook		10	
Attendance		5	

\* Class Participation, Case Studies Presentation, Field Work, Field Survey, Group Discussion, Term Paper, Workshop/Conference Participation. Presentation of Papers in Conferences, Quiz, Report/Content writing. Etc.

\*\* Two Assignments to be given. (Each 5 marks).

**BLOOM'S TAXONOMY BASED ASSESSMENT PATTERN**

**K1-Remembering; K2-Understanding; K3-Applying; K4-Analyzing; K5-Evaluating**

**1. Theory Examination:**

(i) **CIA I & II and ESE: 75 Marks**

Knowledge Level	Section	Marks	Description	Total
K1 Q1 to 10	A (Answer all)	10 x 1 = 10	MCQ	75
K1 – K5 Q11 to 15	B (Either or pattern)	5 x 5 = 25	Short Answers	
K2 – K5 Q16 to 20	C (Either or pattern)	5 x 8 = 40	Descriptive / Detailed	

**\*\*For ESE 50 marks converted to 25 marks.**

## 2. ESE Practical Examination:

Knowledge Level	Section	Marks	Total
K3	Experiments	50	60
K4		Record Work	
K5			

Programme Code: 09	CERTIFICATE COURSE IN ETHICAL HACKING		
Title of the Paper: Core Paper 1– Fundamentals of Ethical Hacking			
Batch	Hours/Week	Total Hours	Credits
2026-2027	3	45	2

### Course Objectives

1. To understand the fundamentals of ethical hacking.
2. To learn about different types of hackers and their motivations.
3. To explore the legal and ethical considerations associated with ethical hacking.
4. To gain knowledge of various hacking tools and techniques used for penetration testing.
5. To develop skills to identify and exploit vulnerabilities in computer systems and networks.

### Course Outcomes (CO)

KI to K5	CO1	Understand the fundamental concepts of ethical hacking.
	CO2	Demonstrate proficiency in using various hacking tools and techniques ethically.
	CO3	Analyze and assess network vulnerabilities and security threats effectively.
	CO4	Implement strategies for securing networks and systems against cyber attacks.
	CO5	Demonstrate knowledge of legal and ethical issues related to ethical hacking.

### Syllabus

#### Unit I (9 Hours)

Overview of Ethical Hacking: Definition, scope, and importance of ethical hacking. Ethics and Legal Aspects: Understanding ethical considerations and legal frameworks in ethical hacking. Types of Hackers: Exploring different categories of hackers and their motivations.

#### Unit II (9 Hours)

Information Gathering Techniques - Methods for collecting data and foot printing. Foot printing Tools- Overview of tools used for foot printing and reconnaissance. Foot printing Process - Step-by-step approach to gathering information about target systems.

#### Unit III (9 Hours)

Network Scanning Overview - Introduction to network scanning and its objectives. Scanning Techniques - Understanding different scanning techniques and their applications. Scanning Tools - Overview of tools used for scanning networks and identifying vulnerabilities.

**Unit IV**

**(9 Hours)**

Enumeration Concepts - Understanding the enumeration process and its significance.  
Enumeration Techniques - Exploring different techniques for extracting information from target systems.  
Enumeration Tools - Overview of tools used for enumeration and gathering system details.

**Unit V**

**(9 Hours)**

System Hacking Fundamentals - Introduction to system hacking and its objectives.  
Exploitation Techniques - Understanding common vulnerabilities and exploitation methods.  
Hacking Tools - Overview of tools used for system hacking and gaining unauthorized access.

**Text Books:**

Programme Code: 09		CERTIFICATE COURSE IN ETHICAL HACKING	
Title of the Paper: Core Paper 2– Social Engineering			
Batch	Hours/Week	Total Hour	Credits
2026-2027	3	45	2

#### Course Objectives

1. To provide an overview and classification of various social engineering techniques.
2. To understand the fundamental principles and concepts of social engineering focusing on psychological manipulation, deception tactics, and human behavior analysis.
3. To acquire proficiency in the execution and application of social engineering techniques.
4. To understand the ethical and legal aspects associated with social engineering practices, emphasizing responsible conduct, privacy protection, and adherence to ethical standards

#### Course Outcomes (CO)

K1toK5	CO1	Understand the concept of social engineering and its role in cybersecurity.
	CO2	Identify various social engineering techniques used to manipulate individuals and organizations.
	CO3	Analyze case studies and real-world examples to comprehend the impact of social engineering attacks.
	CO4	Develop strategies to mitigate the risks associated with social engineering attacks
	CO5	Gain practical skills to recognize and respond to social engineering attempts effectively.

#### Syllabus

##### Unit I

(9 Hours)

Understanding of the foundational concepts of social engineering - The importance of social engineering in cybersecurity - psychological principles underlying social engineering tactics - The ethical and legal aspects associated with social engineering techniques.

##### Unit II

(9 Hours)

Various types of social engineering attacks – phishing – pretexting – baiting - tailgating, understanding their tactics and methods of exploitation.

**Unit III** (9 Hours)

Analyze notable social engineering incidents - extract lessons learned - conduct impact analysis to comprehend the consequences of these attacks.

**Unit IV** (9 Hours)

Mitigation strategies aimed at preventing social engineering attacks - including risk mitigation - security awareness training - incident response planning.

**Unit V** (9 Hours)

Importance of security awareness in combating social engineering attacks - Role of security policies- Training programs - Incident response protocols in fostering a culture of security within organizations.

**Teaching Methods:**

Chalk and Talk, Smart Class Room, Powerpoint Presentation, Seminar, Quiz & Discussion

Programme Code :09	CERTIFICATE COURSE IN ETHICAL HACKING		
Title of the Paper:	Core Paper 3 – System Hacking & Security		
Batch	Hours/Week	Total Hours	Credits
2026-2027	3	45	2

#### Course Objectives

1. To Understand concepts and principles of system hacking and security.
2. To Understand different hacking techniques such as password cracking, privilege escalation, and backdoor entry.
3. To understand the importance of reconnaissance, scanning, and enumeration phases in system hacking.
4. To develop proficiency in using hacking tools and software for ethical penetration testing.
5. To apply best practices and security measures to safeguard computer systems from cyber threats and attacks.

#### Course Outcomes (CO)

K1 to K5	CO1	Understand the fundamentals of system hacking and security measures.
	CO2	Learn various techniques and tools used in system hacking for penetration testing and vulnerability assessment.
	CO3	Gain insights into the methodologies employed by attackers to exploit system vulnerabilities.
	CO4	Develop the skills to identify, analyze, and mitigate security threats within computer systems.
	CO5	Apply ethical hacking principles to enhance the security posture of organizations and prevent unauthorized access to sensitive information.

#### Syllabus

##### Unit I

(9 Hours)

Introduction to System Hacking - A foundational understanding of system hacking - focusing on various techniques and methodologies employed to compromise computer systems. Importance of system security - common vulnerabilities - ethical considerations and legal frameworks in system hacking.

##### Unit II

(9 Hours)

Password cracking techniques - privilege escalation methods used by attackers to gain unauthorized access to systems. Different password cracking algorithms - brute-force attacks, dictionary attacks and the significance of strong password policies.

**Sub. Code: 26CEH103**

**Unit III (9 Hours)**

Malware and Rootkits - The concepts of malware and rootkits - Including types of malware such as viruses, worms, trojans, ransomware, and spyware.

**Unit IV (9 Hours)**

Backdoors and Remote Access - backdoors and remote access tools used by hackers to establish unauthorized access to systems - Different types of backdoors - including hardware and software-based backdoors - as well as remote access Trojans (RATs) - remote administration tools (RATs).

**Unit V (9 Hours)**

System Hardening and Security Measures - System hardening techniques and security measures aimed at protecting computer systems from various cyber threats. Intrusion detection / Prevention systems (IDS/IPS) – firewalls - antivirus software.

**Text Books:**

Programme Code :09	CERTIFICATE COURSE IN ETHICAL HACKING		
<b>Core Practical 1-- Ethical Hacking Essentials - Lab</b>			
Batch	Hours/Week	Total Hours	Credits
2026-2027	3	45	2

### Course Objectives

1. To provide students with practical exposure to fundamental ethical hacking concepts and techniques.
2. To familiarize students with the operation and usage of common ethical hacking tools and software.
3. To enable students to perform ethical hacking exercises independently and analyze the results.
4. To enhance students' problem-solving skills through real-world ethical hacking scenarios and simulations.
5. To empower students with the skills and knowledge necessary to contribute to cybersecurity efforts and protect against malicious attacks.

### Course Outcomes (CO)

<b>K3 to K5</b>	CO1	Gain practical experience in essential ethical hacking techniques and tools.
	CO2	Develop proficiency in using various hacking tools for penetration testing and vulnerability assessment.
	CO3	Understand the practical applications of ethical hacking principles to identify and mitigate security vulnerabilities.
	CO4	Acquire hands-on experience in conducting ethical hacking exercises and simulations.
	CO5	Apply ethical hacking methodologies to enhance the security posture of computer systems and networks.

### List of Practical Programs

1. Write a Python script to perform a brute-force attack on a password-protected ZIP file.
2. Write a python script to implement a simple network scanner using the scapy library to discover devices on the local network

3. Write a Python script to perform a TCP port scan on a target host.
4. Write a packet sniffer using the scapy library to capture and display network traffic.
5. Write a Python script to scrape a website and extract useful information, such as email addresses or links.

**Guidelines to the distribution of marks for Practical**

**Examinations:** Two Questions will be given for each student.

(3 Hours / 60marks) Record: 10 marks
