

KONGUNADU ARTS AND SCIENCE COLLEGE
(AUTONOMOUS)
COIMBATORE – 641 029

DEPARTMENT OF COMPUTER SCIENCE (UG)

CURRICULUM AND SCHEME OF EXAMINATIONS (CBCS)
(2023 - 2024 onwards)

KONGUNADU ARTS AND SCIENCE COLLEGE

(AUTONOMOUS)

Coimbatore – 641029

Vision:

Developing the total personality of every student in a holistic way by adhering to the principles of Swami Vivekananda and Mahatma Gandhi.

Mission:

- Imparting holistic and man-making education with emphasis on character, culture and value - moral and ethical.
- Designing the curriculum and offering courses that transform its students into value added skilled human resources.
- Constantly updating academic and management practices towards total quality management and promotion of quality in all spheres.
- Extending the best student support services by making them comprehensive and by evolving a curriculum relevant to student community and society at large.
- Taking steps to make education affordable and accessible by extending scholarships to the meritorious and economically disadvantaged students.
- Motivating the teachers in such a way that they become the role models in promoting Higher Education.

DEPARTMENT OF COMPUTER SCIENCE

Vision:

To inculcate Human, Moral and ethical values in the young minds of the students and thereby improving the total personality of the students.

Mission:

- To produce employable graduates to cater the needs of various industries.

PROGRAMME OUTCOMES (PO)

- PO1** Understand the basic concepts, fundamental principles and scientific theories that are needed for higher learning and research.
- PO2** Identify, formulate and analyze the complex situations to arrive acceptable solutions by applying domain specific knowledge, acquired through the programme.
- PO3** Learn moral and ethical values and commit to professional ethics and responsibilities in the associated disciplines. Exercise social concern with the ability to act with awareness of issues in diversified domains to participate in the national development.
- PO4** Ability to design, implement and evaluate a computational system to meet the desired needs within realistic constraints.
- PO5** Realize the need for self and life-long learning to move along with the scientific and technological developments.
- PO6** Ability to communicate and engage effectively with diverse stakeholders.
- PO7** Analyze the impacts of computing on individuals, organizations and society.
- PO8** Acquire skills of observing and drawing logical inferences from the scientific facts.

PROGRAMME SPECIFIC OUTCOMES (PSO)

- PSO1** Impart the core knowledge in the areas such as Software Engineering, Data Communication, Networking and Security, Database Management, Web Technology, Operating System, Artificial Intelligence and other emerging areas in Computer Science.
- PSO2** Provide well trained professionals to industries by enhancing the programming skills and new computing technologies through theoretical and practical knowledge.
- PSO3** Train to solve real world problems by selecting appropriate techniques and best logic.
- PSO4** Enhance the ability to design and develop software applications, to understand the basic concepts of hardware and to comprehend and apply mathematical and accounting principles.
- PSO5** Make use of Computer Science techniques to one's own work as a member or a leader in a team to arrive conclusions and carryout projects.

KONGUNADU ARTS AND SCIENCE COLLEGE (AUTONOMOUS)

COIMBATORE – 641 029

Course Name: B.Sc COMPUTER SCIENCE (UA)

Curriculum and Scheme of Examination under CBCS

(Applicable to the students admitted during the Academic Year 2023-2024)

Semester	Part	Subject Code	Title of the Paper	Instruction hours/cycle	Exam. Marks			Duration of Exam (hours)	Credits
					CIA	ESE	TOTAL		
I	I	23TML101	Language I@	6	25	75	100	3	3
	II	23ENG101	English - I	6	25	75	100	3	3

			Grand Total	-	-	-	3800	-	140

Note:

CBCS – Choice Based Credit system, CIA– Continuous Internal Assessment, ESE– End of Semester Examinations

\$ For those students who opt NCC under Cocurricular activities will be studying the prescribed syllabi of the UGC which will include Theory, Practical & Camp components. Such students who qualify the prescribed requirements will earn an additional 24 credits.

@ Hindi/Malayalam/ French/ Sanskrit – 23HIN/MLM/FRN/SAN101 - 404

* - No End-of-Semester Examinations. Only Continuous Internal Assessment (CIA)

** - No Continuous Internal Assessment (CIA). Only End-of-Semester Examinations (ESE)

*** Project Report – 60 marks; Viva voce – 20 marks; Internal-20 marks

**** The students shall undergo Internship training / field work for a minimum period of 14 working days at the end of the fourth semester during summer vacation and submit the report in the fifth semester which will be evaluated for 100 marks by the concerned guide and followed by an Internal Viva voce by the respective faculty or HOD as decided by the department. According to their marks, the grades will be awarded as given below.

Marks %	Grade
85 – 100	O
70 – 84	D
60 – 69	A
50 – 59	B
40 – 49	C
< 40	U (Reappear)

Major Elective Papers (2 papers are to be chosen from the following 6 papers)

1. Data Mining and Warehousing
2. Network Security
3. Advanced Robotics and its Applications
4. Introduction to Data Science
5. Cloud Computing
6. Computing Intelligence

Non-Major Elective Papers

1. Human Rights
2. Women's Rights
3. Consumer Affairs

Sub. Code & Title of the Extra Departmental Course (EDC):

23USC5XL – WEB DEVELOPMENT LABORATORY

List of Cocurricular Activities:

1. National Cadet Corps (NCC)

2. National Service Scheme (NSS)
3. Youth Red Cross (YRC)
4. Physical Education (PYE)
5. Eco Club (ECC)
6. Red Ribbon Club (RRC)
7. Women Empowerment Cell (WEC)

Note: In core/ allied subjects, no. of papers both theory and practical are included wherever applicable. However, the total credits and marks for core/allied subjects remain the same as stated below.

Tally Table:

S.No.	Part	Subject	Marks	Credits
1.	I	Language – Tamil/Hindi/Malayalam/ French/ Sanskrit	400	12
2.	II	English	400	12
3.	III	Core – Theory/Practical	1600	60
	III	Allied	400	20
		Electives/Project	300	15
4.	IV	Basic Tamil / Advanced Tamil (OR) Non-major electives	150	4
		Skill Based subject	300	9
		EDC	100	3
		Environmental Studies	50	2
		Value Education	50	2
5.	V	Cocurricular Activities	50	1
		Total	3800	140

- 25 % CIA is applicable to all subjects except JOC, COP and SWAYAM courses which are considered as extra credit courses.
- 100 % CIA for Cyber Security and EDC paper.
- The students who complete any **MOOC On learning platforms like SWAYAM, NPTEL, Course era, IIT Bombay Spoken Tutorial etc.**, before the completion of the 5th semester and the course completion certificate should be submitted through the HOD to the Controller of Examinations. Extra credits will be given to the candidates who have successfully completed.
- An Onsite **Training** preferably relevant to the course may be undertaken as per the discretion of the HOD.
- Students who successfully complete **Naan Mudhalvan** courses in 3rd and 5th semester will be given 2 extra credits for each course. They are asked to submit the marks to Controller of Examinations through and undersigned by the HOD.

Semester	Naan Mudhalvan Course Title
III	Cloud Architecture
V	E-Commerce

Components of Continuous Internal Assessment

Components		Marks	Total
Theory			
CIA I	75	(75+75) Converted to 15	25
CIA II	75		
Assignment/Seminar		5	
Attendance		5	
Practical			
CIA Practical		25	40
Observation Notebook		10	
Attendance		5	
Project/Case study			
Review		15	20
Regularity		5	

Components of Continuous Internal Assessment (25 Marks)

Components	Marks	Total
Practical

Attendance	5	

BLOOM'S TAXONOMY BASED ASSESSMENT PATTERN

K1-Remembering; **K2**-Understanding; **K3**-Applying; **K4**-Analyzing; **K5**-Evaluating

1. Theory Examination: CIA I & II and ESE: 75 Marks

Knowledge Level	Section	Marks	Description	Total
K1 Q1 to 10	A (Answer all)	10 x 1 = 10	MCQ	75
K1 – K5 Q11 to 15	B (Either or pattern)	5 x 5 = 25	Short Answers	
K2 – K5 Q16 to 20	C (Either or pattern)	5 x 8 = 40	Descriptive / Detailed	

2. Practical Examination:

Knowledge Level	Section	Marks	Total
K3	Experiments Record Work	50	60
K4		10	
K5			

3. Project Viva Voce:

Knowledge Level	Section	Marks	Total
K3	Project Report	60	80
	Viva voce		

Semester – I

Sub. Code: 23USC101

Programme Code:09		B.Sc. Computer Science	
Title of the Paper:		Core Paper 1 - C Programming	
Batch	Hours/Week	Total Hours	Credits
2023 - 2024	5	75	5

Course Objectives

1. To gain adequate knowledge on the need of programming languages and problem-solving techniques.
2. To develop an in-depth understanding of functional and logical concepts of C Programming.
3. To get exposure to problem-solving through C programming.

Course Outcomes (CO)

K1 to K5	CO1	Remember various programming constructs and to develop C programs.
	CO2	Understand the fundamentals of C programming.
	CO3	Apply the right data representation formats based on the requirements of the problem.
	CO4	Analyze the different Operations on arrays, functions, pointers, structures, Unions and files.
	CO5	Evaluate the concepts learnt through implementing and testing of the Programs that are developed.

Syllabus

UNIT I	(15 Hours)
Introduction to C – Overview of Compilers and Interpreters – Structure of C Program - Programming Rules - Character Set – Keywords – Variables – Data types – Type Conversion – Constant and Volatile Variables. Operators and Expressions: Priority of operators – Arithmetic, Relational, Logical, Assignment, Increment / Decrement, Conditional, Bitwise and Special Operators. I/O in C: Formatted, Unformatted, Library Functions.	
UNIT II	(15 Hours)
Decision Statements: if, if / else, switch, break, continue, goto. Loop Control Statements: Introduction – for, nested for loops - while, do - while statements.	
UNIT III	(15 Hours)
Arrays: Introduction – Definition – 1D, 2D, 3D or Multi-Dimensional Arrays – Strings: Standard Functions – Application of Strings. Pointers: Features – Declaration – Pointer and Arrays – Array of Pointers – Pointers to Pointers – Pointers and Strings – Void Pointers.	
UNIT IV	(15 Hours)
Functions: Definition- Declaration – Types of Functions – Call by Value – Call by reference – Recursion-Pointer to Function. Storage Class: Automatic, External, Static, Register variables* . Structure and Union : Introduction – Declaration and initialization – Union*	
UNIT V	(15 Hours)

Files: Streams and File Types - Steps for File Operations – File I/O – Other File Function – Command Line Arguments – Application of Command Line Arguments. Programming embedded systems in C: Introduction - What is an embedded system? - Which programming language should you use? – Which operating system should you use? – How do you develop Embedded software?

*Self-study and questions for examinations may be taken from the self – study portions also.

Teaching Methods:

Chalk and Talk / Smart Class Room / Powerpoint presentation / Seminar / Quiz / Discussion / Flipped Class / peer Learning / Experiential Learning / Blended Learning.

Text Book:

1. Ashok N Kamthane (2002), “**Programming with ANSI and Turbo C**”, 1st Edition, Pearson Education Publications.

Reference Books:

1. E. Balagurusamy (1998), “Programming in ANSIC”, TMH publications.
2. Henry Mullish & Herbert L Cooper (1996), “The Spirit of C”, Jaico Publication House.

Programme Code:09		B.Sc. Computer Science	
Title of the Paper:		Core Practical 1 – C Programming Lab	
Batch	Hours/Week	Total Hours	Credits
2023 - 2024	5	75	4

Course Objectives

1. To understand the field of programming using C language.
2. To familiarize the fundamental syntax and semantics of C language.
3. To enhance the analyzing and problem-solving skills and use the same for writing programs in C.

Course Outcomes (CO)

K1 to K5	CO1	Develop programming skills using the fundamentals and basics of C Language.
	CO2	Develop programs using the basic elements like control statements, Arrays and Strings.
	CO3	Enable effective usage of arrays, structures, functions and pointers.
	CO4	Implement files and command line arguments.
	CO5	Evaluate the ideas and concepts using testing of the programs.

LIST OF PRACTICAL PROBLEMS

1. Write a program to find the sum, average, standard deviation for a given set of numbers.
2. Write a program to generate 'n' prime numbers.
3. Write a program to find the biggest number among a set of numbers.
4. Write a program to arrange a set of numbers in ASCENDING ORDER using BUBBLE SORT.
5. Write a program to merge a set of numbers available in Two Array into a Single Array.
6. Write a program to calculate as in value and compare it with built-in function. $[x - x^3/3! + x^5/5! \dots]$
7. Write a Recursive function to calculate factorial value which compute nCr value.
8. Write a program to find the number of palindromes in a given sentence.
9. Write a function to perform
 - i. String Copy

- ii. String Concatenation
- iii. String Reverse.

10. Write a program to implement LINEAR SEARCH to find a particular name in a list of names.
11. Write functions for following STACK operations
 - i. PUSH
 - ii. POP
 - iii. LISTSTACK
12. Write a generalized program to perform Matrix Addition.
13. Write a program to print the student's mark sheet assuming rollno, name, marks in 5 subjects in a structure. Create an array of structures and print the marksheet in the university pattern.
14. Write a program to display the content of an array using pointers.
15. Write a program which takes a file as command line argument and copy it To another file.

Guide lines to the distribution of marks for Practical Examinations:

CIA: Total marks – 40 [Practical – 25, Observation - 10, Attendance – 5]

ESE: Two Questions will be given for each student. (3 Hours/60marks)

Record:10 Marks

ProgrammeCode:09		B.Sc. Computer Science	
Title of the Paper:		Core Paper 2 - Data Structures using C++	
Batch	Hours/Week	Total Hours	Credits
2023-2024	5	75	5

Course Objectives

1. To impart the basic concepts of data structures and algorithms.
2. To acquaint the student with the basics of the various data structures and make the students knowledgeable in the area of data structures.
3. This course also gives insight into the various algorithm design techniques.

Course Outcomes (CO)

K1 to K5	CO1	To introduce the concepts of Data structures and to understand simple linear data structures.
	CO2	Learn the basics of stack data structure, its implementation and application.
	CO3	Use the appropriate data structure in context of solution of given problem and demonstrate a familiarity with major data structures.
	CO4	To introduce the basic concepts of algorithms.
	CO5	To give clear idea on algorithmic design paradigms like Dynamic Programming, Back tracking, Branch and Bound.

Syllabus

UNIT I	(15 Hours)
Beginning with C++: What is C++? – Applications of C++-Structure of C++Program. Tokens, Expressions and Control structures: Token – Keywords – Identifiers and constants – Basic datatypes–User defined datatypes–Derived datatypes–Operators in C++-Scope resolution operator–Operator overloading–Operator precedence–Control structures.	
UNIT II	(15 Hours)
Functions in C++: The Main function – Function Prototyping – Call by Reference – Call by value – Inline functions – Function overloading – Friend and virtual functions. Classes and Objects: Specifying a class – Defining member functions - Array of object – Friendly function. Constructor and Destructor: Constructors–Copy constructor–Dynamic constructor–Destructor.	
UNIT III	(15 Hours)
Operator overloading and type Conversions: Defining operator overloading – Overloading Unary operator - Overloading Binary operators – Type Conversion. Inheritance: Defining derived classes–Single inheritance–Multilevel inheritance–Multiple inheritance–Hierarchical inheritance–Hybrid inheritance. Pointers: Pointers to objects–this pointer–pointer to derived classes–virtual functions.	
UNIT IV	(15 Hours)
Introduction and Overview: Data structures–Data structure Operations. Arrays, Records and	

Pointers: Linear arrays–Traversing Linear arrays–Inserting and deleting. Linked list: Linked list–Representation of linked list in memory–Traversing linked list–Searching a linked list – Inserting into a linked list– Deletion from a linked list.

UNIT V

(15 Hours)

Stacks, Queues, Recursion: Stacks – Array representation of stacks – linked representation of stacks – Recursion. Queues: Linked representation of Queues – Deques – Priority queues. Sorting: Insertion sort–Merge sort –Selection sort – Radix sort.

*Self-study and questions for examinations may be taken from the self-study portions also.

Teaching Methods:

ChalkandTalk/PowerPointpresentation/Seminar/Brainstorming/Assignment/GoogleClassroom/ Quiz/ Discussion.

Text Book:

1. E. Balagurusamy, “Object Oriented Programming with C++”, 3rd Edition, Tata McGraw Hill publishing Company Ltd,2007.
2. Seymour Lipschutz, G.A. Vijayalakshmi Pai, “Data Structures”, Tata McGraw Hill Publishing Company Limited, 2006.

Title of the Paper:		Core Practical 2- Data Structures using C++ Lab	
Batch	Hours/Week	Total Hours	Credits
2023-2024	5	75	4

Course Objectives

1. To learn the basic concepts of Data Structures.
2. To learn about the concepts of Searching and Sorting.
3. To study about the linear and non-linear Data Structures.
4. To study about the linear and non-linear Data Structures.
5. To learn about the concepts of ADT including List, stack and Queues.

Course Outcomes (CO)

K1 to K5	CO1	Analyze the algorithm's/program's efficiency in terms of time and space complexity
	CO2	Solve the given problem by identifying the appropriate Data Structure.
	CO3	Solve problems in linear and non-linear Data Structures.
	CO4	Develop programs using various searching methods.
	CO5	Solve the problems using Linked List.

LIST OF PRACTICAL PROBLEMS

1. Write a C++ Program to array representation.
2. Write a C++ Program to implement stack and perform push& pop operation.
3. Write a C++ Program to implement queue to insert & delete item.
4. Write a C++ Program to create singly linked list.
5. Write a C++ Program to create doubly linked list.
6. Write a C++ Program to perform circular queue.
7. Write a C++ Program to perform insertion sort.
8. Write a C++ Program to perform merge sort.
9. Write a C++ Program to perform radix sort.
10. Write a C++ Program to perform selection sort.

Teaching Methods:

Program Demonstration and Hands on training using LCD Projector.

Guide lines to the distribution of marks for Practical Examinations:

ProgrammeCode:09		B.Sc. Computer Science	
Title of the Paper:		Core Paper 3 - Java Programming	
Batch	Hours/Week	Total Hours	Credits
2023-2024	4	60	5
Course Objectives			
<div>1. To gain knowledge about basic Java language syntax and semantics to write Java programs and use concepts such as variables, conditional and iterative execution methods etc.</div> <div>2. To understand the fundamentals of object-oriented programming in Java, including managing classes, objects, invoking methods and exception handling mechanisms.</div> <div>3. To know the concepts of inheritance, packages, interfaces and multithreading are introduced.</div>			

Course Outcomes (CO)		
K1 to K5	CO1	Remember the fundamentals of programming such as variables, conditional statements and iterative execution statements.
	CO2	Understand the concepts of arrays, strings, packages and multithreading.
	CO3	Apply the concepts of applet programming, graphics programming and files.
	CO4	Analyze a software application using the Java programming language
	CO5	Evaluate the concepts learnt through implementing and testing of the programs that are developed.

Syllabus	
UNIT I	(12 Hours)
JAVA Evolution: History–Features–How Java differs from C and C++ - Java and Internet- Java and WWW–Web Browsers. Overview of Java Language: Introduction–Simple Java program–Structure– Java Tokens –Statements-Java virtual Machine.	
UNIT II	(12 Hours)
Constants-variables–Datatypes–Operators and Expressions. Decision Making and Branching: If, If-else, elseif ladder, Switch, Conditional operator Decision Making and Looping: While, do, for– jumps in loops-labeled loops. Classes, Objects and Methods.	
UNIT III	(12 Hours)
Arrays, Strings and Vectors - Interfaces: Multiple Inheritance- Packages: Putting classes together *-Multi Threaded Programming.	
UNIT IV	(12 Hours)
Managing Errors and Exceptions–Applet programming–Graphics programming*.	
UNIT V	(12 Hours)
Files: Introduction–conceptofstreams–Streamclasses–Usingstreams–I/Oclasses-Fileclass–I/OExceptions–creationoffiles-Reading/Writingcharacters/Bytes-Handlingprimitive	

datatypes–Random Access Files.

*Self-study and questions for examinations may be taken from the self-study portions also.

Teaching Methods:

Chalk and Talk /Smart Class Room / Powerpoint presentation /Seminar/ Quiz/ Discussion/
Flipped Class / peer Learning/ Experiential Learning/Blended Learning.

ProgrammeCode:09		B.Sc. Computer Science	
Title of the Paper:		Core Practical 3 - Java Programming Lab	
Batch	Hours/Week	Total Hours	Credits
2023-2024	4	60	2
Course Objectives			
1. To understand the object-oriented programming principles implemented through JAVA programs.			
2. To know the event-driven programming methods, including creating and manipulating objects, classes, graphics concepts and applet programming.			
3. To design, code, debug and implement JAVA programs.			

Course Outcomes (CO)		
K1 to K5	CO1	Apply the fundamentals of Java programming language in software development.
	CO2	Examine the basics of Java programming, multi-threaded programs and Exception handling.
	CO3	Analyze and use Java in a variety of applications.
	CO4	Illustrate a software application using the Java programming language.
	CO5	Evaluate the ideas and concepts using testing of the programs.

LIST OF PRACTICAL PROBLEMS	
<ol style="list-style-type: none"> 1. Write a program, which creates and displays a message on the window. 2. Write a program to draw several shapes in the created window. 3. Write a program to create an applet and draw gridlines. 4. Write a java program to create a frame with two buttons called father and mother. When we click the father button the name of the father, his age and designation must appear. When we click mother similar details of mother appear. 5. Write a java program to create four text fields for the name, street, city and pin code with suitable labels. Also add a button called my details, when you click the button your name, street, city and pin code must appear in the text fields. 6. Write a Java program to create a frame with three text fields for name, age and qualification and a text field of multiple line for address. 7. Write a Java program to demonstrate multiple selection list box. 8. Write Java program to create a menu bar and pull-down menus. 9. Write a Java program to create a window when we press M or m the 	

window displays Good Morning A or a the window displays Good Afternoon E or e the window displays Good Evening N or n the window displays Good Night.

10. Write a program to move different shapes (Circle, Ellipse, Square, Rectangle) according to the arrow key pressed.
11. Write a program to draw circle, ellipse, square, rectangle at the mouse click position.
12. Write a program to handle the divide by zero exception.
13. Write a program to create an exception called payout of bounds and throw the exception.
14. Write a program to explain the multithreading with the use of multiplication tables. Three threads must be defined. and each one must create one multiplication table; they are 5 tables, 7 tables and 13 table.
15. Write a program to illustrate thread priority. Create three threads and assign three different priorities.

Teaching Methods:

Program Demonstration and Hands on training using LCD Projector.

Guide lines to the distribution of marks for Practical Examinations:

CIA: Total marks – 40 [Practical – 25, Observation-10, Attendance–5].

ESE: Two Questions will be given for each student. (3 Hours/60marks)

Record: 10Marks

Algorithm, Coding and execution–50Marks

Particulars	Program1 (Marks)	Program2 (Marks)

ProgrammeCode:09		B.Sc. Computer Science	
Title of the Paper:		Core Paper 4-.Net Framework	
Batch	Hours/Week	Total Hours	Credits
2023-2024	4	60	4
<p style="text-align: center;">Course Objectives</p> <ol style="list-style-type: none"> 1. To develop ASP .NET Web application using standard controls. 2. To create rich database applications usingADO.NET. 3. To implement file handling operations. 4. To utilize ASP .NET security features for authenticating the website. 5. To handles SQL Server DatabaseusingADO.NET. 			

Course Outcomes (CO)		
K1 to K5	CO1	To identify and understand the goals and objectives of the .NET frame work and ASP .NET with C# language.
	CO2	To develop web application using various controls.
	CO3	To analyze C# programming techniques in developing web applications.
	CO4	To assess a Web application using Microsoft ADO .NET.
	CO5	To develop a software to solve real-world problems usingASP.NET.

Syllabus	
UNIT I	(12 Hours)
Overview of .NET framework: Common Language Runtime (CLR), Framework Class Library- C# Fundamentals: Primitive types and Variables– Operators- Conditional statements -Looping Statements–Creating and using Objects–Arrays–String operations.	
UNIT II	(12 Hours)
Introduction to ASP.NET-IDE-Languages supported Components-Working with Web Forms – Web form standard controls: Properties and its events–HTML controls-List Controls: Properties and its events.	
UNIT III	(12 Hours)
Rich Controls: Properties and its events – validation controls: Properties and its events– File Stream classes - File Modes – File Share – Reading and Writing to files – Creating, Moving, Copying and Deleting files – File uploading.	
UNIT IV	(12 Hours)
ADO .NET Overview – Database Connections – Commands – Data Reader – Data Adapter- Data Sets –Data Controls and its Properties-Data Binding.	
UNIT V	(12 Hours)
Grid View control: Deleting, editing, Sorting and Paging.XML classes–Web form to manipulate XML files - Website Security - Authentication - Authorization – Creating a Web application.	

*Self-study and questions for examinations may be taken from the self-study portions also.

Teaching Methods:

Chalk and Talk/ Smart Class Room/ Powerpoint presentation/ Seminar/ Quiz/ Discussion/
Flipped Class /peer Learning/Experiential Learning/Blended Learning.

Programme Code:09		B.Sc. Computer Science	
Title of the Paper:		CorePaper5 - Software Engineering and Testing	
Batch	Hours/Week	Total Hours	Credits
2023-2024	6	90	4
<p style="text-align: center;">Course Objectives</p> <ol style="list-style-type: none"> 1. To understand the basic software engineering methods and practices. 2. To familiarize the techniques for developing software systems. 3. To enrich the knowledge about object-oriented design and software testing approaches. 			

Course Outcomes (CO)		
K1 to K5	CO1	Remember the basic concepts of software engineering
	CO2	Understand the software engineering models in developing software applications.
	CO3	Apply the object-oriented design in various projects
	CO4	Analyze the various software testing approaches
	CO5	Evaluate the Software testing Plan and Reporting.

Syllabus	
UNIT I	(18 Hours)
Introduction–The Evolving Role of Software–Software–Software Myths–Software Engineering Technology –Software Process Models–Waterfall model - Incremental process model– Evolutionary process models.	
UNIT II	(18 Hours)
Requirements Engineering: Requirements engineering tasks – Developing use cases– Negotiating requirements–Validating requirements. Building the Analysis model: Requirement Analysis–Data Modeling Concepts– Flow Oriented Modeling.	
UNIT III	(18 Hours)
Design Engineering: Design Concepts– Design Model. Creating an Architectural Design: what Is software architecture-Mapping Data Flow into a Software Architecture Quality Management- Quality Concepts– Software Quality Assurance.	
UNIT IV	(18 Hours)
Testing: Verification and Validation. Types of Testing: White Box Testing - Black Box Testing – Integration Testing and its Types – Scenario Testing – Functional Testing – Non-Functional Testing – Acceptance Testing.	
UNIT V	(18 Hours)
Performance Testing: Introduction–Factors Governing Performance Testing–Methodology for Performance Testing. Regressing Testing: What is Regression Testing–Types of Regression Testing–Test Planning*, Execution and Reporting*.	

*Self-study and questions for examinations may be taken from the self-study portions also.

Batch	Hours/Week	Total Hours	Credits
2023-2024	6	90	4
<div>Course Objectives</div> <div><div>1.</div><div>To gain knowledge on the basic operating system concepts.</div></div> <div><div>2.</div><div>To attain an in-depth understanding of process concepts, deadlock and memory management.</div></div> <div><div>3.</div><div>To get an exposure to scheduling algorithms, devices and information management.</div></div>			

Course Outcomes (CO)		
K1 to K5	CO1	Remember the basic concepts of operating system.
	CO2	Understand the concepts like interrupts, deadlock, memory management and File management.
	CO3	Apply the different algorithms used for representation, scheduling, allocation in DOS and UNIX operating system.
	CO4	Analyze the need for scheduling algorithms.
	CO5	Evaluate the storage management policies with respect to different storage Management techniques.

Syllabus	
UNIT I	(18 Hours)
Introduction and Definition of OS - Process Concept: Definition of Process – Process States – Process State Transition–Interrupt Processing–Interrupt Classes–Context Switching Deadlock: Introduction–Deadlock Prevention–Deadlock Avoidance–Deadlock Detection–Deadlock Recovery–Indefinite Postponement.	
UNIT II	(18 Hours)
Storage Management Real Storage: Real Storage Management Strategies–Contiguous Vs Non-Contiguous Storage Allocation – Single User Contiguous Storage Allocation – Fixed Partition Multiprogramming –Variable Partition Multiprogramming, Multiprogramming with Storage Swapping. Virtual Storage Organization: Evolution and Basic Concepts – Definition of Paging and Segmentation–Virtual Storage Management Strategies- Page Replacement Strategies–Locality.	
UNIT III	(18 Hours)
Processor Management Job and Processor Scheduling: Preemptive Vs Non-Preemptive Scheduling- Priorities– Deadline Scheduling- FIFO– RR– Quantum Size– SJF- SRT–HRN. Distributed Computing: Classification of Sequential and Parallel Processing–Array Processors – Dataflow Computers–Multiprocessing–Fault Tolerance.	
UNIT IV	(18 Hours)

Device and Information Management Disk Performance Optimization: Operation of Moving Head Disk Storage–Need for Disk Scheduling -Seek Optimization–FCFS–SSTF–SCAN –RAM Disks–Optical Disks. File and Database Systems: File System–Functions–Organization–Allocating and Freeing Space–File Descriptor– Access Control Matrix.

UNIT V	(18 Hours)
Case Studies: Linux: History of Linux–Overview of Linux: Linux Goals–Interfaces to Linux – The Shell – Linux Utility Programs – Kernel Structure – Processes: Fundamental Concepts - Memory Management: Fundamental Concepts- File System: Fundamental Concepts-Security: Fundamental Concepts. Windows Vista: History – System Structure: The Kernel Layer- Processes and Threads: Fundamental Concepts*-Caching in Windows Vista–Security: Fundamental Concepts*.

Programme Code:09		B.Sc. Computer Science	
Title of the Paper		Core Paper 7- Database Management System	
Batch	Hours/Week	Total Hours	Credits
2023-2024	5	75	4

Course Objectives

1. To understand the different issues involved in the design of a database system.
2. To know the essential DBMS concepts such as: database security, integrity and normalization.
3. To design and build a simple database system and demonstrate competence with the fundamental tasks involved with modeling and designing a DBMS.

Course Outcomes (CO)

K1 to K5	CO1	Remembered at a independence, data models for database systems, Database schema and database instances.
	CO2	Understand and use data manipulation language to query and manage a database.
	CO3	Analyze and design a real database application.
	CO4	Apply normalization concepts for designing a good database with integrity constraints.
	CO5	Evaluate the principles behind systematic database design approaches by Covering conceptual design, logical design through normalization.

Syllabus

UNIT I	(15 Hours)
Introduction: Purpose of Database Systems - View of Data - Data Models – Database Languages - Transaction Management - Storage Management Database Administrator - Database Users–Overall System Structure. Entity Relationship Model: Basic concepts - Keys - Entity Relationship Diagram, Weak Entity sets, Extended E-R Features: Specialization, generalization.	
UNIT II	(15 Hours)
Relational Model: Relational Algebra- Views. SQL: Background- Basic Structure-Set Operations- Aggregate Functions- Null values -Derived Relations-Views-Modification of the Database-Joined Relations-Data Definition Language.	
UNIT III	(15 Hours)
Integrity Constraints: Domain Constraints- Referential Integrity-Assertions-Triggers. Functional Dependencies– Relational Database Design: Pitfalls–Decomposition-Normalization using Functional Dependencies.	
UNIT IV	(15 Hours)
Object Oriented Databases: New Database Applications-Object Oriented Data Model-Object Oriented Languages -Persistent Programming Languages. Database System Architecture: Centralized Systems- Client/ Server Systems–Parallel Systems- Distributed Systems- Network Types.	
UNIT V	(15 Hours)
New Applications: Decision Support Systems- Data Analysis-Data Mining-Data Warehousing - Spatial and Geographic Databases – Multimedia Databases - Mobility and Personal Databases*-Information-Retrieval Systems-Distributed Information Systems.	

*Self-study and questions for examinations may be taken from the self-study portions also.

2023-2024	6	90	2

Course Objectives

1. To learn and understand DDL&DML
2. To learn and understand DCL.
3. To implement Basic SQL commands.
4. To execute PL/SQL programs.
5. To develop GUI applications in any platform.

Course Outcomes (CO)

K1 to K5	CO1	Implement DDL and DML commands.
	CO2	Implement DCL commands.
	CO3	Analyze PL/SQL programs
	CO4	Understand PL/SQL programs.
	CO5	Develop GUI applications in their known platform.

LIST OF PRACTICAL PROBLEMS

1. Create Table using Data Definition Language (DDL).
2. Modify Table using Data Manipulation Language (DML).
3. Store and Retrieve data through Data Control Language (DCL).
4. Implement Constraints and Built-in functions in various tables.
5. Perform Joins and Group-by functions.
6. Implement Simple Programs in PL/SQL.
7. Create PL/SQL programs using functions.
8. Create PL/SQL programs using Cursor.
9. Create PL/SQL programs using triggers.
10. Developing GUI applications.
 - a. Student Information System.
 - b. Inventory Management.
 - c. Payroll Processing

Semester – VI**Sub.Code: 23USC608**

ProgrammeCode:09	B.Sc. Computer Science		
Title of the Paper	Core Paper 8 - Computer Networks		
Batch	Hours/Week	Total Hours	Credits
2023-2024	4	60	3

Course Objectives

1. To understand the concept of Data communication and Computer network.
2. To get acknowledge on routing algorithms.
3. To impart knowledge about networking and inter-networking devices.
4. To gain the knowledge on Security over Network communication.

Course Outcomes (CO)

K1 to K5	CO1	To Understand the basics of Computer Network architecture, OSI and TCP/IP Reference models.
	CO2	To gain knowledge on Telephone systems and Satellite communications.
	CO3	To impart the concept of Elementary data link protocols.
	CO4	To analyze the characteristics of Routing and Congestion control algorithms.
	CO5	To understand network security and define various protocols such as FTP, HTTP, Telnet, DNS.

Syllabus

UNIT I	(12 Hours)
Introduction–Network Hardware–Software–Reference Models–OSI and TCP/IP Models –Example Networks: Internet, ATM, Ethernet and Wireless LANs-Physical Layer– Theoretical Basis for Data Communication-Guided Transmission Media.	
UNIT II	(12 Hours)
Wireless Transmission- Communication Satellites–Telephone System: Structure, Local Loop, Trunks and Multiplexing and Switching. Data Link Layer: Design Issues– Error Detection and Correction.	
UNIT III	(12 Hours)
Elementary Data Link Protocols- Sliding Window Protocols–Data Link Layer in the Internet-Medium Access Layer–Channel Allocation Problem–Multiple Access Protocols – Bluetooth.	
UNIT IV	(12 Hours)
Network Layer-Design Issues-Routing Algorithms- Congestion Control Algorithms–IP Protocol–IP Addresses–Internet Control Protocols.	
UNIT V	(12 Hours)
Transport Layer-Services-Connection Management-Addressing, Establishing and Releasing A Connection–Simple Transport Protocol–Internet Transport Protocols (ITP)-Network Security: Cryptography.	

*Self-study and questions for examinations may be taken from the self-study portions also.

Teaching Methods:

Programme Code:09		B.Sc. Computer Science	
Title of the Paper:		Core Paper 9 - Python Programming and IoT	
Batch	Hours/Week	Total Hours	Credits
2023-2024	5	75	3

Course Objectives

1. To understand the fundamentals of Python Programming and IOT
2. To get exposure to Programming Raspberry Pi with Python.
3. To acquire knowledge about IOT Enabling Technologies.

Course Outcomes (CO)

K1 to K5	CO1	Remember the concept of operators, datatypes, looping statements in python programming.
	CO2	Understand the concepts of Input / Output operations in file.
	CO3	Apply the various protocols for IOT.
	CO4	Analyze the applications of IOT in Realtime scenario.
	CO5	Evaluate the concept of Python's web Application.

Syllabus

UNIT I	(15 Hours)
Python: Introduction - Standard Data Types – Operators - Statement and expressions – String operations - Control statements- Iteration -While statement - Built-in functions - Composition of functions-User defined functions-Parameters and Arguments-Function calls- The return statement-Python recursive function -List.	
UNIT II	(15 Hours)
Tuples- Dictionaries -Classes and Objects: Overview of OOP. Directories: mkdir(), chdir(). Exception–Modules– Packages-File Handling- Python Packages of Interest for IOT.	
UNIT III	(15 Hours)
Introduction to Internet of Things: Physical Design of IOT - Things in IOT - IOT Protocols - Logical Design of IOT – IOT Functional blocks- IOT Communication models-IOT Communication APIs-IOT Enabling Technologies, IOT Levels. Domain Specific IOTs: Home Automation, Cities, Environment, Energy, Retail, Logistics, Agriculture, Industry, Health & Life Style.	
UNIT IV	(15 Hours)
IOT and M2M: M2M- Difference between IOT and M2M-SDN and NFV for IOT. IOT System Management with NETCONF- YANG: Need for IOT Systems Management-Simple Network Management Protocol (SNMP)-Network Operator Requirements, NETCONF, YANG, IOT Systems management with NETCONF-YANG.	
UNIT V	(15 Hours)
IOT Physical Devices & Endpoints: Basic Building Blocks of an IOT Device-IOT Physical servers and cloud offerings: Introduction to cloud storage Models and communication APIs-WAMP Auto bahn for IOT.	

*Self-study and questions for examinations may be taken from the self-study portions also.

Teaching Methods:

Programme Code:09		B.Sc. Computer Science	
Title of the Paper: Core Paper 10 – Artificial Intelligence and Machine Learning			
Batch	Hours/Week	Total Hours	Credits
2023-2024	5	75	4
<div>Course Objectives<ol style="list-style-type: none">1. To understand the basic concept of AI& ML.2. To understand strength and weakness of problem solving and search algorithms.3. To know about basic concepts of knowledge, and reasoning, Machine Learning.4. To optimize the different linear methods of regression and classification.5. To interpret the different supervised classification methods of support vector machine and tree-based models.</div>			

Course Outcomes (CO)		
K1 to K5	CO1	Evaluate Artificial Intelligence (AI) methods and describe their foundations.
	CO2	Analyze and illustrate how search algorithms play vital role in problem solving, inference, perception, knowledge representation and learning
	CO3	Fundamentals of knowledge representation, building of simple knowledge-based Systems and to apply knowledge representation.
	CO4	To introduce the basic concepts and techniques of machine learning and the need for Machine learning techniques for real world problem
	CO5	To provide understanding of various Machine learning algorithms and the way to Evaluate the performance of ML algorithms.

Syllabus	
UNIT I	(15 Hours)
Foundation and History of AI, Overview of AI problems, Evolution of AI, - Applications of AI, Classification/ Types of AI. Artificial Intelligence vs Machine learning. Intelligent Agent: Types of AI Agent, Concept of Rationality, nature of environment, structure of agents. Turing Test in AI.	
UNIT II	(15 Hours)
Constructing Search Trees, Stochastic Search, AO* Search Implementation, Minimax Search, Alpha-Beta Pruning Basic Knowledge Representation and Reasoning: Propositional Logic, First-Order Logic, Forward Chaining and Backward Chaining, Introduction to Probabilistic Reasoning, Bayes Theorem.	
UNIT III	(15 Hours)
Introduction to Machine Learning: History of ML Examples of Machine Learning Applications, Learning Types, ML Lifecycle, AI & ML, dataset for ML, Data Pre-processing, Training versus Testing, Positive and Negative Class, Cross-validation.	
UNIT IV	(15 Hours)
Types of Learning: Supervised, Unsupervised and Semi-Supervised Learning. Supervised: Learning a Class from Examples, Types of supervised Machine learning Algorithms - Unsupervised: Types of Unsupervised Learning Algorithm, Dimensionality Reduction:	

Introduction to Dimensionality Reduction, Subset Selection, and Introduction to Principal Component Analysis.

UNIT V

(15 Hours)

Supervised Learning: Regression: Linear Regression, Polynomial Regression, logistic regression, Non-linear Regression, Model evaluation methods. **Classification**–support vector machines (SVM), Naïve Bayes classification. **Unsupervised learning:** Nearest neighbor models –K-means–clustering around medoids–silhouettes–hierarchical clustering–k-d trees, Clustering trees.

*Self-study and questions for examinations may be taken from the self-study portions also.

Teaching Methods:

Chalk and Talk /Powerpoint presentation/ Seminar/ Brainstorming/ Assignment/ Google Classroom.

ProgrammeCode:09		B.Sc. Computer Science	
Title of the Paper: Core Practical 6 – Python Programming and IoT Lab			
Batch	Hours/Week	Total Hours	Credits
2023-2024	5	75	3
Course Objectives			
<div>1. To gain knowledge on the concepts of python programming.</div> <div>2. To design IoT applications in different domains and be able to analyze their performance.</div> <div>3. To know the various hardware and sensing technologies to build IoT applications.</div>			

Course Outcomes (CO)		
K1 to K5	CO1	Apply the basic concepts of python programming with IOT.
	CO2	Examine the IOT Enabling Technologies and Domain Specific IOTs.
	CO3	Analyze Programming Raspberry Pi with Python.
	CO4	Illustrate the Python Packages for IOT.
	CO5	Evaluate the ideas and concepts using Python with IOT.

LIST OF PRACTICAL PROBLEMS	
<ol style="list-style-type: none"> 1. Write a python program that displays the following information: Your name, Full address Mobile number, College name, Course subject. 2. Write a python program to find the largest three integers using if-else and conditional operator. 3. Write recursive functions for the factorial of positive integer. 4. Write recursive functions for Fibonacci sequence upto given number. 5. Write a python program that writes a series of random numbers to a file from 1 to n and display. 6. (i) Write a Python program for Switching LED on/off Using any micro controller. (ii) Write a Python program for blinking LED. 7. Write a python program on using any microcontroller to publish temperature data to MQTT broker. 8. Write a program to send sensor data to Smartphone using Bluetooth with any microcontroller. 9. Write a Python program for sending an E-mail on switch press with any micro controller. 10. To interface LED and Switch with any microcontroller and write a python program to control an LED with a switch. 11. Write a python program to create TCP server on any microcontroller 	

And respond with humidity data to TCP client when requested

12. To interface motor using relay with any microcontroller and write a program to turn ON motor when push button is pressed.
13. Write a Python program for implementation of the intrusion detection service that runs on any microcontroller.
14. Write a Python program for implementation of the Smart Parking service that runs on any micro controller.
15. Write a Python program for weather reporting both that tweets weather updates to twitter.

Teaching Methods:

Program Demonstration and Hands on training using LCD Projector.

Guide lines to the distribution of marks for Practical Examinations:

CIA: Total marks–40[Practical – 25, Observation-10, Attendance–5].

ESE: Two Questions will be given for each student. (3Hours/60marks) Record: 10 Marks
Algorithm, Coding and execution – 50 Marks

Particulars	Program1 (Marks)	Program2 (Marks)
Algorithm	5	5
Program Coding	15	15
Result	5	5

ProgrammeCode:09		B. Sc., Computer Science	
Title of the Paper: Project Work and Viva-Voce			
Batch	Hours/Week	Total Hours	Credits
2023-2024	4	60	5

Course Objectives

1. To understand and select the task-based core skills.
2. To get knowledge about analytical skill for solving the selected task.
3. To get confidence for implementing the task and solving the real time problems.

Course Outcomes (CO)

K3 to K5	CO1	Apply the domain specific knowledge and define the project.
	CO2	Analyze the achievable goals and choose the right software for project development
	CO3	Estimate the resources and create the project schedule
	CO4	Test the deliverables
	CO5	Evaluate the project results.

MARK DISTRIBUTION:

	Marks
Project Report*	60
Viva-Voce*	20
Internal	20

*Both Internal & External Examiners shall evaluate Project & Viva-Voce jointly.

Programme Code:09		B.Sc. Computer Science	
Title of the Paper: Allied Paper 4 -Digital Principles and Computer System Architecture			
Batch	Hours/Week	Total Hours	Credits
2023-2024	5	75	5
<div>Course Objectives</div> <div><div>1.</div><div>To know the basics of computer hardware and how software interacts with computer hardware.</div></div> <div><div>2.</div><div>To familiarize with different numbering methods like binary, octal, and hexadecimal.</div></div> <div><div>3.</div><div>To understand the concepts of memory hierarchy and compare different methods for computer architecture.</div></div>			

Course Outcomes (CO)		
K1 to K5	CO1	Remember basic structure of computer, numbering methods, arithmetic and logical operations performed by computers.
	CO2	Understand various data transfer techniques in digital computer and control unit operations.
	CO3	Apply performance issues in processor and memory design of a digital computer various data representations.
	CO4	Analyze architectures and computational designs and computer Architecture concepts related to design of modern processors, memories and I/Os.
	CO5	Evaluate the performance of commercially available computers.

Syllabus	
UNIT I	(15 Hours)
Number Systems and Codes-Binary Number System: Binary to Octal, Decimal, Hexadecimal Conversions – Decimal Number System: Decimal to Binary, Octal, Hexadecimal Conversions – Octal Number System: Octal to Binary, Decimal, Hexadecimal Conversions -Hexadecimal Number System: Hexadecimal to Binary, Octal, Decimal Conversions–ASCII Code–Excess – 3 Code– Gray Code.	
UNIT II	(15 Hours)
Digital Logic: The Basic Gates –AND, OR, NOT–Universal Logic Gates: NAND and NOR – AND- OR-Invert Gates. Combinational Logic Circuits: Boolean Laws and Theorems –Sum-of-Products Method-Truth Table to Karnaugh Map–Pairs, Quads and Octets–Karnaugh Simplification - Don't Care Conditions-Product-of-Sums Method.	
UNIT III	(15 Hours)
Multiplexers – De-multiplexers – 1-of-16 Decoders – BCD-Decimal Decoders - Encoders – Flip-flops: RS Flip-flops- Edge-triggered RS Flip-flops - Edge-triggered D Flip-flops – Edge - triggered JK Flip-flops.	
UNIT IV	(15 Hours)
Central Processing Unit: General Register Organization – Stack Organization – Instruction	

Formats – Addressing Modes. Input–Output Organization: Peripheral Devices * - Input–Output Interface–Asynchronous Data Transfer (strobe control & handshaking) – Priority Interrupt–Direct Memory Access – Input–Output Processor–Serial Communication.

UNIT V **(15 Hours)**

Memory Organization: Memory Hierarchy–Main Memory–Cache Memory–Virtual Memory. Multiprocessors: Characteristics of Multiprocessors*- Inter connection Structures.

*Self-study and questions for examinations may be taken from the self-study portions also.

Teaching Methods:

Chalk and Talk/ Smart Class Room/ Powerpoint presentation/ Seminar/ Quiz/ Discussion/ Flipped Class /peer Learning/Experiential Learning/Blended Learning.

Text Book:

1. Albert Malvino, Donald P. Leach (1995), “**Digital Principles and Applications**”, Third Edition, McGraw Hill Company [Unit I, II, III].
2. M. Morrismano (1999), “**Computer system Architecture**”, 3rd Edition, Pearson Education Publications, [Unit IV, V].

MAJOR ELECTIVE PAPERS

ProgrammeCode:09		B.Sc. Computer Science	
Title of the Paper		Major Elective - Data Mining and Warehousing	
Batch	Hours/Week	Total Hours	Credits
2023-2024	5	75	5

Course Objectives

1. To provide the knowledge on Data Mining and Warehousing concepts and techniques.
2. To study the basic concepts of cluster analysis.
3. To study a set of typical clustering methodologies, algorithms, and applications.

Course Outcomes (CO)

K1 to K5	CO1	To understand the basic concepts and the functionality of the various data Mining and data warehousing component
	CO2	To know the concepts of Data mining system architectures.
	CO3	To analyze the principles of association rules.
	CO4	To get analytical idea on Classification and prediction methods.
	CO5	To Gain knowledge on Cluster analysis and its methods.

Syllabus

UNIT I	(15 Hours)
Introduction: Datamining–Functionalities–Classification–Introduction to Data Warehousing– Data Preprocessing: Preprocessing the Data–Data cleaning–Data Integration and Transformation – Data Reduction.	
UNIT II	(15 Hours)
Data Mining, Primitives, Languages and System Architecture: Data Mining– Primitives–Data Mining Query Language, Architecture of Datamining Systems. Concept Description, Characterization and Comparison: Concept Description, Data Generalization and Summarization, Analytical Characterization, Mining Class Comparison– Statistical Measures.	
UNIT III	(15 Hours)
Mining Association Rules: Basic Concepts– Single Dimensional Boolean Association Rules From Transaction Databases, Multilevel Association Rules from transaction databases– Multidimension Association Rules from Relational Database and Data Warehouses.	
UNIT IV	(15 Hours)
Classification and Prediction: Introduction–Issues–Decision Tree Induction–Bayesian Classification of Back Propagation. Classification based on Concepts from Association Rule Mining – Other Methods. Prediction –Introduction–Classifier Accuracy.	
UNIT V	(15 Hours)
Cluster Analysis: Introduction– Types of Data in Cluster Analysis, Partitioning Methods–Hierarchical Methods–Density Based Methods–GRID Based Method– Model based Clustering Method.	
*Self-study and questions for examinations may be taken from the self-study portions also.	

Teaching Methods:
Chalk and Talk / Powerpoint presentation /Seminar/ Brainstorming/ Assignment/ Google Classroom / Quiz/ Discussion.
Text Book:
1. Hanand M. Kamber, “Data Mining Concepts and Techniques”, 2001, Harcourt India Pvt. Ltd, New Delhi.

ProgrammeCode:09	B.Sc. Computer Science		
Title of the Paper	Major Elective- Network Security		
Batch	Hours/Week	Total Hours	Credits
2023-2024	5	75	5

Course Objectives

1. To study the number theory used for network security.
2. To understand the design concept of cryptography and authentication.
3. To develop experiments on algorithm used for security.

Course Outcomes (CO)

K1 to K5	CO1	To understand the basic concepts and the functionality of the various network Security attacks, services.
	CO2	To know the concepts of network security.
	CO3	To analyze the principles of Public key cryptography and RSA.
	CO4	To get analytical idea on Authentication applications.
	CO5	To Gain knowledge on Intrusion detection system.

Syllabus

UNIT I	(15 Hours)
Model of network security– Security attacks, services and attacks– OSI security architecture –Classical encryption techniques–SDS–Block cipher Principles DES–Strength of DES– Block cipher design principles–Block cipher mode of operation–Evaluation criteria for AES –RC4-Differentialandlinearcryptanalysis–Placementofencryptionfunction–traffic confidentiality.	
UNIT II	(15 Hours)
Number Theory – Prime number – Modular arithmetic – Euclid’s algorithm - Fermat’s and Euler’s theorem – Primality – Chinese remainder theorem – Discrete logarithm – Public key cryptography and RSA–Key distribution–Key management–Diffie Hellman key exchange– Elliptic curve cryptography.	
UNIT III	(15 Hours)
Authentication requirement–Authentication function–MAC–Hash function– Security of hash function and MAC–SHA-HMAC–CMAC-Digital signature and authentication protocols– DSS.	
UNIT IV	(15 Hours)
Authentication applications–Kerberos–X.509 Authentication services- E- mail security–IP security-Web security.	
UNIT V	(15 Hours)
Intruder–Intrusion detection system–Virus and related threats–Counter measures–Firewalls Design principles–Trusted systems–Practical implementation of cryptography and security.	
*Self-study and questions for examinations may be taken from the self- study portions also.	

Teaching Methods:
Chalk and Talk/Powerpoint presentation/Seminar/Brainstorming/Assignment/Google Classroom/Quiz/ Discussion.

ProgrammeCode:09		B.Sc. Computer Science	
Title of the Paper		Major Elective - Advanced Robotics and its Applications	
Batch	Hours/Week	Total Hours	Credits
2023-2024	5	75	5

Course Objectives

1. To make the students familiar with the various drive systems of robots, sensors and their applications in robots.
2. To introduce the parts of robots, basic working concepts and types of robots.

Course Outcomes (CO)

K1 to K5	CO1	Describe the different physical forms of robot architectures.
	CO2	Kinematically model simple manipulator and mobile robots.
	CO3	Mathematically describe a kinematic robot system.
	CO4	Analyze manipulation and navigation problems using knowledge of Coordinate frames, kinematics, optimization, control, and uncertainty.
	CO5	Program robotics algorithms related to kinematics, control, optimization, and uncertainty.

Syllabus

UNIT I	(15 Hours)
Introduction: Introduction, brief history, components of robotics, classification, workspace, work-envelop, motion of robotic arm, end-effectors and its types, service robot and its application, Artificial Intelligence in Robotics.	
UNIT II	(15 Hours)
Actuators and sensors: Types of actuators, stepper- DC- servo- and brush less motors-model of a DC servo motor- types of transmissions- purpose of sensor-internal and external sensor-common sensors-encoders tachometers-strain gauge based force torque sensor-proximity and distance measuring sensors-Kinematics of robots: Representation of joints and frames, frames transformation, homogeneous matrix, D-H matrix, Forward and inverse kinematics: two link planar(RR) and spherical robot(RRP). Mobile robot Kinematics: Differential wheel mobile robot.	
UNIT III	(15 Hours)
Localization: Self-localizations and mapping-Challenges in localizations-IR based localizations – vision based localizations-Ultrasonic based localizations - GPS localization systems.	
UNIT IV	(15 Hours)
Path Planning: Introduction, path planning-overview-road map path planning-cell decomposition path planning potential field path planning-obstacle avoidance-case studies Vision system: Robotic vision systems-image representation-object recognition-and categorization-depth measurement- image data compression-visual inspection-software considerations.	
UNIT V	(15 Hours)

Application: Ariel robots-collision avoidance robots for agriculture- mining-exploration- under water-civilian-and military applications -nuclear applications -space applications- Industrial robots-artificial intelligence in robots- application of robots in material handling- Continuous arc welding-spot welding-spray painting-assembly operation-cleaning-etc.

*Self-study and questions for examinations may be taken from the self-study portions also.

Title of the Paper		Major Elective -Introduction to Data Science	
Batch	Hours/Week	Total Hours	Credits
2023-2024	5	75	5

Course Objectives

1. To introduce the concepts, techniques and tools in Data Science
2. To understand the various facets of data science practice, including data collection and integration, exploratory data analysis, predictive modeling, descriptive modeling and Effective communication.

Course Outcomes (CO)

K1 to K5	CO1	To describe what Data Science is, what Statistical Inference means, identify probability distributions, fit a model to data and use tools for basic analysis and communication.
	CO2	To describe what Data Science is, what Statistical Inference means, identify probability distributions, fit a model to data and use tools for basic analysis and communication.
	CO3	To describe what Data Science is, what Statistical Inference means, identify probability distributions, fit a model to data and use tools for basic analysis and communication.
	CO4	To describe what Data Science is, what Statistical Inference means, identify probability distributions, fit a model to data and use tools for basic analysis and communication.
	CO5	To describe what Data Science is, what Statistical Inference means, identify probability distributions, fit a model to data and use tools for basic analysis and communication.

Syllabus

UNIT I	(15 Hours)
Benefits and uses–Facets of data–Data science process–Bigdata eco system and data science.	
UNIT II	(15 Hours)
The Data science process: Overview–research goals-retrieving data-transformation– Exploratory Data Analysis –Model building.	
UNIT III	(15 Hours)
Algorithms: Machine learning algorithms–Modeling process–Types–Supervised– Unsupervised– Semi-supervised.	
UNIT IV	(15 Hours)
Introduction to Hadoop: Hadoop framework–Spark–replacing Map Reduce–NoSQL–ACID –CAP – BASE – types.	
UNIT V	(15 Hours)
Case Study: Prediction of Disease- Setting research goals-Data retrieval–preparation- exploration- Disease profiling-presentation and automation.	
*Self-study and questions for examinations may be taken from the self-study portions also.	

Teaching Methods:
Chalk and Talk/Powerpoint presentation/Seminar/Brainstorming/Assignment/Google Classroom/Quiz/ Discussion.

ProgrammeCode:09		B.Sc. Computer Science	
Title of the Paper		Major Elective - Cloud Computing	
Batch	Hours/Week	Total Hours	Credits
2023-2024	5	75	5

Course Objectives

1. To impart fundamental concepts of Cloud Computing.
2. To impart a working knowledge of the various cloud service types and their uses and pitfalls.
3. To enable the students to know the common features and differences in the service offerings of the three major Cloud Computing service providers, namely Amazon, Microsoft and Google.
4. To provide know-how of the various aspects of application design, benchmarking and security on the Cloud.

Course Outcomes (CO)

K1 to K5	CO1	To understand the concepts and technologies involved in Cloud Computing.
	CO2	To understand the concepts of various cloud services and their implementation in the Amazon, Microsoft and Google cloud computing platforms.
	CO3	To understand the aspects of application design for the Cloud.
	CO4	To understand the concepts involved in benchmarking and security on the Cloud.
	CO5	To understand the way in which the cloud issued in various domains.

Syllabus

UNIT I	(15 Hours)
Introduction to Cloud Computing: Definition of Cloud Computing–Characteristics of Cloud Computing– Cloud Models–Cloud Service Examples–Cloud-based Services and Applications -Cloud Concepts and Technologies: Virtualization–Load balancing – Scalability and Elasticity– Deployment–Replication–Monitoring–Software Defined Networking– Network Function Virtualization – MapReduce–Identity and Access Management–Service Level Agreements–Billing.	
UNIT II	(15 Hours)
Cloud Services : Compute Services: Amazon Elastic Computer Cloud - Google Compute Engine-Windows Azure Virtual Machines. Storage Services: Amazon Simple Storage Service- Google Cloud Storage - Windows Azure Storage - Database Services: Amazon Relational Data Store - Amazon Dynamo DB - Google Cloud SQL - Google Cloud Data Store – Windows Azure SQL Database - Windows Azure Table Service - Application Services: ApplicationRuntimesandFrameworks-QueuingServices-EmailServices-NotificationServices Media Services- Content Delivery Services: Amazon Cloud Front- Windows Azure Content Delivery Network - Analytics Services: Amazon Elastic MapReduce - Google MapReduce Service -Google Big Query - Windows Azure HDInsight - Deployment and Management Services:	

Amazon Elastic Bean stack- Amazon Cloud Formation Identity and Access Management Services: Amazon Identify and Access Management- Windows Azure Active Directory-Open Source Private Cloud Software: Cloud Stack– Eucalyptus-OpenStack.	
UNIT III	(15 Hours)
Cloud Application Design: Introduction – Design Consideration for Cloud Applications – Scalability–ReliabilityandAvailability–Security–MaintenanceandUpgradation–Performance – Reference Architectures for Cloud Applications – Cloud Application Design Methodologies: Service Oriented Architecture (SOA), Cloud Component Model, IaaS, PaaS and SaaS Services for Cloud Applications, Model View Controller (MVC), REST full Web Services –Data Storage Approaches: Relational Approach (SQL), Non-Relational Approach (NoSQL).	
UNIT IV	(15 Hours)
Cloud Application Benchmarking and Tuning: Introduction to Benchmarking – Steps in Benchmarking–Workload Characteristics–Application Performance Metrics–Design Consideration for Benchmarking Methodology – Benchmarking Tools and Types of Tests – Deployment Prototyping- Cloud Security: Introduction–CSA Cloud Security Architecture– Authentication (SSO)–Authorization–Identity and Access Management– Data Security: Securing data at rest, securing data in motion–Key Management–Auditing.	
UNIT V	(15 Hours)
Case Studies: Cloud Computing for Healthcare–Cloud Computing for Energy Systems-Cloud Computing for Transportation Systems- Cloud Computing for Manufacturing Industry -Cloud Computing for Education.	
*Self-study and questions for examinations may be taken from the self-study portions also.	
Teaching Methods:	
ChalkandTalk/Powerpointpresentation/Seminar/Brainstorming/Assignment/GoogleClassroom/ Quiz/ Discussion.

ProgrammeCode:09		B.Sc. Computer Science	
Title of the Paper		Major Elective - Computing Intelligence	
Batch	Hours/Week	Total Hours	Credits
2023-2024	5	75	5
Course Objectives <ol style="list-style-type: none"> 1. To provide strong foundation on fundamental concepts in Computing Intelligence. 2. To apply basic principles of Artificial Intelligence and solutions that require problem solving, influence, perception, knowledge representation and learning. 			

Course Outcomes (CO)		
K1 to K5	CO1	Describe the fundamentals of artificial intelligence concepts and searching techniques.
	CO2	Develop the fuzzy logic sets and membership function and defuzzification techniques.
	CO3	Understand the concepts of Neural Network and analyze and apply the learning techniques.
	CO4	Understand the artificial neural networks and its applications.
	CO5	Understand the concept of Genetic Algorithm and Analyze the optimization problems using GAs.

Syllabus	
UNIT I	(15 Hours)
Introduction to AI: Problem formulation–AI Applications–Problems–State Space and Search–Production Systems–Breadth First and Depth First–Travelling Salesman Problem – Heuristic search techniques: Generate and Test–Types of Hill Climbing.	
UNIT II	(15 Hours)
Fuzzy Logic Systems: Notion of fuzziness – Operations on fuzzy sets – T-norms and other aggregation operators – Basics of Approximate Reasoning – Compositional Rule of Inference – Fuzzy Rule Based Systems–Schemes of Fuzzification–Inferencing–Defuzzification–Fuzzy Clustering–fuzzy rule-based classifier.	
UNIT III	(15 Hours)
Neural Networks: What is Neural Network, learning rules and various activation functions, Single layer Perceptions, Back Propagation networks, Architecture of Backpropagation (BP) Networks, Backpropagation Learning, Variation of Standard Backpropagation Neural Network, Introduction to Associative Memory, Adaptive Resonance theory and Self Organizing Map, Recent Applications.	
UNIT IV	(15 Hours)
Artificial Neural Networks: Fundamental Concepts–Basic Models of Artificial Neural Networks–Important Terminologies of ANNs–McCulloch-Pitts Neuron–Linear Separability – Hebb Network.	
UNIT V	(15 Hours)
Genetic Algorithm: Introduction – Biological Background – Genetic Algorithm Vs Traditional Algorithm–Basic Terminologies in Genetic Algorithm–Simple GA–General Genetic Algorithm –Operators in Genetic Algorithm.	

*Self-study and questions for examinations may be taken from the self-study portions also.

Teaching Methods:

Chalk and Talk/Powerpoint presentation/Seminar/Brainstorming/Assignment/Google Classroom/Quiz/ Discussion.

ProgrammeCode:09		B.Sc. Computer Science	
Title of the Paper:		Skill Based Subject 1 - Cyber Security	
Batch	Hours/Week	Total Hours	Credits
2023-2024	2	30	3
Course Objectives			
1. The course introduces the basic concepts of Cyber Security.			
2. To develop an ability to understand about various modes of Cyber Crimes and Preventive measures.			
3. To understand about the Cyber Legal laws and Punishments.			

Course Outcomes (CO)		
K1	CO1	To Understand the Concepts of Cybercrime and Cyber Frauds
K2	CO2	To Know about Cyber Terrorism and its preventive measures
K3	CO3	To Analyze about the Internet, Mobile Phone and E-commerce security issues
K4	CO4	To Understand about E-mail and Social Media Issues
K5	CO5	To Describe about various legal responses to Cybercrime

Syllabus	
UNIT I	(6 Hours)
Introduction to Cyber Security: Definition of Cyber Security-Why is Cyber Security important? Layers of Cyber Security-Evolution of Cyber Security. Cyber hacking- Cyber fraud: Definition- Different modes of cyber fraud- Cyber fraud in India. Cyber pornography.	
UNIT II	(6 Hours)
Cyber Terrorism: Modes of cyber terrorism. Cybercrime: What is Cybercrime? Cyber crime preventive methods - Preventive steps for individuals & organizations - Kinds of cybercrime - Malware and its types- Cyber attacks.	
UNIT III	(6 Hours)
Internet Mobile Phone and E-commerce Security issues: Data theft-Punishment of data theft-Theft of internet hours-Internet safety tips for children & parents. Mobile phone privacy-E-Commerce security issues.	
UNIT IV	(6 Hours)
Email and Social media issues: Aspects of Social Media - The Vicious Cycle of unhealthy social media use- Modifying social media use to improve mental health. Computer Virus - Antivirus- Firewalls.	
UNIT V	(6 Hours)
Cyber Forensics and Digital Evidence: What does Digital Footprint Mean -Web Browsing and Digital Footprints-Digital Footprint examples-How to Protect Your Digital Footprints-How to erase your Footprints? - Browser Extensions and Search Engine Deletion - Cyber Crime and Cyber Laws - Common Cyber Crimes and Applicable Legal Provisions: A Snapshot - Cyber Law (IT Law) in India-TheInformationTechnologyActofIndia2000-CyberLaw and Punishments in India-Cyber Crime Prevention guide to users - Regulatory Authorities.	

*Self-study and questions for examinations may be taken from the self-study portions also.

Title of the Paper: Skill Based Subject 2- Mobile Application Development Lab			
Batch	Hours/Week	Total Hours	Credits
2023-2024	2	30	3
<div>Course Objectives</div> <div><div>1.</div><div>To understand the Android application development environment.</div></div> <div><div>2.</div><div>To know the user interfaces for interacting with apps and triggering actions.</div></div> <div><div>3.</div><div>To realize the tasks used in handling multiple activities.</div></div>			

Course Outcomes (CO)		
K1 to K5	CO1	Apply the skills for designing and implementing basic mobile apps
	CO2	Examine the basic programming skills needed for developing mobile apps for a specific platform.
	CO3	Analyze the options to save persistent application data
	CO4	Illustrate the role of security and performance in Android applications
	CO5	Evaluate the functionality of mobile application using androids dk

LIST OF PRACTICAL PROBLEMS	
<ol style="list-style-type: none"> 1. Develop an application that uses GUI components, Font and Colors. 2. Develop an application that uses Layout Managers and event listeners. 3. Develop a native calculator application using UI Widgets. 4. Write an application that draws basic graphical primitives on the screen. 5. Develop an application that uses Multiple Font and Colors using UI Widgets. 6. Develop a native application that uses GPS location information. 7. Implement an application that writes data to the SD card using UI Widgets. 8. Implement an application that creates an alert upon receiving a message. 9. Write a mobile application that creates alarm clock using UI Widgets. 10. Develop a mobile application to send an email. 	
Teaching Methods:	
Program Demonstration and Hands-on training using LCD Projector.	
<u>Guide lines to the distribution of marks for Practical Examinations:</u>	
CIA: Total marks–40 [Practical – 25, Observation-10, Attendance–5].

Title of the Paper:		Skill Based Subject 3 - Software Testing Lab	
Batch	Hours / Week	Total Hours	Credits
2023-2024	2	30	3

Course Objectives

1. To gain knowledge about recording the test case.
2. To design and construct the test cases.
3. To learn about the concepts of assert, verification, wait commands.

Course Outcomes (CO)

K3 to K5	CO1	Apply validation and verification in web applications.
	CO2	Analyze the fields of the text area in the applications.
	CO3	Implement the concepts of assert and verify.

LIST OF PRACTICAL PROGRAMS

1. Write a test case for performing the Calculator Operations using HTML and Validate using Selenium IDE.
2. Write a test case for a creating a link for a Paint Brush image using HTML and Validate using Selenium IDE
3. Write a test case for scrolling a text developed using HTML and Validate using Selenium IDE.
4. Write a test case for creating a Department webpage developed using HTML and Validate using Selenium IDE.
5. Write a test case for calculating the Student Mark list using Java script and Validate using Selenium IDE.
6. Write a test case for designing an Employee form and calculating employee salary using Java script and Validate using Selenium IDE.
7. Write a test case for developing a College application form using PHP and Validate using Selenium IDE.
8. Write a test case for developing the Customer Registration form using PHP and Validate using Selenium IDE.

Guidelines to the distribution of marks for Practical Examinations:

Two Questions will be given for each student. (3 Hours/60 marks)

Extra Departmental Course

Programme Code:09		B.Sc. Computer Science	
Title of the Paper:		EDC - Web Development Laboratory	
Batch	Hours/Week	Total Hours	Credits
2023-2024	2	30	3
<p style="text-align: center;">Course Objectives</p> <ol style="list-style-type: none"> 1. To design and develop websites using fundamental web languages, technologies, and tools. 2. To implement the concepts in visual design and content structuring 3. To develop an ability to design and implement static and dynamic website 4. To develop skills in analyzing the usability of a web site. 5. To demonstrate the role of languages like HTML, CSS, JavaScript, PHP and protocols in the workings of the web and web applications. 			

Course Outcomes (CO)		
K1 to K5	CO1	Understanding the use of HTML tags.
	CO2	Create web pages using HTML and Cascading Stylesheets and Develop dynamic web pages using JavaScript.
	CO3	Use cascading style sheets to design web pages
	CO4	Use JavaScript and HTML to create web pages with advanced interactivity.
	CO5	Understand, analyze and build web applications using PHP and Integrate HTML forms to PHP scripts.

LIST OF PRACTICAL PROBLEMS	
<ol style="list-style-type: none"> 1. Design a page having suitable background color and text color with title “My First Web Page” using all the attributes of the Font tag and Create a HTML document giving details of your [Name, Age], [Address, Phone] and [Register Number, Class] aligned in proper order using alignment attributes of Paragraph tag. 2. Write HTML code to design a page containing some text in a paragraph by giving suitable heading style. 3. Write HTML code to create a Web Page that contains an Image at its center and description of the image. 4. Use table tag to format web page and also create the Time Table of your class using table. 5. Create your profile page i.e. educational details, Hobbies, Achievement, My Ideals etc. 6. Develop and demonstrate the usage of inline, internal and external style sheet using CSS. 7. Write an HTML page that contains a selection box with a list of 5 countries. 	

<p>When the user selects a country, its capital should be printed next in the list. Add CSS to customize the properties of the font of the capital (color, bold and font size).</p> <p>8. A web application that takes name and age from an HTML page. If the age is less than 18, it should send a page with “Hello, you are not authorized to visit the site” message, where should be replaced with the entered name. Otherwise, it should send “Welcome to this site” message.</p> <p>9. Design a web page for your Department.</p> <p>10. Design the following static web pages required for an online bookstore web site.</p> <p>1) HOME PAGE: The static home page must contain three frames.</p> <p>2) LOGIN PAGE</p> <p>3) CATALOGUE PAGE: The catalogue page should contain the details of all the books available in the web site in a table.</p> <p>4) REGISTRATION PAGE</p> <p>11. Write JavaScript to validate the following fields of the Registration page.</p> <p>1. First Name (Name should contain alphabets and the length should not be less than 6 characters).</p> <p>2. Password (Password should not be less than 6 characters length).</p> <p>3. E-mail id (should not contain any invalid and must follow the standard pattern name@domain.com)</p> <p>4. Mobile Number (Phone number should contain 10 digits only).</p> <p>5. Last Name and Address (should not be Empty).</p> <p>12. Write PHP program to upload registration form into database and Display the Registration form from the database.</p>	<p>Text Books</p> <p>1. Jon Duckett (2000) – “Beginning Web Programming With HTML, XHTML AND CSS”, – Second Edition, Wiley India Pvt Ltd.</p> <p>2. Programme Code:09	B.Sc. Computer Science		
Title of the Paper:	Environmental Studies		
Batch	Hours/Week	Total Hours	Credits
2023 - 2024	2	30	2

Course Objectives

1. The course will provide students with an understanding and appreciation of the complex interactions of man, health and the environment. It will expose students to the multi-disciplinary nature of environmental health sciences.
2. To inculcate knowledge and create awareness about ecological and environmental concepts, issues and solutions to environmental problems.
3. To shape students into good “Eco citizens” there by catering to global environmental needs.
4. This course is designed to study about the types of pollutants including gases, chemicals petroleum, noise, light, global warming and radiation as well as pollutant flow and recycling and principles of environmental pollution such as air, water and soil.
5. The course will address environmental stress and pollution, their sources in natural and workplace environments, their modes of transport and transformation, their ecological and public health effects, and existing methods for environmental disease prevention and remediation.

Course Outcomes (CO)

K1 to K5	CO1	Understand how interactions between organisms and their environments drive the dynamics of individuals, populations, communities and ecosystems.
	CO2	Develop an in-depth knowledge on the interdisciplinary relationship of cultural, ethical and social aspects of global environmental issues.
	CO3	Acquiring values and attitudes towards complex environmental socio-economic challenges and providing participatory role in solving current environmental problems and preventing the future ones.
	CO4	To gain inherent knowledge on basic concepts of biodiversity in an ecological context and about the current threats of biodiversity.
	CO5	To appraise the major concepts and terminology in the field of environmental pollutants, its interconnections and direct damage to the wildlife, in addition to human communities and ecosystems.

Syllabus

UNIT I	(6 Hours)
Multidisciplinary Nature of Environment: Definition: scope and importance–Need for public Awareness - Natural resources–Types of resources–Forest Resources–Water Resources–Mineral Resources –Food Resources–Energy Resources – Land Resources.	
UNIT II	(6 Hours)
Ecosystems: Concept of an ecosystem – Structure and functions of an ecosystem–Procedures, consumers and decomposers – Energy flow in the ecosystem – Ecological succession – Food chains, food web and ecological pyramids–Structure and function of the following ecosystem – Forest Ecosystem–Grassland Ecosystem –Desert Ecosystem –Aquatic Ecosystem.	
UNIT III	(6 Hours)

Biodiversity and its Conservation: Introduction – Definition – Genetic –Species and ecosystem diversity - Biogeographical classification of India–Value of biodiversity–Biodiversity at global, national and local levels – India as a mega - diversity Nation - Hot spot of biodiversity–Threats to biodiversity–Endangered and endemic species of India– Conservation of Biodiversity–Insitu–Conservation of Biodiversity–Exsitu–Conservation of Biodiversity.	
UNIT IV	(6 Hours)
Environmental Pollution: Definition- Causes, effects and control measures of: Air Pollution – Water Pollution – Soil Pollution – Marine Pollution – Noise Pollution – Thermal Pollution – Nuclear Pollution – Solid Waste Management: Causes, effects, control measures of urban and industrial wastes – Role of individual in prevention of pollution – Pollution case studies – domestic waste water, effluent from paper mill and dyeing, cement pollution–Disaster Management–Food, Drought, Earthquake, Tsunami, Cyclone and Landslide.	
UNIT V	(6 Hours)
Social Issues and the Environment: Sustainable Development–Smart City, Urban planning, Town Planning, Urban problems related to energy–Water Conservation: Rain Water Harvesting and Watershed Management–Resettlement and rehabilitation of people, its problems and concerns, case studies Narmatha Valley Project – Environmental ethics, issues and possible solutions – Climate change, global warming, ozone layer depletion, acid rain, nuclear accidents and holocaust, case studies–Hiroshima and Nagasaki, Chernobyl– Consumerism and waste products–Environmental Protection Act–Air Pollution Act(Prevention and Control)–Water Pollution Act(Prevention and control)–Wild Life Protection Act– Forest Conservation Act–Issues involved in enforcement environmental legislation–Public awareness–Human Population and the environment–Population Growth and Distribution – Population Explosion – Family Welfare Programme – Environment and Human Health–Human Rights–Value Education–HIV/AIDS–Women and Child-Welfare–Role of Information Technology in Environment and Human Health.	
*Self-study and questions for examinations may be taken from the self-study portions also.	
Teaching Methods:	
ChalkandTalk/Powerpointpresentation/Seminar/Brainstorming/Assignment/GoogleClassroom.	
Text Book:

Programme Code:09		B.Sc. Computer Science	
Title of the Paper:		Value Education – Moral and Ethics**	
Batch	Hours/Week	Total Hours	Credits
2023-2024	2	30	2
<p style="text-align: center;">Course Objectives</p> <ol style="list-style-type: none"> 1. To impart Value Education in every walk of life. 2. To help the students to reach excellence and reap success. 3. To impart the right attitude by practicing self-introspection. 4. To portray the life and messages of Great Leaders. 5. To insist the need for universal brother hood, patience and tolerance. 6. To help the students to keep them fit. 7. To educate the importance of Yoga and Meditation. 			

Course Outcomes (CO)		
K1 to K5	CO1	Will be able to recognize Moral values, Ethics, contribution of leaders, Yoga and its practice
	CO2	Will be able to differentiate and relate the day to day applications of Yoga and Ethics in real life situations
	CO3	Can emulate the principled life of great warriors and take it forward as a message to self and the society
	CO4	Will be able to analyze the Practical outcome of practicing Moral values in real life situation
	CO5	Could evaluate and Rank the outcome of the pragmatic approach to further develop the skills

Syllabus	
UNIT I	(6 Hours)
Moral and Ethics: Introduction–Meaning of Moral and Ethics–Social Ethics–Ethics and Culture– Aim of Education.	
UNIT II	(6 Hours)
Life and Teachings of Swami Vivekananda: Birth and Childhood days of Swami Vivekananda – At the Parliament of Religions–Teachings of Swami Vivekananda.	
UNIT III	(6 Hours)
Warriors of our Nation: Subhas Chandra Bose–Sardhar Vallabhbhai Patel–Udham Singh–V. O. Chidambaram Pillai – Bhagat Singh – Tiruppur Kumaran – Dheeran Chinnamalai – Thillaiaadi Valliammai – Velu Nachiyar – Vanchinathan.	
UNIT IV	(6 Hours)
Physical Fitness and Mental Harmony: Simplified Physical Exercise–Hand Exercises–Leg Exercises–Neuro Muscular Breathing Exercises–Eye Exercises–Kabalabathi–Maharasana A & B –Massage–Acupressure–Relaxation–Kayakalpa Yogam–Life Force–Aim & Objectives– Principle–Methods. Introspection–Analysis of Thoughts–Moralization of Desires– Neutralization of Anger–Eradication of Worries.	
UNIT V	(6 Hours)

Yoga and Meditation–The Asset of India: Yogasanam–Rules & Regulations–Surya Namaskar–Asanas–Sitting–Stanging–Prone -Supine-Pranayama–Naadi Sudhi–Ujjayi –Seethali–Sithkari-Benefits. Meditation–Thanduvassudhi - Agna–Shanthi–Thuriyam–Benefits.

*Self-study and questions for examinations may be taken from the self-study portions also.

Teaching Methods:

ChalkandTalk/Powerpointpresentation/Seminar/Brainstorming/Assignment/GoogleClassroom.

Text Book:

1. Value Based Education –Moral and Ethics–Published by Kongunadu Arts and Science College (Autonomous),2nd Edition (2021).

3. Freedom Fighters of India, Lion M.G. Agrawal, Isha Books Publisher, First Edition (2008).
4. Easy steps to Yoga by Swami Vivekananda, A Divine Life Society Publication (2000).
5. Yoga Practices -1–The World Community Service Centre –Vethathiri Publications, Sixth Edition (2017), Erode.
6. Yoga Practices -2–The World Community Service Centre –Vethathiri Publications–Eighth Edition (2017), Erode.

NON MAJOR ELECTIVE PAPERS

ProgrammeCode:09		B.Sc. Computer Science	
Title of the Paper:		Non-Major Elective - Human Rights	
Batch	Hours/Week	Total Hours	Credits
2023-2024	2	30	2
Course Objectives			
1. To prepare for responsible citizenship with awareness of the relationship between Human Rights, democracy and development.			
2. To impart education on national and international regime on Human Rights.			
3. To sensitive students to human suffering and promotion of human life with dignity.			
4. To develop skills on human rights advocacy			
5. To appreciate the relationship between rights and duties			
6. To foster respect for tolerance and compassion for all living creature.			

Course Outcomes (CO)		
K1 to K5	CO1	To understand the hidden truth of Human Rights by studying various theories.
	CO2	To acquire over all knowledge regarding Human Rights given by United Nation Commission. (UNO)
	CO3	To gain knowledge about various organs responsible for Human Rights such as National Human Rights Commission and state Human Right commission. (UNHCR)
	CO4	To get habits of how to treat aged person, others and positive social responsibilities.
	CO5	To treat and confirm, child, refugees and minorities with positive social justice.

Syllabus	
UNIT I	(6 Hours)
Definition, Meaning, Concept, Theories and Kinds of Human Rights-Evaluation and Protection of Human Rights in India-Development of Human Rights under the United Nations.	
UNIT II	(6 Hours)
United Nations Charter and Human Rights-U.N. Commission on Human Rights-Universal Declaration of Human Rights-International Covenant on <ul style="list-style-type: none"> • Civil & Political Rights • Economic, Social and Cultural Rights. 	
UNIT III	(6 Hours)
Human Rights and Fundamental Rights (Constitution)-Enactments regarding Human Rights Laws in India- National Human Rights Commission and State Human Rights Commission.	
UNIT IV	(6 Hours)

Aged persons and their Human Rights- Human Rights of Persons with Disabilities-Tribal Human Rights in India- Three Generation Human Rights-Social Awareness and responsibilities of Individuals.

UNIT V	(6 Hours)
Rights of Women, Child, Refugees and Minorities–Social media and Human Rights-NGO's in protection of Human Rights-Right to Election.	
*Self-study and questions for examinations may be taken from the self-study portions also.	
Teaching Methods:	
ChalkandTalk/Powerpointpresentation/Seminar/Brainstorming/Assignment/GoogleClassroom.	
Text Book:	
1. Human Rights (2019) Compiled by Kongunadu Arts and Science College, Coimbatore–29.

ProgrammeCode:09		B.Sc. Computer Science	
Title of the Paper:		Non-Major Elective -Women's Rights	
Batch	Hours/Week	Total Hours	Credits
2023-2024	2	30	2
Course Objectives			
1. To know about the laws enacted to protect women against violence.			
2. To impart awareness about the hurdles faced by women.			
3. To develop a knowledge about the status of all forms of women to access to justice.			
4. To create awareness about women's rights.			
5. To know about laws and norms pertaining to protection of women.			
6. To understand the articles which enables the women's rights.			
7. To understand the Special Women Welfare laws.			
8. To realize how the violence against women puts an undue burden on healthcare services.			

Course Outcomes (CO)		
K1 to K5	CO1	Understand the importance of Women's Studies and incorporate Women's Studies with other fields.
	CO2	Analyze the realities of Women Empowerment, Portrayal of Women in Media, Development and Communication.
	CO3	Interpret the laws pertaining to violence against Women and legal consequences.
	CO4	Study the important elements in the Indian Constitution, Indian Laws for Protection of Women.
	CO5	To be Aware of Government Developmental schemes for women and to create Awareness on modernization and impact of technology on Women.

Syllabus	
UNIT I	(6 Hours)
Women Studies: Basic concepts of Women's studies in Higher education, Women's studies perspectives- Socialization-Patriarchy-Women's studies as an academic discipline- Growth and Development of Women's studies as a discipline internationally and in India.	
UNIT II	(6 Hours)
Socio-economic Development of Women: Family welfare measures, role of women in economic development, representation of women in media status of women land rights, women entrepreneurs, National policy for the empowerment of women.	
UNIT III	(6 Hours)
Women's rights–Access to Justice: Crime against women, domestic violence–physical abuse-verbal abuse–emotional abuse-economic abuse–minorities, dowry- harassment and death, code of conduct for workplace, abetment of suicide.	
UNIT IV	(6 Hours)
Women protective acts: Protective legislation for women in the Indian constitution- Antidowry, SITA, PNDT, and Prevention Sexual Harassment at Workplace (Visakacase), Domestic violence (Prevention) Act.	
UNIT V	(6 Hours)

Women and Child welfare: Safety provisions-various forms of mass media, radio, visual, internet, cyberspace, texting, SMS and smartphone usage. Healing measures for the affected Women and child society by private and public sector, NGO and society.
*Self-study and questions for examinations may be taken from the self-study portions also.
Teaching Methods:
ChalkandTalk/Powerpointpresentation/Seminar/Brainstorming/Assignment/GoogleClassroom.
Text Book:
1.Women’s Rights (2021), Compiled by Kongunadu Arts & Science College, Coimbatore– 641 029.

ProgrammeCode:09		B.Sc. Computer Science	
Title of the Paper:		Non-Major Elective - Consumer Affairs	
Batch	Hours/Week	Total Hours	Credits
2023-2024	2	30	2
Course Objectives			
1. To familiarize the students with their rights and responsibilities as a consumer.			
2. To understand the procedure of redress of consumer complaints.			
3. To know more about decisions on Leading Cases by Consumer Protection Act.			
4. To get more knowledge about Organizational set-up under the Consumer Protection Act.			
5. To impart awareness about the Role of Industry Regulators in Consumer Protection.			
6. To understand Contemporary Issues in Consumer Affairs.			

Course Outcomes (CO)		
K1 to K5	CO1	Able to know the rights and responsibility of consumers.
	CO2	Understand the importance and benefits of Consumer Protection Act.
	CO3	Applying the role of different agencies in establishing product and service standards.
