- Louis Pasteur was a French chemist and microbiologist considered the most important founders of Microbiology.
- Microbiology developed as a scientific discipline from the era of Louis Pasteur (1822- 1895) himself.
- He first coined the term "microbiology" for the study of organisms of microscopic size. For his innumerable contributions in the field, he is also known as the **Father of Microbiology**.
- He is renowned for his discoveries of the principles of **vaccination**, microbial fermentation and pasteurization.

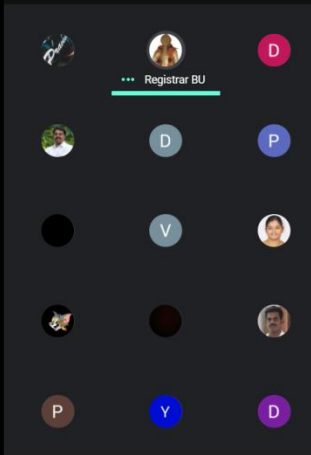

➤ Science is the highest personification of the nation because that nation will remain the first which carries the furthest the works of thought and intelligence.

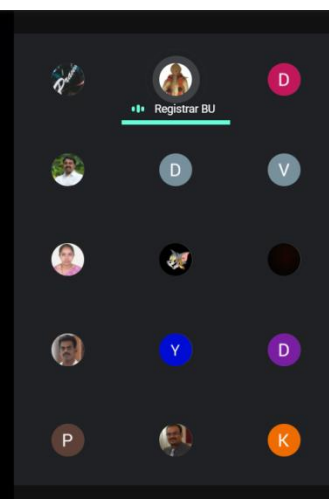

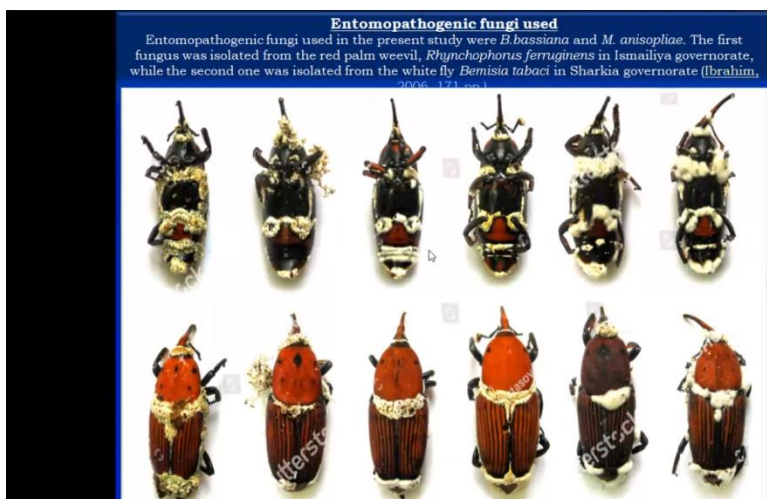

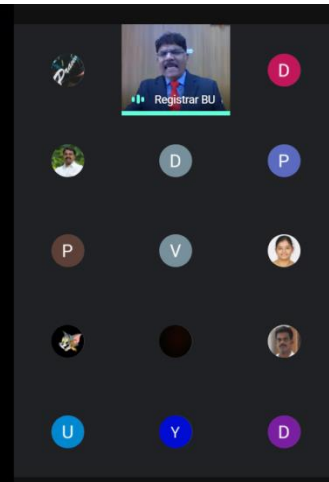

➤ Science knows no country, because knowledge belongs to humanity, and is the torch which illuminates the world.

➤ Louis Pasteur

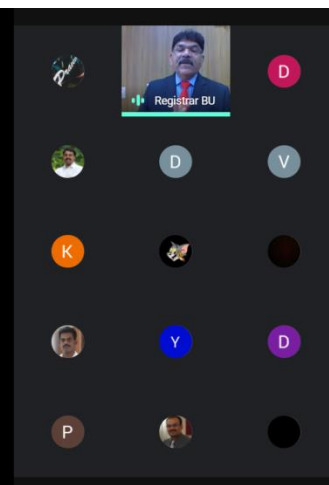

The diagram illustrates the life cycle of a polyhedral virus within an insect gut. It shows the ingestion of polyhedra, their movement through the foregut and midgut, and the eventual breakdown of the polyhedra and peritrophic membrane to release virions into the midgut cells.

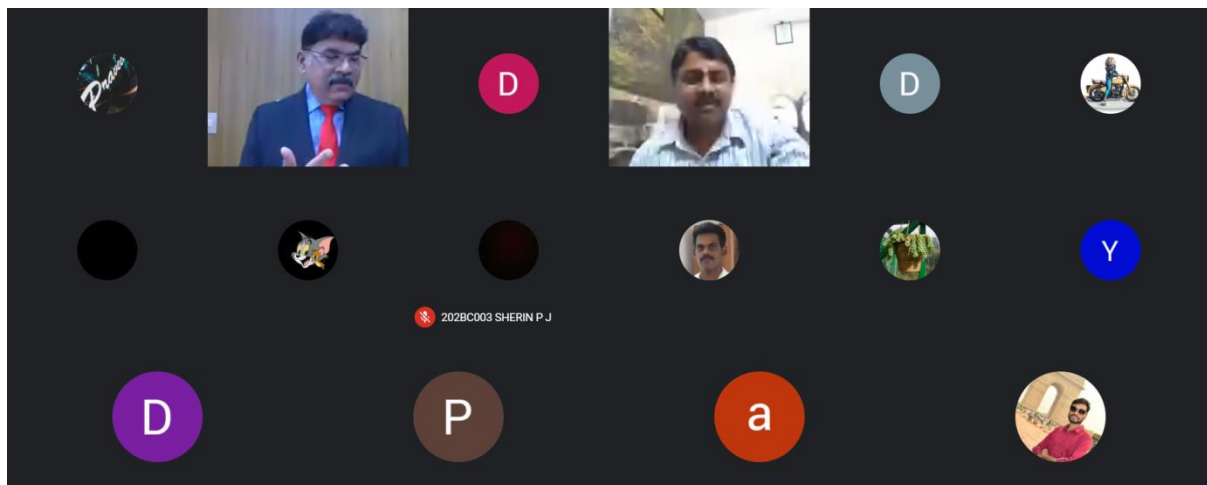

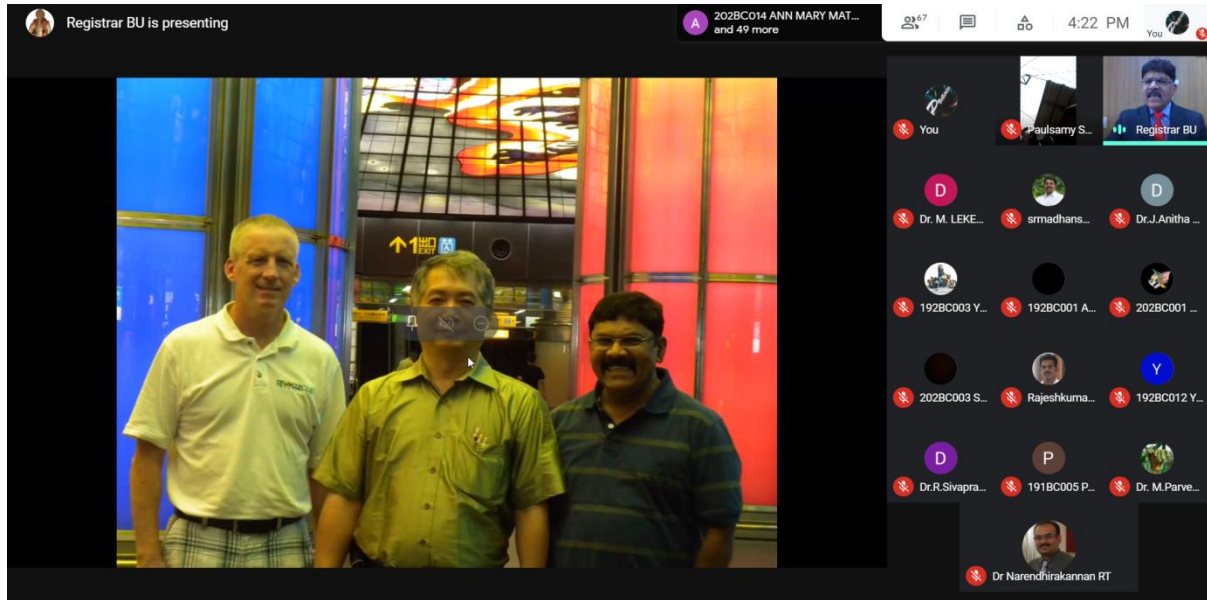

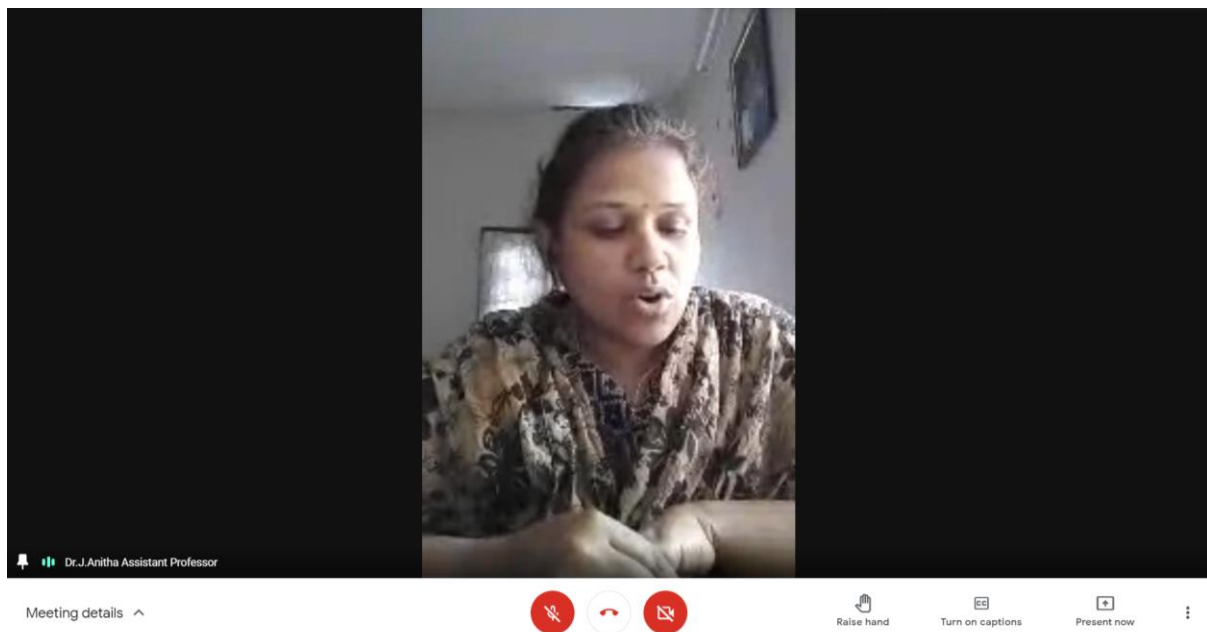

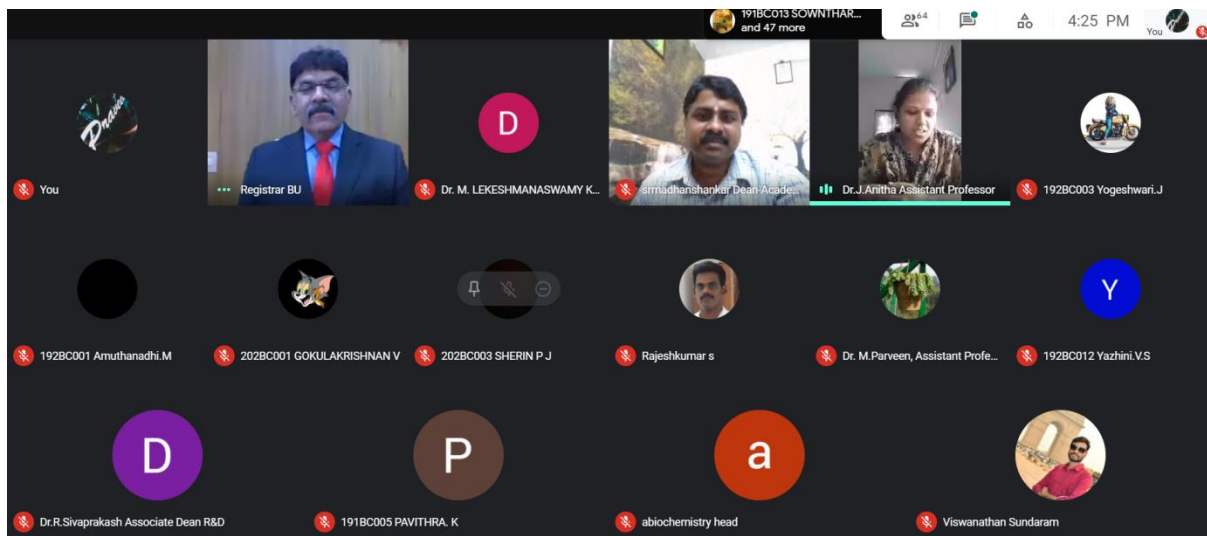

■ Background

- 1). A typically rare fungal infection called mucormycosis has surged in India recently, primarily affecting people recovering from COVID-19.
- 2). Experts say this type of fungal infection is extremely rare and that it may be affecting people whose immune systems have been damaged by the coronavirus.
- 3). Experts say the use of steroid drugs in these patients may partially explain some of the surge, while the immune-compromised state of COVID-19 patients could explain otherS.
