Tamilnadu, India.

Thanking you,

Yours sincerely

Principal

stress to it. These crops can be grown for many years without rotation as it does not deplete the soil, rather hemp

needs less water to grow

It does not require huge irrigation facilities. It requires only a small amount of water used by other fibres. With depleting freshwater resources like hemp act as a saviour with all their wonderful properties. Hemp cultivation will save a huge amount of water resources. It requires a small amount of water as needed by cotton.

Conclusion

Lightweight, hemp clothing is stronger than other fabrics. It is the best natural fibre available. It is the strength and durability of hemp make it a preferred clothing option. You don't need to worry about the wear and tear of your clothes as hemp holds the fabric strong and in a row.

Hemp growth rate

Hemp is a fast growing weed. It has fewer cultivation requirements and is easier to grow compared to other fibres. It is a hard and sturdy plant with a long life span. It is not complicated to grow hemp. It grows well even in adverse conditions. It has numerous applications in the fashion industry and is available in abundance, which will not create problems in the future. There will always be enough to serve its users.

Hemp doesn't require dyes

Hemp is a naturally vibrant fibre. It can be put to use without dyes, however, adding dyes would only enhance its natural beauty. It can be spun into a variety of different colours without the application of dyes. Because of its porous nature, hemp retains its vibrance and richness longer than other fabrics.

So many qualities in just one fibre. No wonder hemp is called the 'Super Crop' of today's generation. The fashion industry is exploring new alternatives for sustainable fashion and hemp is one of the most sought-after options. It is the need of the hour that fashion houses understand their responsibility towards the planet and put their best foot forward.

In order to eliminate further negative impact on the environment, it is crucial that the fashion industry comes up with ethical strategies. Steps must be taken to ensure that fashion doesn't cost us our planet. And one such step is the use of hemp as an alternative to protect Mother Earth! □
