Principal

## Subscription Information

1. As soon as the electronic transfer is done, please send me an email giving the following details: (a) Date of transfer; (b) Amount; (c) Name of your Bank/Branch; (d) Transaction Reference No. given by your bank.
2. Rates are inclusive of postage (ordinary post) and handling charges but with additional charges, journals can also be mailed by Registered Post.
3. Claims for missing issues will be honoured if received within 1 month from the date of publication.
4. Order will be accepted for the period January to December of every year.

STORM (stochastic reconstruction microscopy), and GSDIM (ground-state depletion with individual molecular return) in which the optical resolution has been improved from about 200–350 nm to 20–35 nm by switching between the dark and the bright states of a fluorescent marker. However, it needs to be mentioned that the rhodamine family of dyes lacks water-soluble compounds that combine high photostabilities and fluorescence quantum yields with absorbance and fluorescence band maxima lying in the far-red optical region. In recent years there has been serious research to bridge this gap.

A new useful family of dyes, the rylenes, have proved to be ideally suited for single-molecule spectroscopy owing to their high fluorescence quantum yields and photostability. Rylenes and their dicarboxylic imide derivatives are key chromophores in dye chemistry due to their excellent chemical and photostability. Thus terrylene became one of the most applied dyes in this field and perylene, terrylene, and quaterylenebisimide dyes have been synthesized. However, as a significant drawback these dyes exhibit extended conjugated systems that are difficult to solubilize and exhibit a high tendency for the undesired formation of dye aggregates. On the other hand, the smallest representative of the rylene bisimides, naphthalene bisimide, exhibits a colorless nonfluorescent system that has been extensively applied in supramolecular chemistry, DNA intercalation, electrically conductive aggregates, and recently as the active layer of organic field effect transistors. There have been attempts here again to synthesise and evaluate new molecules with better performance.

It has been the case, however that among the myriad of

available synthetic fluorescent molecules exhibiting high extinction coefficients, high quantum yields, narrow emission bands, and photostability, many have limited utility due to poor solubility. For most biological applications both good water solubility and resistance to the formation of nonfluorescent dimer and higher aggregates (especially after conjugation to biological material) are essential. Generally, solubility has been imported by either introducing ionizable hydrophilic groups (carboxylic acid, phosphonic acid, sulfonic acid, and ammonium groups) within the core structure of a fluorescent dye or by grafting the hydrophobic fluorophore to hydrophilic (bio)polymers (carbohydrates, oligonucleotides and polyethylene glycol). Both strategies have been extensively used with benzo[a]phenoxazine, xanthene and cyanine dyes, resulting in the development of several families of novel water soluble fluorescent labels. Some of them are commercially available.

It has been demonstrated that the family of molecules comprised of a dicyanomethylenedihydrofuran (DCDHF) acceptor and a dialkylamino donor linked by a  $\pi$ -conjugated unit can be modified to have NIR activities. It has been proposed that DCDHF's with only oligoaromatic conjugation would have the desired red shift but with a smaller reduction of quantum yields.

All available chromophoric and fluorophoric systems are extensively modified to achieve NIR activity. The principle of enhancing the donor and acceptor strengths, rigidizing the conjugated system, metal complexation and similar principles together with the ab-initio calculations at the predictive end are extensively practiced in optimizing the required NIR active materials.

## Reminder for Renewal of Subscription of Journals

Dear Friend,

Thank you very much for supporting "INTEGRATED SOCIAL INITIATIVES" all these years.  
Our record reveals that your subscription to ☐ SOCIAL ACTION / ☐ LEGAL NEWS AND VIEWS ☐ हरिद्वार की आवाज is going to expire/ has already expired on Dec 2021. So we request you to kindly send your renewal payment in order to continue receiving the journal in time.

- ☞ We do not like to lose a valued subscriber like you and holding back issues. We shall send the journals to you as soon as your renewal takes place.
- ☞ In case you have already renewed, you may ignore this reminder.
- ☞ Support from people like you is what keeps us going. We are awaiting your renewal.
- ☞ Please subscribe the period and rate as per details given overleaf.

With warm regards

Yours sincerely,

  
Secretary

## உள்ளத்தோடு உள்ளம்

வருடந்தோறும் விழாக்கள் தான் நமது நாகரீக புண்பாட்டில், தைப்பொங்கல் துவங்கி கிறிஸ்துமஸ் வரை அனைத்து விதத்திலும் புண்டிகைகளுக்கு குறைவில்லாத பொழுதுகளைக் கட்டி கொண்டுக்கிறோம். பொருளாதாரம் சார்ந்து கொண்டாடும் விதங்கள் மாறினாலும் கொண்டாட்டம் என்பது மாறுவதில்லை.

பல இன்பங்களுக்கு அந்த நாட்கள் மையக்காரணியாகிவிட்டது ஏன் கொண்டாடுகிறோம் என்றும் தெரியாமலும் கூட நாம் கொண்டாடுவது உண்டு. மரபை மறந்தும் கூட சில விழாக்களைக் கொண்டாடுகிறோம் சரி கொண்டாடுவோம் விழாக்களோடு நம் மரபுகளையும் கொஞ்சம் சேர்த்துக் கொண்டாடுவோம். மரபோடு சேர்த்து மரபீன்று காத்து வரும் நமது முன்னவர்களையும் கொண்டாடுவோம்.

இன்னமும் ஏன் இன்பத்தை பொழுதுபோக்குகளுக்குள் தேடுகிறோம், மழலைக்குள் தேடுங்கள், மரமாய் வளர்ந்து நிற்கும் மரபின் ஆணிகளான தாத்தா, பாட்டி, தாய் தந்தை எனும் மரபு பெட்டகங்களுக்குள் இன்பத்தைத் தேடுங்கள். திரையில் வரும் பாடல்களையும், நாயகர்களையும் இன்பமாகக் கருதும் நாம் இமயமலை போல் அனுபவங்களைக் குவித்திருக்கும் இனிமைவாதுகளிடம் ஏன் இன்பத்தைப் பெற மறுக்கிறோம்.

நூறு ஆண்டுகளுக்குப் பின்னரும் கூட, திரைப்படங்களை மீட்டெடுக்கலாம், வாழும் நாயகர்களான முன்னவர்களை மீட்டெடுக்க முடியாது. வருடந்தோறும் உழைக்கிறோம், ஓரிரு நாளேனும் ஓய்ந்திருக்கும் அவர்களுக்காக ஒதுக்குங்கள் இன்பம் இருவருக்கும் இரட்டிப்பாகும். முதிர்ந்த கனிகளின் கலையோ அளப்பரியது, முதிர்ந்த முன்னவர்களுடன் இருக்கும் காலமும் இனிமைக்குரியது.

அனைவருக்கும் தீப ஒளித்திருநாள்  
நல்வாழ்த்துக்கள்.

அன்புடன்

stress to it. These crops can be grown for many years without rotation as it does not deplete the soil, rather hemp adds to it.

uses less water to grow

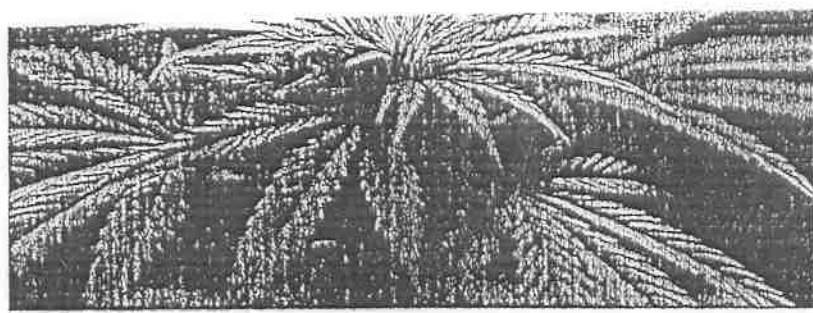

Hemp does not require huge irrigation facilities. It requires only a small amount of water used by other fibres. With depleting freshwater resources, crops like hemp act as a saviour with all their wonderful properties. Hemp cultivation will save a huge amount of water resources. It needs only a third amount of water as needed by cotton.

longer

Lightweight, hemp clothing is stronger than other fabrics. It is the best natural fibre available. It is the strength and durability of hemp that make it a preferred clothing option. You don't need to worry about wear and tear of your clothes as hemp holds the fabric strong and in a row.

high growth rate

Hemp is a fast growing weed. It has fewer cultivation requirements and is easier to grow compared to other fibres. It is a hard and sturdy plant with a long life span. It is not complicated to grow hemp. It grows well even in adverse conditions. It has numerous applications in the fashion industry in abundance, which will not create problems in the future. There will always be enough to serve its users.

Hemp doesn't require dyes

Hemp is a naturally vibrant fibre. It can be put to use without dyes, however, adding dyes would only enhance its natural beauty. It can be spun into a variety of different colours without the application of dyes. Because of its porous nature, hemp retains its vibrance and richness longer than other fabrics.

So many qualities in just one fibre. No wonder hemp is called the 'Super Crop' of today's generation. The fashion industry is exploring new alternatives for sustainable fashion and hemp is one of the most sought-after options. It is the need of the hour that fashion houses understand their responsibility towards the planet and put their best foot in.

In order to eliminate further negative impact on the environment, it is crucial that the fashion industry comes up with ethical strategies. Steps must be taken to ensure that fashion doesn't cost us our planet. And one such step is the use of hemp as an alternative to protect Mother Earth. ☐
