

In the World's Top 2% Scientists list

Dr. K. Sowndhararajan

Dr. C. Ravichandran

Dr. V.D. Nithya

Kongunadu College Professors

The Covai Mail

Recently, Stanford University released its annual ranking of the world's top 2% of scientists, evaluated based on standardized citation metrics. In this prestigious list, three professors' names from Kongunadu Arts and Science College (Autonomous) have been listed. This annual ranking evaluates researchers based on standardized citation metrics such as the H-index, co-authorship, and HM-index.

Dr. K. Sowndhararajan, Assistant Professor, Department of Botany has been recognized for the 4th time. His present research

works include isolating essential oils from various aromatic plants and evaluating the effect of essential oil inhalation on human electroencephalographic activity. Further, he has good experience in different research areas, including phytomedicine, nutraceutical, microbiology, and plant pathology.

Dr. C. Ravichandran, Assistant Professor, Department of Mathematics has been recognized for the 3rd time (Mathematical Sciences) based on citations, h-index, and co-authorship adjusted h-index over the previous three years. His area of research topics are fractional calculus, Mathematical

Biology, Fixed point theory, Control problems and Mathematical Modeling.

Dr. V.D. Nithya, Assistant Professor, Department of Physics, has been recognized for 2nd time in energy discipline. Her research contributions are based on the synthesis and fabrication of nanomaterials for high energy and power density supercapacitors and batteries. Ongoing research on new chemical compositions of electrode materials aimed to enhance the performance of energy storage systems, leading to greater efficiency, lower costs, and improved sustainability.
